The Chargor shall:

- (a) ensure that representatives of the Offshore Security Agent (with or without surveyors, workmen and others) are permitted free access at all reasonable times to view the condition of any of its Charged Assets (without becoming liable as mortgagee in possession), and to inspect and take copies and extracts from the books, accounts and records of the Chargor at the Chargor's own cost; and
- (b) from time to time on request of the Offshore Security Agent, furnish the Offshore Security Agent with such information as the Offshore Security Agent may require about the Chargor's business and affairs, the Charged Assets and its compliance with the terms of this Deed and the Chargor.

of any of the Insurances or Assigned Contracts.

### **13.6 Frustration**

The Chargor shall not make or agree to any claim that any of the Insurances or Assigned Contracts is frustrated or invalid.

### **13.7 Enforcement of Rights**

### **13.9 Rendering Insurances or Assigned Contracts void**

The Chargor shall not do, or omit to do, or suffer or permit to be done, anything which will render any of the Insurances or Assigned Contracts to be or become, in any respect, invalid, void or voidable.

### **13.10 Chargor's obligations**

It is further agreed and declared by the Chargor that notwithstanding this Deed:

- (a) the Offshore Security Agent shall not be obliged to make any payment or enquiry as to the nature or sufficiency of any payment made under any Assigned Contract or Insurance or into the Bank Accounts, or to make any claim or take any other action to collect moneys or to enforce any rights and benefits hereby assigned to the Offshore Security Agent or to which the Offshore Security Agent may at any time be entitled under this Deed;

The statutory powers referred to in this Clause 13.12 (*Power of Mortgagor*) shall be exercisable by the Offshore Security Agent at any time after an Event of Default has occurred and is continuing and, whether or not the Offshore Security Agent shall then be in possession of the premises proposed to be leased, so as to authorise the Offshore Security Agent to make a lease or agreement for lease at a premium and for any length of term and generally without any restriction on the kinds of leases and agreements for lease that the Offshore Security Agent may make and generally without the necessity for the Offshore Security Agent to comply with any restrictions imposed by the provisions of Section 23 of the Property Act.

#### **14.10 Immunity**

The Chargor is not entitled to immunity from suit, execution, attachment or other legal process, nor in any proceedings taken in Singapore in relation to this Deed and the Chargor will not be entitled to claim immunity for itself arising from suit, execution or other legal process.

All or any of the powers, authorities and discretions which are conferred by this Deed either expressly or implicitly upon a Receiver of the Charged Assets may, after the Security constituted by this Deed shall have become enforceable, be exercised by the Offshore Security Agent in relation to the whole of the Charged Assets or any part thereof without first appointing a Receiver of the same or notwithstanding the appointment of a Receiver of the Charged Property or any part thereof.

#### **15.7 Extension of Powers**

The provisions of the Property Act relating to the power of sale and the other powers conferred by Section 24 of the Property Act are hereby extended (as if such extensions were contained in the Property Act) to authorise the Offshore Security Agent at its absolute discretion after an Event of Default has occurred and is continuing:

- (a) to sell all the title to and interest in the Charged Assets, or any interest in the same, and to do so for shares, debentures or any other securities whatsoever, or in consideration of an agreement to pay all or part of the purchase price at a later date or dates, or an agreement to make periodical payments, whether or not the agreement is secured by any Security or a guarantee, or for such other consideration whatsoever as the Offshore Security Agent may think fit, and also to grant any option to purchase, and to effect exchanges;

The Offshore Security Agent shall not be under any obligation to take any action against the Chargor unless it shall have been indemnified and/or secured to its satisfaction.

- (b) The Offshore Security Agent may refrain from doing anything in any jurisdiction if doing the relevant thing in that jurisdiction would, in its opinion (which may be based upon legal advice in the relevant jurisdiction), be contrary to any law of that jurisdiction or, to the extent applicable, of Indonesia or Singapore or would otherwise render it liable to any person in that jurisdiction or Indonesia or Singapore or if, in its opinion based upon such legal advice, it would not have power to do the relevant thing in that jurisdiction by virtue of any applicable law in that jurisdiction or in Indonesia or Singapore or if it is determined by any court or other competent authority in that jurisdiction or in Indonesia or Singapore that it does not have such power.

without any notice or further notice, the Offshore Security Agent may (acting on the instructions of Minority Facility A Lenders), by deed, or otherwise in writing signed by any officer or manager of the Offshore Security Agent or any person authorised for this purpose by the Offshore Security Agent, appoint one or more persons to be a Receiver of the whole or any part of the Charged Assets. Subject to the provisions of the IRDA, the Offshore Security Agent may similarly remove (so far as it is lawfully able to) any Receiver and appoint any person in place of any Receiver. If the Offshore Security Agent appoints more than one person as Receiver, the Offshore Security Agent may give those persons power to act either jointly or severally. The provisions of Section 29 of the Property Act (excluding the restrictions in Sections 29(6), 29(7) and 29(8)) and any similar provision of any equivalent law (as varied and/or extended by this Deed) shall apply to any appointment made pursuant to this Deed.

### **16.2 Scope of appointment**

Any Receiver may be appointed Receiver of all of the Charged Assets or Receiver of a part of the Charged Assets specified in the appointment. ### **16.3 Rights of Receivers**

Any Receiver appointed pursuant to this Clause 16 (*Appointment and Rights of Receivers*) shall (subject to any limitations or restrictions expressed in this Deed or other instrument appointing him but notwithstanding any winding up or insolvency of the Chargor) have the rights, powers, privileges and immunities conferred by the Acts on (a) mortgagee, (b) mortgagee in possession and (c) receivers duly appointed under the Acts, and shall also

have the rights set out in Schedule 1 (*Rights of Receivers*). Any Receiver shall in the exercise of its powers, authorities and discretions conform to the directions and regulations from time to time given or made by the Offshore Security Agent. Any Receiver referred to in this Clause 16 (*Appointment and Rights of Receivers*) may enjoy the benefit or enforce the terms of this Clause in accordance with the provisions of the Contracts (Rights of Third Parties) Act, Chapter 53B of Singapore.

#### **16.4 Agent of Chargor**

Any Receiver shall be the agent of the Chargor for all purposes. The Chargor alone shall be responsible for the Receiver's contracts, engagements, acts, omissions, defaults and losses and for liabilities incurred by the Receiver. The Offshore Security Agent shall not incur any liability thereof (either to the Chargor or to any other person whatsoever) by reason of its making his appointment as such Receiver or of its having made or given any regulation or direction or for any other reason whatsoever.

#### **16.5 Remuneration**

The Offshore Security Agent may determine the remuneration of any Receiver (without being limited to the maximum rate specified in Section 29(6) of the Property Act) and direct payment of that remuneration out of moneys it receives as Receiver. The Chargor alone shall be liable for the remuneration and all other costs, losses, liabilities and expenses of the Receiver.

### **17. OFFSHORE SECURITY AGENT**

#### **17.1 Retirement of the Offshore Security Agent**

- (b) Upon the appointment of a successor Offshore Security Agent, the successor Offshore Security Agent shall succeed to and become vested with the rights, powers, duties and discretions of the retiring Offshore Security Agent and the retiring Offshore Security Agent shall be discharged from any further duties and obligations hereunder. The Parties agree to execute whatever documents may be necessary to effect such a change of Offshore Security Agent.

#### **17.2 Remuneration and Indemnification of the Offshore Security Agent**

- (a) The Chargor will pay the Offshore Security Agent remuneration for its services as Offshore Security Agent in accordance with the terms of the Facilities Agreement. All such remuneration shall be paid to the Offshore Security Agent for its own account free and clear of deduction, set off, counterclaim and withholding on account of any taxation, subject to Clause 14.13(b).
- (b) If the Offshore Security Agent finds it expedient or necessary or is requested by the Chargor to undertake duties which they both agree to be of an exceptional nature or otherwise outside the scope of the Offshore Security Agent's normal duties under this Deed, the Chargor will pay such additional remuneration as they may agree or, failing agreement as to any of the matters in this Clause (or as to such sums referred to in Clause 17.2(a)), as determined by an Independent Financial Institution (acting as an expert) selected by the Offshore Security Agent and approved by the Chargor or, failing such approval, nominated by the President for the time being of The Law Society of Singapore. The expenses involved in such nomination and such Independent Financial Institution's fee will be paid by the Chargor, which sums, for the avoidance of doubt, shall be paid free and clear of deduction and withholding on account of taxation, subject to Clause 14.13(b). The determination

of such Independent Financial Institution will be conclusive and binding on the Chargor, the Offshore Security Agent and the Lenders.

- (c) The Chargor will on demand by the Offshore Security Agent pay or discharge all costs, charges, liabilities and expenses properly incurred by the Offshore Security Agent in the preparation and execution of this Deed and the performance of its functions under, and in any other manner in relation to, this Deed including, but not limited to, expenses incurred seeking legal or financial advice to discharge its duties in accordance with this Deed, legal expenses, any stamp, documentary or other taxes or duties paid by the Offshore Security Agent in connection with any action or legal proceedings brought or contemplated by the Offshore Security Agent against the Chargor to enforce any provision of this Deed. Such costs, charges, liabilities and expenses will:

  - (ii) in other cases carry interest at such rate from the date of demand or (where the demand specifies that payment is to be made on an earlier date) from such earlier date.
- (d) The Chargor shall in addition pay to the Offshore Security Agent an amount equal to the amount of any value added tax or similar tax chargeable in respect of its remuneration under this Deed.

### **17.3 Indemnity**

- (a) The Chargor will indemnify the Offshore Security Agent in respect of all liabilities and expenses properly paid or incurred by it or by anyone appointed by it or to whom any of its functions may be delegated by it in the carrying out of its functions and against any loss, liability, cost, claim, action, demand or expense (including, but not limited to, all costs, internal management time fees charges and expenses paid or incurred in disputing or defending any of the foregoing) which any of them may pay or incur or which maybe made against any of them arising out of or in relation to or in connection with, its appointment or the exercise of its functions pursuant to any Finance Document. The Contracts (Rights of Third Parties) Act, Chapter 53B of Singapore applies to this Clause 17.3(a). Subject to Clause 14.13(b), all payments by the Chargor under this Clause 17.3(a) will be made without withholding or deduction for any taxes including any value added tax or similar tax, duties, or other charges of whatever nature imposed, levied, collected, withheld or assessed by or within Indonesia or Singapore or any other jurisdiction or any political subdivision or authority thereof therein having power to tax. Subject to Clause 14.13(b), if any withholding or deduction is required by law in respect of payments made by the Chargor to the Offshore Security Agent under this Clause 17.3(a), the Chargor shall pay additional amounts as may be necessary in order that the net amounts received by the Offshore Security Agent after such deduction or withholding shall equal the amounts which would have been receivable by the Offshore Security Agent had no such deduction or withholding been required. The Chargor shall obtain the relevant tax certificate(s) evidencing payment of tax on behalf of the Offshore Security Agent and will forward the tax certificate(s) to the Offshore Security Agent to enable the Offshore Security Agent to claim relief in its country against payment of double taxation on its income from payment of tax in Indonesia or Singapore or any such other jurisdiction.

- (b) Clause 17.3(a) will continue in full force and effect as regards the Offshore Security Agent after termination of this Deed.

#### **17.4 Responsibility of Offshore Security Agent**

- (a) The Offshore Security Agent shall not be responsible for the execution, delivery, legality, effectiveness, adequacy, genuineness, validity, performance, enforceability, sufficiency or admissibility in evidence of this Deed or any other document relating or expressed to be supplemental thereto and shall not be liable for any failure to obtain any licence, consent or other authority for the execution, delivery, legality, effectiveness, adequacy, genuineness, validity, or the performance, enforceability, sufficiency or admissibility in evidence of this Deed or any other document relating or expressed to be supplemental hereto.
- (b) The Offshore Security Agent shall not be responsible for, or for investigation of any matter which is the subject of, any recital, statement, representation, warranty or covenant of any person contained in this Deed or any other agreement or document relating to the transactions contemplated in this Deed or under such other agreement or document.
- (c) The Offshore Security Agent shall not be responsible in any manner for the validity, enforceability or sufficiency of this Deed, any other agreement or document relating to the transactions contemplated in this Deed or any Collateral delivered thereunder, or for the value or collectability of any instrument, if any, so delivered, or for any representations made or obligations assumed by any party other than the Offshore Security Agent. The Offshore Security Agent shall not be bound to examine or inquire into or be liable for any defect or failure in the right or title of the Chargor to all or any of the Charged Assets whether such defect or failure was known to the Offshore Security Agent or might have been discovered upon examination or inquiry and whether capable of remedy or not.
- (d) The Offshore Security Agent shall not be responsible for any unsuitability, inadequacy, expiration or unfitness of any security interest created hereunder or pursuant to any other agreement or document relating to the transactions contemplated in this Deed nor shall it be obligated to make any investigation into, and shall be entitled to assume, the adequacy and fitness of any security interest created hereunder or pursuant to any other agreement or document relating to the transactions contemplated in this Deed.
- (e) The Offshore Security Agent shall only be obliged to perform such duties as are specifically set forth herein and no duties, obligations or responsibilities shall be otherwise implied. Except as specifically provided for in the Finance Documents, nothing in the Finance Documents makes the Offshore Security Agent a trustee or fiduciary of any party or any other person.

## **17.6 Currency Conversion**

The Offshore Security Agent shall have the power at any time, either in its own name or in the name of the Chargor, and without notice or reference to the Chargor or any other person, to convert into any currency any moneys from time to time received by or paid to the Offshore Security Agent pursuant to this Deed.

## **17.7 Same rights as Receiver**

## **17.8 Delegation**

The Offshore Security Agent may at any time and from time to time delegate in any manner to any person or persons or fluctuating body of persons, all or any rights exercisable by the Offshore Security Agent under any Finance Document. Any such delegation may be made upon such terms and conditions (including the power to sub-delegate) as the Offshore Security Agent thinks fit and no such delegation shall preclude the subsequent exercise of such powers by the Offshore Security Agent itself or preclude the Offshore Security Agent from making a subsequent delegation thereof to some other person and any such delegation may be revoked at any time.

## **17.9 Rights of Offshore Security Agent**

- (a) All rights, powers, benefits and protections (including without limitation all forms of indemnities) made available to the Offshore Security Agent as described in the Facilities Agreement shall apply to the Offshore Security Agent in this Deed, *mutatis mutandis*. If there are any conflicts between the provisions in the Facilities Agreement in connection therewith and those in this Deed, the provisions in the Facilities Agreement shall prevail (but only to the extent that the validity and enforceability of the rights of the Offshore Security Agent pursuant to this Deed are not detrimentally affected as a result of such prevalence).

If that bank or institution is the Offshore Security Agent or a subsidiary, holding or associated company of the Offshore Security Agent, it need only account for an amount of interest calculated by reference to the standard rate of interest which at the relevant time would be payable by it on such a deposit to an independent customer. - (c) The Offshore Security Agent may, when it deems necessary for the purpose of this Deed, engage lawyers or other experts and obtain advice from them, and rely on any advice so obtained and shall be protected and shall incur no liability whatsoever in respect of any action taken or omitted to be taken in accordance with such advice, save where the same results from the gross negligence, wilful default, wilful misconduct or fraud of the Offshore Security Agent in the selection of such lawyers or other experts. The Chargor shall bear any expenses incurred by the Offshore

Security Agent in engaging any such lawyer or other experts as aforesaid. Any advice may be sent or obtained by letter, electronic mail or facsimile and the Offshore Security Agent shall not be liable for acting on any such advice.

- (g) Nothing in this Deed shall prevent the Offshore Security Agent from entering into financial transactions with the Chargor or any of its Subsidiaries and it shall not be under any obligation to account to the Secured Parties with respect to any profits derived therefrom.
- (h) The Offshore Security Agent shall be under no obligation to monitor or supervise the functions of any other person under this Deed or any other agreement or document relating to the transactions herein or therein contemplated and shall be entitled, in the absence of actual knowledge of a breach of obligation, to assume that each such person is properly performing and complying with its obligations.
- (i) Notwithstanding any provision of this Deed to the contrary, the Offshore Security Agent shall not be liable for special, indirect, punitive or consequential loss or damage of any kind whatsoever (including but not limited to lost profits), whether or not foreseeable, even if it has been advised of the likelihood of any such loss or damage and regardless of whether the claim for loss or damage is made in negligence, for breach of contract or otherwise.
- (j) The Offshore Security Agent shall not be liable for any error of judgment made in good faith by a responsible officer or responsible officers of the Offshore Security Agent.
- (k) The Offshore Security Agent may rely on information, reports and certificates provided by the Chargor and shall not be liable for acting or refraining from acting in reliance on such.

### **19.2 Offshore Security Agent's liability**

Neither the Offshore Security Agent nor any Receiver or Delegate shall in any circumstances (either by reason of taking possession of the Charged Assets or any part thereof or for any other reason and whether as mortgagee in possession or otherwise) be liable to the Chargor, any Secured Party or any other person for any costs, losses, damages, liabilities or expenses relating to the realisation of any Charged Assets or from any act, default, omission or misconduct of the Offshore Security Agent, any Receiver, any Delegate or their respective officers, employees or agents, including any exercise or non-exercise by the Offshore Security Agent of any power, authority or discretion conferred upon it, in relation to the Charged Assets or any part thereof or in connection with the Finance Documents or pursuant to the Property Act, except to the extent caused by its own gross negligence, fraud, wilful default or wilful misconduct. Any third party referred to in this Clause 19 (*Liability of Offshore Security Agent, Receivers and Delegates*) may enjoy the benefit or enforce the terms of this Clause in accordance with the provisions of the Contracts (Rights of Third Parties) Act, Chapter 53B of Singapore.

### **20.1 Appointment**

The Chargor by way of security irrevocably appoints the Offshore Security Agent, every Receiver and every Delegate severally as its attorney (with full power of substitution), on its behalf and in its name or otherwise, at such time and in such manner as the attorney thinks fit:

- (a) to do anything which the Chargor is obliged to do (but has not done) under any Finance Document to which it is party (including to execute charges over, transfers, conveyances, assignments and assurances of, and other instruments, notices, orders and directions relating to, the Charged Assets);

## **20.2 Ratification**

The Chargor ratifies and confirms and agrees to ratify and confirm whatever any such attorney shall do in the exercise or purported exercise of the power of attorney granted by it in Clause 20.1 (*Appointment*). Any third party referred to in this Clause 20 (*Power of Attorney*) may enjoy the benefit or enforce the terms of this Clause in accordance with the provisions of the Contracts (Rights of Third Parties) Act, Chapter 53B of Singapore.

## **21. PROTECTION OF THIRD PARTIES**

### **21.1 No duty to enquire**

No purchaser or other person dealing with the Offshore Security Agent, any other Secured Party, any Receiver or any Delegate shall be concerned to enquire:

- (a) whether the powers or rights conferred by or pursuant to any Finance Document are exercisable;
- (b) whether any consents, regulations, restrictions or directions relating to such rights have been obtained or complied with;
- (c) otherwise as to the propriety or regularity of acts purporting or intended to be in exercise of any such rights (including whether or not any delegation shall have lapsed for any reason or has been revoked); or
- (d) as to the application of any money borrowed or raised.

### **21.2 Protection to purchasers**

Upon any sale or disposal of the Charged Assets or any part thereof which the Offshore Security Agent, any Receiver or any Delegate shall make or purport to make under the provisions of this Deed, a statement in writing from the Offshore Security Agent, any Receiver or any Delegate that the Security created by this Deed has become enforceable and that the power of sale has become exercisable shall be conclusive evidence of the fact in favour of any purchaser or other person to whom any of the Charged Assets may be transferred and such purchaser or other person will take the same free of any rights of the Chargor and, in making any sale or disposal of any of the Charged Assets or making any acquisition, the Offshore Security Agent, any Receiver or Delegate may do so for such consideration, in such manner and on such terms as it thinks fit. The Chargor undertakes to indemnify the Offshore Security Agent, any Receiver or any Delegate against any claim which may be made against the Offshore Security Agent, any Receiver or any Delegate by such purchaser or any other person by reason of any defect in its title to the Charged Assets. Any third party referred to in this Clause 21 (*Protection of Third Parties*) may enjoy the benefit or enforce the terms of this Clause in accordance with the provisions of the Contracts (Rights of Third Parties) Act, Chapter 53B of Singapore.

## **22. SAVING PROVISIONS**

### **22.1 Continuing Security**

Subject to Clause 23 (*Discharge of Security*), the Charges are continuing security and will extend to the ultimate balance of the Secured Liabilities, regardless of any intermediate payment or discharge in whole or in part.

## **22.2 Reinstatement**

- (a) If any payment by the Chargor or any discharge given by a Secured Party (whether in respect of the obligations of any person or any Security for those obligations or otherwise) is avoided or reduced as a result of insolvency or any similar event:
  - (i) the liability of the Chargor and the Charges shall continue as if the payment, discharge, avoidance or reduction had not occurred; and
  - (ii) each Secured Party shall be entitled to recover the value or amount of that Security or payment from the Chargor, as if the payment, discharge, avoidance or reduction had not occurred.
- (b) The Chargor acknowledges and agrees that its entry into this Deed is intended to secure the due and punctual performance of its obligations under the Finance Documents and the Chargor does not have and is not influenced by any desire to put the Offshore Security Agent into a position which in the event of the Chargor's insolvency will be better than the position the Offshore Security Agent would have been in if this Deed had not been executed.

## **22.3 Waiver of defences**

Neither the obligations of the Chargor under this Deed nor the Charges will be affected by an act, omission, matter or thing which, but for this Clause, would reduce, release or prejudice any of its obligations under any Finance Document of any of the Charges (without limitation and whether or not known to it or any Secured Party) including:

- (a) any time, waiver or consent granted to, or composition with, any other person;
- (b) the release of any other person under the terms of any composition or arrangement with any creditor of any such person;
- (c) the taking, variation, compromise, exchange, renewal or release of, or refusal or neglect to perfect, take up or enforce any rights against, or Security over assets of, any other person or any non-presentation or non-observance of any formality or other requirement in respect of any instrument or any failure to realise the full value of any Security;
- (d) any death, mental or other incapacity or lack of power, authority or legal personality of or dissolution or change in the members or status or constitution of any person;
- (e) any amendment (however fundamental) or replacement of a Finance Document] or any other document or Security;
- (f) any unenforceability, illegality or invalidity of any obligation of any person under any Finance Document] or any other document or Security;
- (g) any insolvency, bankruptcy, liquidation, winding-up or similar proceedings; or
- (h) any postponement, discharge, reduction, non-provability or other similar circumstance affecting any obligation of any person under any Finance Document] resulting from any insolvency, liquidation or dissolution proceedings or from any law, regulation or order.

## **22.4 Immediate recourse**

The Chargor waives any right it may have of first requiring any Secured Party (or any trustee or agent on its behalf) to proceed against or enforce any other rights or Security or claim payment from any person before claiming from the Chargor under this Deed. This waiver applies irrespective of any law or any provision of any Finance Document to the

contrary.

## **22.5 Appropriations**

Until all the Secured Liabilities have been irrevocably paid in full and all facilities which might give rise to the Secured Liabilities have terminated, each Secured Party (or any trustee or agent on its behalf) may:

- (a) refrain from applying or enforcing any other moneys, Security or rights held or received by that Secured Party (or any trustee or agent on its behalf) in respect of those amounts, or apply and enforce the same in such manner and order as it sees fit (whether against those amounts or otherwise) and the Chargor shall not be entitled to the benefit of the same; and
- (b) hold in an suspense or impersonal account any moneys received from the Chargor or on account of the Chargor's liability under this Deed.

## **22.6 Deferral of Chargor's rights**

Until all the Secured Liabilities have been irrevocably paid in full and unless the Offshore Security Agent otherwise directs, the Chargor will not exercise any rights which it may have by reason of performance by it of its obligations under the Finance Documents:

- (a) to be indemnified by any person;
- (b) to claim any contribution from any other provider of Security for or any other guarantor of any person's obligations under the Finance Documents; and/or
- (c) to take the benefit (in whole or in part and whether by way of subrogation or otherwise) of any rights of the Secured Parties under the Finance Documents or of any guarantee or other Security taken pursuant to, or in connection with, the Finance Documents by any Secured Party.

## **22.7 Additional Security**

The Charges are in addition to and are not in any way prejudiced by any other guarantees or Security now or subsequently held by any Secured Party.

## **23. DISCHARGE OF SECURITY**

### **23.1 Final redemption**

Subject to Clause 23.2 (*Retention of Security*) and Clause 18 (*Order of Distributions*), if the Offshore Security Agent:

- (a) has received confirmation from each Facility A Lender that the Secured Liabilities owed to that Facility A Lender has been irrevocably paid in full; and
- (b) is satisfied that all the Secured Liabilities have been irrevocably paid in full and that all facilities which might give rise to the Secured Liabilities have terminated,

the Offshore Security Agent shall at the request and cost of the Chargor release, reassign or discharge (as appropriate) the Charged Assets from the Charges. For the avoidance of doubt, the Offshore Security Agent shall release or discharge (as appropriate) the Charged Assets from the Charges pursuant to this Clause 23.1 (*Final redemption*) notwithstanding that any and all monies, indebtedness, obligations and liabilities of any kind (including the Facility B Loan) at any time due, owing or incurred by the Chargor to the Facility B Lender under or in connection with any Finance Document have not been paid in full.

### **23.2 Retention of Security**

If the Offshore Security Agent considers that any amount paid or credited to any Secured Party under any Finance Document is capable of being avoided or otherwise set aside on

the winding-up of the Chargor or any other person, or otherwise, that amount shall not be considered to have been paid for the purposes of determining whether all the Secured Liabilities have been irrevocably paid.

### **23.3 No Release**

Any receipt, release or discharge of the Security provided by, or of any liability arising under, this Deed shall not release or discharge the Chargor from any liability to the Offshore Security Agent for the same or any other moneys which may exist independently of this Deed.

### **23.4 Security Independent**

Where the Security given to the Offshore Security Agent by or pursuant to this Deed initially takes effect as a collateral or further Security then notwithstanding any receipt, release or discharge indorsed or given in respect of or under the principal Security to which this Deed operates as a collateral or further Security, the Security provided by or pursuant to this Deed shall in respect of the Secured Liabilities be an independent Security.

## **24. EXPENSES, STAMP DUTY AND INTEREST**

### **24.1 Transaction expenses**

The Chargor shall promptly on demand pay the Offshore Security Agent the amount of all costs, losses, liabilities, internal management time fees and expenses (including legal fees) properly incurred by any Secured Party or any Delegate in connection with the negotiation, preparation, printing and execution of:

- (a) this Deed and any other documents referred to in this Deed; and
- (b) any other Finance Document executed after the date of this Deed.

### **24.2 Amendment costs**

If the Chargor requests an amendment, waiver or consent, the Chargor shall, within three (3) Business Days of demand, reimburse the Offshore Security Agent for the amount of all costs, losses, liabilities and expenses (including legal fees) properly incurred by the Offshore Security Agent in responding to, evaluating, negotiating or complying with that request.

### **24.3 Enforcement costs**

The Chargor shall, on demand, pay to the Offshore Security Agent the amount of all costs, losses, liabilities, internal management time fees and expenses (including legal fees) incurred by any Secured Party, any Receiver or any Delegate in connection with the enforcement of, or the preservation of any rights under, any Finance Document and/or any other document referred to in this Deed. Any third party referred to in this Clause 24 (*Expenses, Stamp Duty and Interest*) may enjoy the benefit or enforce the terms of this Clause in accordance with the provisions of the Contracts (Rights of Third Parties) Act, Chapter 53B of Singapore.

### **24.4 Stamp taxes**

The Chargor shall pay on demand and shall indemnify each Secured Party against any cost, loss, liability or expense that such Secured Party incurs in relation to all stamp duty, registration and other similar Taxes payable in respect of any Finance Document.

### **24.5 Goods and Services Tax**

- (a) The Chargor shall pay to each Secured Party on demand, in addition to any amount payable by the Chargor under this Deed, any goods and services, value added or similar Tax payable in respect of that amount (and references in this Deed to that

amount shall be deemed to include any such Taxes payable in addition to it).

- (b) The Secured Party making, or intending to make, a claim under paragraph (a) above shall, together with such claim, deliver to the Chargor an original tax invoice issued pursuant to the Goods and Services Tax Act, Chapter 117A of Singapore.

#### **24.6 Stamp and goods and services tax**

Clause 24.4 (*Stamp taxes*) and Clause 24.5 (*Goods and services tax*) of this Deed (with any necessary consequential amendments) shall apply also to any amount payable under this Deed to any Delegate.

#### **24.7 Default interest**

If the Chargor fails to pay any amount payable by it under this Deed on its due date, interest shall accrue on the overdue amount from the due date up to the date of actual payment (both before and after judgment), without the necessity for any demand being made therefore, at the rate determined in accordance with, and otherwise in the manner set out in, clause 10.3 (*Default Interest*) of the Facilities Agreement, and any interest accruing under this Clause shall be immediately payable by the Chargor on demand by the Offshore Security Agent.

### **25. PAYMENTS**

#### **25.1 Demands**

Any demand for payment made by any Secured Party shall be valid and effective even if it contains no statement of the relevant Secured Liabilities or an inaccurate or incomplete statement of them.

#### **25.2 Payments**

All payments by the Chargor under this Deed (including damages for its breach) shall be made in Dollars and to such account, with such financial institution and in such other manner as the Offshore Security Agent may direct.

#### **25.3 Continuation of accounts**

At any time after:

- (a) the receipt by any Secured Party of notice (either actual or otherwise) of any subsequent Security affecting the Charged Assets of the Chargor;
- (b) the presentation of a petition or the passing of a resolution in relation to the winding-up, dissolution, administration, judicial management or re-organisation of the Chargor; or
- (c) this Deed ceasing for any reason to be binding on the Chargor,

any Secured Party may open a new account in the name of the Chargor with that Secured Party (whether or not it permits any existing account to continue). If that Secured Party does not open such a new account, it shall, unless the Secured Party gives express notice in writing to the Offshore Security Agent to the contrary, nevertheless be treated as if it had done so when the relevant event occurred. No moneys paid into any account, whether new or continuing, after that event shall discharge or reduce the amount recoverable pursuant to any Finance Document to which the Chargor is party.

### **26. MISCELLANEOUS INDEMNITIES**

#### **26.1 Currency indemnity**

- (a) If any sum due from the Chargor under this Deed (a Sum), or any order, judgment

or award given or made in relation to a Sum, has to be converted from the currency (the First Currency) in which that Sum is payable into another currency (the Second Currency) whether for the purpose or as a result of:

- (i) making or filing a claim or proof against the Chargor;
- (ii) obtaining or enforcing an order, judgment or award in relation to any litigation or arbitration proceedings; or
- (iii) otherwise,

it will only constitute a discharge to the Chargor to the extent of the First Currency amount which the Offshore Security Agent is able to purchase with the Second Currency so received or recovered on the date of that receipt or recovery (or, if it is not practicable to make that purchase on that date, on the first date on which it is practicable to do so).

- (b) The Chargor shall as an independent obligation, within three (3) Business Days of demand, indemnify the Offshore Security Agent against any cost, loss or liability arising out of or as a result of the conversion including any discrepancy between (A) the rate of exchange used to convert that Sum from the First Currency into the Second Currency and (B) the rate or rates of exchange available to the Offshore Security Agent at the time of its receipt of that Sum.
- (c) The Chargor waives any right it may have in any jurisdiction to pay any amount under the Finance Documents in a currency or currency unit other than that in which it is expressed to be payable.

## **26.2 Tax Indemnity**

The Chargor shall indemnify the Offshore Security Agent (and as a separate covenant any Receiver or Receivers appointed by it) against all existing and future rents, taxes, duties, fees, renewal fees, charges, assessments, impositions and outgoings whatsoever (whether imposed by deed or statute or otherwise and whether in the nature of capital or revenue and even though of a wholly novel character) which now or at any time during the continuance of the Security constituted by or pursuant to this Deed are payable in respect of the Charged Assets or any part thereof or by the owner or occupier thereof. If any such sums as are referred to in this Clause 26.2 (*Tax Indemnity*) shall be paid by the Offshore Security Agent (or any such Receiver or Receivers), the same shall be repaid by the Chargor on demand with interest at the rate specified in Clause 24.7 (*Default Interest*) from the time or respective times of the same having been paid to the date of reimbursement.

## **26.3 Indemnities separate**

Each indemnity in this Deed shall:

- (a) constitute a separate and independent obligation from the other obligations in that or any other Finance Document;
- (b) give rise to a separate and independent cause of action;
- (c) apply irrespective of any indulgence granted by any Secured Party;
- (d) continue in full force and effect despite any judgment, order, claim or proof for a liquidated amount in respect of any part of the Secured Liabilities or any other judgment or order; and
- (e) apply whether or not any claim under it relates to any matter disclosed by the Chargor or otherwise known to any Secured Party.

## **26.4 Other Indemnities**

- (a) The Offshore Security Agent and each of the other Secured Parties shall be indemnified by the Chargor within three (3) Business Days of demand, from and

against all actions, losses, claims, proceedings, costs, demands and liabilities which may be suffered by the Offshore Security Agent and such Secured Party by reason of any failure of the Chargor to perform any of its obligations in respect of or in connection with this Deed or by virtue of any Assigned Contract or Insurance or in the execution or purported execution (or the failure to do so) of any of the rights, powers, remedies, authorities or discretions vested in the Offshore Security Agent under or pursuant to this Deed.

- (b) If the Offshore Security Agent sees fit to implement its rights under this Deed or if the Offshore Security Agent makes any payment under or in connection with any Charged Assets all moneys so expended by the Offshore Security Agent for the purposes aforesaid shall on demand be repaid by the Chargor to the Offshore Security Agent together with interest thereon calculated day by day for the period beginning from the date such moneys were expended until full payment (whether before or after judgment) at the rate determined in accordance with, and otherwise in the manner set out in, clause 10.3 (*Default Interest*) of the Facilities Agreement, and any interest accruing under this Clause shall be immediately payable by the Chargor on demand by the Offshore Security Agent.

## **27. RIGHTS, WAIVERS AND DETERMINATIONS**

### **27.1 Ambiguity**

The powers and protections conferred by this Deed in relation to the Charged Assets or any part thereof on the Offshore Security Agent shall be in addition to and not in substitution for the powers and protections conferred on mortgagees or chargees under the Acts, which shall apply to the Charges except insofar as they are expressly or impliedly excluded. Where there is any ambiguity or conflict between the rights or powers conferred by law or contained in either of the Acts and those conferred by or pursuant to any Finance Document or where the powers or protections in any Finance Document are more extensive or less restrictive than those provided by either of the Acts or other applicable law, the terms of that Finance Document shall prevail.

### **27.2 Remedies and waivers**

No failure to exercise, nor any delay in exercising, on the part of any Secured Party, Receiver or Delegate, any right or remedy under this Deed shall operate as a waiver, nor shall any single or partial exercise of any right or remedy prevent any further or other exercise or the exercise of any other right or remedy. The rights and remedies provided in this Deed are cumulative and not exclusive of any rights or remedies provided by law.

### **27.3 Amendments and waivers**

- (a) Any term of this Deed may be amended or waived only with the prior consent of the Parties and any such amendment or waiver will be binding on all parties but:
- (i) an amendment, supplement or waiver which puts one or more Secured Parties in a better or worse position than one or more other Secured Parties or changes or relates to the rate or dates of payment of interest or currency of any payment shall require the agreement of all the Secured Parties and (in the case of an amendment or supplement) the Chargor also; and
  - (ii) an amendment, supplement or waiver which changes or relates to the rights and/or obligations of the Offshore Security Agent shall require its agreement also.
- (b) Any consent by the Offshore Security Agent under any provision of this Deed must also be in writing. Any such waiver or consent may be given subject to any conditions thought fit by the person giving it and shall be effective only in the instance and for the purpose for

which it is given.

#### **27.4 Determinations**

Any certification or determination by Offshore Security Agent or any Receiver or Delegate under this Deed is, in the absence of manifest, clerical or computation error (whether or not appearing on the face of such certificate or determination), conclusive evidence of the matters to which it relates.

#### **28. PARTIAL INVALIDITY**

If, at any time, any provision of this Deed is or becomes illegal, invalid or unenforceable in any respect under any law of any applicable jurisdiction, neither the legality, validity or enforceability of the remaining provisions nor the legality, validity or enforceability of such provision under the law of any other jurisdiction will in any way be affected or impaired but this Deed shall be construed as if such invalid or illegal or unenforceable provision had never been contained herein.

#### **29. BENEFIT OF ASSIGNMENT**

##### **29.1 Benefit and Burden**

This Deed shall be binding upon and enure to the benefit of each Party to this Deed and its successors and permitted assignees.

##### **29.2 The Chargor**

The Chargor may not assign or transfer all or any of its rights, benefits and obligations under this Deed.

##### **29.3 The Secured Parties**

- (a) Each Secured Party may at any time freely assign or novate any of its rights and obligations under this Deed to any bank or financial institution or to a trust, fund or other entity which is regularly engaged in or established for the purpose of making, purchasing or investing in loans, securities or other financial assets (each a permitted assignee). Any such assignee or transferee shall be and be treated as a party for all purposes of this Deed and shall be entitled to the full benefit of this Deed to the same extent as if it were an original party in respect of the rights or obligations assigned or transferred to it.
- (b) The consent of the Chargor is not required for any assignment or novation to any permitted assignee by a Secured Party of any of its rights and obligations under this Deed, provided that the Secured Party (through the Offshore Security Agent) shall, as soon as reasonably practicable, notify the Chargor of such assignment or novation upon its completion.

#### **30. NOTICES**

- 2.2 The Company assigns and agrees to assign, absolutely as legal and beneficial owner with first ranking priority to the Security Agent all of its rights, claims, title and interest from time to time in and to the Custodian Agreement and all Related Rights in respect thereof as a continuing Security for the payment and discharge of all the Secured Liabilities.
- 2.3 The Company charges, as legal and beneficial owner and by way of first floating charge in favour of the Security Agent, all of its rights, claims, title and interest from time to time in and to the Deposits and the Custodian Agreement and all Related Rights in respect thereof as a continuing Security for the payment and discharge of all the Secured Liabilities, to the extent not for the time being the subject of the assignment in Clause 2.2 above.
- 2.4 For the avoidance of doubt, this Deed does not purport to create any Security over or in respect of the Head Custodian Account or any moneys standing to the credit thereof (other than the Deposits).

### 3. **NOTICES OF ASSIGNMENT AND PERFECTION**

Notice and acknowledgment of the Security created under this Deed is given by the Company and the Custodian pursuant to clause 3 (*Notice and Acknowledgment*) of the Custodian Agreement.

### 4. **CUSTODIAN ACCOUNT**

- 4.1 The Company shall not be entitled to receive, withdraw or otherwise transfer any amount standing to the credit of the Custodian Account except in accordance with the Custodian Agreement.
- 4.2 The Company shall not, without the Security Agent's prior written consent, permit or agree to any variation of the rights attaching to the Custodian Account and/or the Deposits (including any variation to the terms of the Custodian Agreement).

### 5. **FLOATING CHARGE**

- 5.1 Any Security in respect of the Assigned Property created by the Company after the date of this Deed (except in favour of the Security Agent) shall be expressed to be subject to this Deed and shall rank in order of priority behind the charges created by this Deed.

#### 5.2 Conversion – by notice:

5.2.1 The Security Agent may at any time, by notice in writing to the Company, convert any floating charge created by it pursuant to this Deed into a fixed charge as regards any Assigned Property specified in that notice if:

- (a) an Event of Default has occurred and is continuing;
- (b) any person resolves or threatens to take or takes any step to effect any seizure, sale, distress, attachment, execution or other legal process against such Assigned Property; or
- (c) the Company resolves or threatens to take or takes any step in breach of its obligations under Clause 7 (*Company's Undertakings*),

and upon issue of such notice by the Security Agent to the Company in respect of any Assigned Property of the Company, the floating charge over that Assigned Property shall immediately crystallise and become a fixed charge.

5.2.2 Any notice given by, or on behalf of, the Security Agent under sub-clause 5.2.1 above in relation to any Assigned Property of the Company will not be construed as a waiver or abandonment of the Security Agent's rights to give any other notice in respect of any other

Assigned Property or of any other right of any other Secured Party under this Deed or any other Finance Document.

5.2.3 For the avoidance of doubt, if for any reason any security constituted by this Deed in respect of any asset created or purported to be created pursuant to Clause 2 (*Assignment and Charge*) as an assignment does not, or ceases to, take effect as an assignment, then it shall take effect as a first floating charge in respect of that asset. However, it is the intent of the parties that the security constituted by this Deed over all other Assigned Property shall remain unaffected.

### 5.3 Conversion – automatic

Notwithstanding the provisions of Clause 5.2 (*Conversion – by notice*) and without prejudice to any law which may have a similar effect, any floating charge created by this Deed will automatically be converted (without notice) with immediate effect into a fixed charge as regards all the assets subject to that floating charge if:

5.3.1 the Company creates or attempts to create any Security (other than any Security permitted pursuant to the Facility Agreement) over any of the Assigned Property; or

5.3.2 any person levies or attempts to levy any distress, execution or other process against any of the Assigned Property; or

5.3.4 a meeting is convened for the passing of a resolution for the voluntary winding-up of the Company; or

5.3.5 an application is presented or made for a warrant of execution, writ of fieri facias, garnishee order or charging order in respect of any of the assets of the Company; or

5.3.6 a resolution is passed or an order is made for the winding-up, dissolution or re-organisation of the Company or any provisional liquidator or liquidator is appointed to or in respect of the Company; or

5.3.7 any event occurs under the laws of any jurisdiction having a similar or analogous effect to any of those events referred to in sub-clause 5.3.2 to 5.3.3 (inclusive) above.

### 5.4 Reconversion

Any charge which has crystallised under Clause 5.2 (*Conversion – by notice*) or Clause 5.3 (*Conversion – automatic*) may, by notice in writing given at any time by the Security Agent to the Company, be reconverted into a floating charge in relation to the assets specified in such notice.

- (b) following any failure by the Company to comply with any of its obligations under this Deed,

save that if the exercise of such powers is for the purpose of preserving the validity or enforceability of, or the priority of the security created under, this Deed then such powers conferred on the Security Agent or any Receiver pursuant to this Clause 9 shall be exercisable by the Security Agent or any Receiver at any time.

- 9.2 The Company shall ratify and confirm all lawful things done and all documents executed by the Security Agent or any Receiver appointed hereunder in the exercise or purported exercise of that power of attorney.

## 10. **ENFORCEMENT**

- 10.1 If an Event of Default occurs and whilst it is continuing, the Security constituted by this Deed is immediately enforceable, and the Security Agent shall be entitled, without prior notice to the Company or prior authorisation from any court, immediately and in its absolute discretion (without limiting any of the powers conferred on the Security Agent by this Clause 10):

12.5 In addition to and without prejudice to the generality of the foregoing, every Receiver appointed hereunder shall (subject to any limitations or restrictions expressed in the instrument appointing him but notwithstanding any winding-up, liquidation, judicial management or dissolution of the Company) have the following powers in relation to the Assigned Property (and any assets of the Company which, when got in, would be part of the Assigned Property) in respect of which he was appointed (and every reference in this Clause 12.5 to the "**Assigned Property**" shall be read as a reference to that part of the Assigned Property in respect of which such Receiver was appointed):

**13. EFFECTIVENESS OF SECURITY**

13.1 The security created by this Deed and the Collateral Rights shall be cumulative, in addition to and independent of every other security which the Security Agent or any or all Secured Parties may at any time hold for any or all of the Secured Liabilities or any rights, powers and remedies provided by law. No prior security held by the Security Agent or any or all of the Secured Parties over the whole or any part of the Assigned Property shall merge into the security constituted by this Deed.

13.2 This Deed shall remain in full force and effect as a continuing security for the Secured Liabilities unless and until discharged in accordance with the terms of this Deed. No part of the security from time to time intended to be constituted by this Deed will be considered satisfied or discharged by any intermediate payment, discharge or satisfaction of the whole or any part of the Secured Liabilities.

13.3 No failure on the part of the Security Agent to exercise, or delay on its part in exercising, any Collateral Right shall operate as a waiver, nor shall any single or partial exercise of a Collateral Right prevent any further or other exercise of that or any other Collateral Right.

13.4 If, at any time, any provision of this Deed is or becomes illegal, invalid or unenforceable in any respect under the law of any jurisdiction, the legality, validity or enforceability of (a) the remaining provisions of this Deed and (b) such provision under the law of any other jurisdiction shall not in any way be affected or impaired thereby.

- 13.5 None of the Security Agent, its nominee(s) or any Receiver appointed pursuant to this Deed shall be liable by reason of (a) taking any action permitted by this Deed, (b) any neglect or default in connection with all or any part of the Assigned Property or (c) the taking possession or realisation of all or any part of the Assigned Property, except to the extent directly caused by gross negligence or wilful misconduct upon its part (as finally judicially determined).
- 13.6 Any settlement, discharge or release hereunder in relation to the Company or all or any part of the Assigned Property shall be conditional upon no security or payment by all or any of the Obligors to, or recovery from any or all of the Obligors by, the Security Agent or any or all of the Secured Parties being avoided or reduced by virtue of any bankruptcy, insolvency, liquidation or similar laws of general application or any similar event or for any other reason and shall in those circumstances be void.
- 13.7 The obligations of the Company under this Deed will not be affected by an act, omission, matter or thing which, but for this Clause 13.7, would reduce, release or prejudice any of its obligations under this Deed (without limitation and whether or not known to it, the Security Agent or any Secured Party) including:
- 13.7.1 any time, waiver or consent granted to, or composition with, any Obligor or other person;
  - 13.7.2 the release of any Obligor or any other person under the terms of any composition or arrangement with any creditor of any Obligor;
  - 13.7.3 the taking, variation, compromise, exchange, renewal or release of, or refusal or neglect to perfect, take up or enforce, any rights against, or security over assets of, any Obligor or other person or any non-presentation or non-observance of any formality or other requirement in respect of any instrument or any failure to realise the full value of any security;
  - 13.7.4 any incapacity or lack of power, authority or legal personality of or dissolution or change in the members or status of any Obligor or any other person;
  - 13.7.5 any amendment (however fundamental) or replacement of a Finance Document or any other document or security or of the Secured Liabilities;
  - 13.7.6 any variation of the terms of the trust upon which the Security Agent holds any Security pursuant to a Finance Document;
  - 13.7.7 any unenforceability, illegality or invalidity of any obligation of any person under any Finance Document or any other document or security;
  - 13.7.8 any insolvency or similar proceedings;
  - 13.7.9 any claims or set-off right that the Company may have; or
  - 13.7.10 any law, regulation or decree or order of any jurisdiction affecting any Obligor.
- 13.8 The Company waives any right it may have of first requiring the Security Agent or any Secured Party (or any Agent or agent on its behalf) to proceed against or enforce any other rights or security or claim payment from any person before claiming from the Company under this Deed. This waiver applies irrespective of any law or any provision of this Deed to the contrary.
- 13.9 Until (i) all Secured Liabilities have been irrevocably discharged in full, (ii) all amounts which may be or become payable by any or all of the Obligors under or in connection with the Finance Documents have been irrevocably paid in full and (iii) no Secured Party is under any further obligation (whether actual or contingent) to provide any further advance or financial

accommodation to any Obligor under any Finance Document, the Company will not (unless the Security Agent otherwise directs) exercise any rights which it may have by reason of performance by it of its obligations under this Deed:

- 13.9.1 to be indemnified by any Obligor;

- 21.1 The courts of Singapore have exclusive jurisdiction to settle any dispute (a “**Dispute**”) arising out of, or connected with this Agreement (including a dispute regarding the existence, validity or termination of this Agreement or the consequences of its nullity) and that accordingly any proceedings (referred to in this Clause as “**Proceedings**”) arising out of or in connection with this Agreement may be brought in such courts and the Client irrevocably submits to the jurisdiction of such courts.
- 21.2 This Clause 21 is for the benefit of the Agent, the Security Agent and the Custodian only. As a result, and notwithstanding Clause 21.1 above, nothing herein shall prevent the Agent, the Security Agent or the Custodian from taking Proceedings in any other courts with jurisdiction, and the Client irrevocably submits to the jurisdiction of such courts. To the extent allowed by law the Agent, the Security Agent and the Custodian may take concurrent Proceedings in any number of jurisdictions.
- 21.3 The Client irrevocably consents to the enforcement of any judgment (wherever obtained), including without limitation the execution or attachment of its assets or such other relief as may be available under applicable law.
- 21.4 The Client irrevocably waives any objection which it may at any time have to the laying of the venue of any Proceedings in any court referred to in this Clause 21 and any claim that any such Proceedings have been brought in an inconvenient forum.
- 21.5 The Client waives generally all immunity it or its assets or revenues may otherwise have in any jurisdiction, including immunity in respect of:
- (a) the giving of any relief by way of injunction or order for specific performance or for the recovery of assets or revenues; and/or
  - (b) the issue of any process against its assets or revenues for the enforcement of a judgment or, in an action *in rem*, for the arrest, detention or sale of any of its assets and revenues.

If there are any conflicts between the provisions in the Facilities Agreement in connection therewith and those in this Deed, the provisions in the Facilities Agreement shall prevail (but only to the extent that the validity and enforceability of the rights of the Chargee pursuant to this Deed are not detrimentally affected as a result of such prevalence).

### **8.2 Same Rights as Receiver**

Any rights conferred by this Deed upon a Receiver may be exercised by the Chargee after the Charges become enforceable, whether or not the Chargee shall have taken possession or appointed a Receiver of the Charged Assets.

### **8.3 Delegation**

**APPENDIX 18**  
**INFORMATION MEMORANDUM**

Blue Ocean Resources Pte. Ltd.  
Singapore company registration number 200610255E  
(a private company limited by shares incorporated under the laws of Singapore)

Offer to restructure any and all of the outstanding  
US\$145,750,000 Guaranteed Senior Secured Notes due 2021 (the "**Existing Notes**"), irrevocably and unconditionally guaranteed by PT CENTRAL PROTEINA PRIMA, Tbk. and certain of its subsidiaries (the "**Note Guarantees**"); and (ii) 92,890 Zero Coupon Secured Mandatorily Exchangeable Bonds due 2022 exchangeable for series B ordinary shares of PT Central Proteina Prima, Tbk. (the "**MEBs**" and, together with the Existing Notes, the "**Existing Securities**")

Blue Ocean Resources Pte. Ltd. (the "**Borrower**"), a private company limited by shares incorporated under the laws of the Republic of Singapore, has defaulted on the payment of principal and interest due in respect of its US\$145,750,000 Guaranteed Senior Secured Notes due 2021 (the "**Existing Notes**") under the terms of the Indenture dated July 26, 2018 by and among the Borrower, PT Central Proteina Prima, Tbk., (the "**Company**") and certain of its subsidiaries (as guarantors), Madison Pacific Trust Limited (as Trustee, Registrar, Principal Paying Agent and Offshore Security Agent), Lynchpin Bondholder Management Limited (as Registrar) and PT Bank CIMB Niaga Tbk (as Onshore Security Agent) (the "**Existing Indenture**"), pursuant to which the Existing Notes were constituted.

To effect an arrangement and compromise in respect of the Existing Notes, the Borrower has proposed a scheme of arrangement (the "**Scheme of Arrangement**") under Section 210 of the Companies Act (Chapter 50; 2006 Revised Edition) of the Republic of Singapore (the "**Act**") to the holders of the Existing Notes. In order for the Scheme of Arrangement to become effective (among other things): (i) the Scheme of Arrangement must be approved by a majority in number representing three fourths by value of the holders of the Existing Notes present and voting (in person or by proxy) at the meeting of creditors ("**Scheme Meeting**") convened by the High Court of the Republic of Singapore (the "**Court**") for purposes of considering and, if thought fit, approving, the Scheme of Arrangement; (ii) the Scheme of Arrangement must be sanctioned by the Court; and (iii) an office copy of the Court order sanctioning the Scheme of Arrangement must be delivered to the Accounting and Corporate Regulatory Authority of the Republic of Singapore. If the Scheme of Arrangement becomes effective it will (under the laws of the Republic of Singapore) be binding on all holders of the Existing Notes.

Pursuant to the Scheme of Arrangement, we are planning to restructure the Existing Notes into term loan facilities which shall comprise two facilities – facility A and facility B (the "**Term Loan Facilities**") and restructure the obligations of Azion Bao Pte Ltd in respect of the MEBs (the "**Restructuring**"). Specifically, holders of the Existing Notes will have the option to either: (a) exchange their Existing Notes into commitments under a Facility A loan (the "**Existing Notes Exchange Offer**") or (b) tender their Existing Notes for cash (the "**Existing Notes Tender Offer**"). The Facility A loan will benefit from, among other things, guarantees from the existing guarantors under the Note Guarantees (the "**New Guarantees**") and security over the assets provided as security for the Existing Notes (the "**New Security Package**"). The deadline for acceptance of the Restructuring is 5 p.m. (Singapore time) on the date that is 7 Business Days before the date of the Scheme Meeting (the "**Record Time**"). The Restructuring is subject to, and conditional upon, the Scheme of Arrangement becoming effective.

In the event that the Scheme of Arrangement becomes effective, all holders of the Existing Notes will (under the laws of the Republic of Singapore) be bound by the terms of the Scheme of Arrangement. Accordingly, if the Scheme of Arrangement becomes effective, any holder of the Existing Notes that does not participate in the Restructuring will nevertheless be bound by the terms of the Scheme of Arrangement on and from the date on which the Scheme of Arrangement becomes effective.

**THE RESTRUCTURING INVOLVES A HIGH DEGREE OF RISK. SEE “RISK FACTORS” BEGINNING ON PAGE 17 OF THIS INFORMATION MEMORANDUM FOR A DISCUSSION OF RISKS THAT YOU SHOULD CONSIDER PRIOR TO GIVING YOUR CONSENT.**

The Existing Securities were not registered under the U.S. Securities Act of 1933, as amended (the “**Securities Act**”), or any state or other securities laws of any state of the United States or any other jurisdiction. ## **PRESENTATION OF FINANCIAL AND OTHER DATA**

### **Financial Data**

Our audited consolidated financial statements as of and for the years ended December 31, 2018 and 2019 and for the ten months ended October 31, 2020 were prepared in accordance with Indonesian Financial Accounting Standards (“FAS”), which comprise the Statements and Interpretations issued by the Financial Accounting Standards Board of the Indonesian Institute of Accountants (“DSAK”) and the Regulations and Guidelines on Financial Statement Presentation and Disclosures issued by the Financial Services Authority (“OJK”).

The financial information set forth in this Information Memorandum presents (a) our consolidated statements of profit or loss and other comprehensive income for the financial years ended December 31, 2018 and 2019 and for the

ten months ended October 31, 2020 (audited), (b) our consolidated statements of financial position as at December 31, 2018 and 2019 for the ten months ended October 31, 2020 (audited), and (c) consolidated statements of cash flows for the years ended December 31, 2018 and 2019 for the ten months ended October 31, 2020 (audited), all of which are derived solely from the consolidated financial statements included elsewhere in this Information Memorandum.

Our financial statements for the years ended December 31, 2018 and 2019 and for the ten months ended October 31, 2020 were audited by Purwanto, Sungkoro and Surja.

We provided the management accounts for the ten months ended October 31 2019 and for the year ended December 31, 2020.

We maintain our accounts in Rupiah. Solely for convenience, certain Rupiah amounts have been translated into US dollars at specified rates. US dollar equivalent information for amounts in Rupiah is based on the middle exchange rate quoted by Bank Indonesia (the “**Indonesia Central Bank Rate**”). Unless otherwise indicated, US dollar equivalent information for amounts in Rupiah is based on the Indonesia Central Bank Rate (i) as of December 31, 2018, which was Rp14,481 = US\$1.00, (ii) as of December 31, 2019, which was Rp13,901 = US\$1.00, (iii) as of October 31, 2020, which was Rp14,690 = US\$1.00 and (iv) as of December 31, 2020, which was Rp14,105 = US\$1.00. The Federal Reserve Bank of New York does not certify for customs purposes a noon buying rate for cable transfers in Rupiah. No representation is made that the Rupiah or US dollar amounts shown herein could have been or could be converted into US dollars or Rupiah, as the case may be, at any particular rate or at all. See “Exchange Rate Information and Exchange Control Information” for further information regarding rates of exchange between Rupiah and US dollars.

Some of the financial information in this Information Memorandum has been rounded for convenience and, as a result, the totals of the data presented in this Information Memorandum may vary slightly from the actual arithmetic totals of such information.

### **Non-GAAP Financial Measures**

EBITDA refers to income (loss) from operations before depreciation and amortisation. EBITDA and related ratios presented in this Information Memorandum are supplemental measures of our performance and liquidity that are not required by, or presented in accordance with, Indonesian FAS. Furthermore, EBITDA and related ratios are not measurements of our financial performance or liquidity under Indonesian FAS and should not be considered as an alternative to net income, operating income or any other performance measures derived in accordance with Indonesian FAS or as an alternative to cash flow from operation or as a measure of our liquidity.

We believe EBITDA and related ratios facilitate operating performance comparisons from period to period and from company to company by eliminating potential differences caused by variations in capital structures (affecting interest expense), tax positions (such as the impact on periods or companies of changes in effective tax rates or net operating losses) and the age and book depreciation of tangible assets (affecting relative depreciation expense). We also believe that EBITDA is a supplemental measure of our ability to meet debt service requirements. Finally, we present EBITDA and related ratios because we believe these measures are frequently used by securities analysts and investors in evaluating similar issuers.

### **Industry Data**

Market data and certain industry forecasts used throughout the Information Memorandum were obtained from market research, publicly available information and industry publications including publications from Food and Agricultural Organization (FAO) of the United Nations, Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES), California Environmental Associates (CEA), Urner Barry Publications Inc., GOAL, EUStat, ITC, TradeMap and NOAA. Industry publications generally state that the information that they contain has been obtained from sources believed to be reliable but there can be no assurance as to the accuracy and completeness of that information. Similarly, industry forecasts and market research, while believed to be reliable, have not been independently verified and the Company makes no representation as to the accuracy or completeness of this information.

## ENFORCEABILITY OF CIVIL LIABILITIES, TERM LOAN FACILITIES AND NEW SECURITY PACKAGE

### Enforceability of Civil Liabilities

The Company and PT Centralpertiwi Bahari (“CPB”), PT Centralwindu Sejati (“CWS”), PT Marindolab Pratama (“MLP”) and PT Central Panganpertiwi (“CPgP”) (collectively, the “Subsidiary Guarantors” and, together with the Company, the “Guarantors”) are incorporated in Indonesia. Substantially all of the commissioners and directors of the Company and such Subsidiary Guarantors reside in Indonesia, and substantially all of such entities’ assets are located in Indonesia. As a result, it may not be possible for lenders under the Term Loan Facilities to effect service of process, including judgments, upon the Company, such Subsidiary Guarantor or such persons outside of Indonesia, or to enforce against the Company, such Subsidiary Guarantor or such persons in courts outside of Indonesia judgments obtained in courts outside Indonesia.

We have been advised by our Indonesian legal counsel that judgments of courts outside of Indonesia, are not enforceable in Indonesian courts, although such judgments could be admissible as non-conclusive evidence in a proceeding on the underlying claim in an Indonesian court. Re-examination of the merits of the underlying claim de novo would be required before the Indonesian court.

The Borrower is a private company with limited liability incorporated under the laws of Singapore. As a result, it may be difficult for lenders under the Term Loan Facilities to enforce against the Borrower judgments obtained in non-Singaporean courts. All of the Borrower’s directors and executive officers (and other persons named in this Information Memorandum) reside in Singapore, and all or a substantial portion of the assets of the Borrower and such persons are located in Singapore. As a result, it may not be possible for holders of the Term Loan Facilities to effect service of process, including judgments, upon the Borrower or such persons outside of Singapore, or to enforce against the Borrower or such persons in courts outside of Singapore. However, a foreign judgment may be enforced by a common law action in Singapore if: (a) the foreign judgment is a judgment *in personam* from a court of a foreign country on a matter of substance which is final and conclusive in light of the laws of that country; (b) the foreign court has international jurisdiction over the party sought to be bound by the judgment; (c) the foreign judgment binds that party to obey that judgment; and (d) the foreign judgment is for a fixed or ascertainable sum of money. A foreign judgment which has satisfied the above conditions is generally regarded as final and conclusive on the merits of the case under Singapore law. The Singapore courts will therefore, in principle, enforce that judgment without re-examining the merits of the case. A number of defenses may be raised against the recognition or enforcement of foreign judgments in Singapore. For example, the Singapore courts will not recognise or enforce a foreign judgment if that judgment is inconsistent with a prior local judgment, contravenes public policy or amounts to the direct or indirect enforcement of a foreign penal, revenue or other public law.

The agreements entered into with respect to the Term Loan Facilities are governed by the laws of Singapore.

Indonesia and Singapore do not have a treaty providing for the reciprocal recognition and enforcement of judgments (other than arbitral awards) in civil and commercial matters. Accordingly, a final judgment for the payment of money rendered by the Indonesian courts based on civil liability would not automatically be enforceable in Singapore and the party in whose favor that judgment was given would have to enforce such judgment by way of a common law action in Singapore. The Singapore Court is likely to enforce such judgment if the requisite conditions, as set out above, are satisfied. Exceptions to the enforcement of a foreign judgment include the following: (a) such judgment was procured by fraud; (b) the enforcement of such judgment would contravene public policy; and (c) the proceedings in which such judgment was obtained were contrary to natural justice. It is unclear whether the Singapore courts would impose civil liability on the Borrower, its managing directors or controlling persons and/or the experts named herein in an original action predicated solely upon the federal or state securities laws of Indonesia brought in Singapore. It is also unclear whether the Singapore courts will enforce a judgment predicated solely upon such laws, although such a judgment is in principle enforceable. Purchasers may also have difficulties enforcing, by way of original actions brought in jurisdictions outside Indonesia, liabilities under Indonesian securities laws.

## **Enforcement of the Term Loan Facilities and New Security Package**

Pursuant to Presidential Decree No. 59/1972 dated October 12, 1972, as amended, the Company is required to report details regarding its offshore borrowings to the Ministry of Finance of Indonesia and Bank Indonesia, on the acceptance, implementation, and repayment of principal and interest. Ministry of Finance Decree No. KEP-261/MK/IV/5/73 dated May 3, 1973, as amended, as the implementing regulation of Presidential Decree No. 59/1972, further sets forth the requirements to submit periodic reports regarding offshore borrowings to the Department of Finance of Indonesia and Bank Indonesia on the effective date of the contract and each subsequent three month period. Further, pursuant to Presidential Decree No. 39/1991, all offshore commercial borrowers must submit periodic reports to the Team of Offshore Commercial Borrowing on the implementation of their offshore commercial borrowings. Presidential Decree No. 39/1991 does not stipulate the time or the format and the content of the periodic reports that must be submitted. The Company will undertake in the Term Loan Facilities to comply with such requirements. The Company has been advised by its Indonesian counsel that any failure to submit the required reports will subject the Company to certain administrative sanctions in the form of fines, but should not invalidate the obligations of the Company under the loan agreement between the Borrower and the Company or the Subsidiary Guarantors in respect of the Term Loan Facilities. However, the outcome of specific cases in the Indonesian legal system is subject to considerable discretion and uncertainty.

Under the Indonesian Civil Code, a guarantor may waive its right to require the obligee to exhaust its legal remedies against the obligor's assets on a guaranteed obligation prior to the obligee exercising its right under the related guarantee and the waiver is enforceable against the guarantor. The New Guarantees contain a waiver of this right. The Company has been advised by its Indonesian counsel that such a waiver is enforceable under Indonesian law, but that, due to the uncertainty of the outcome of specific legal cases in Indonesia, there is no assurance that in the future Indonesian courts will not impose an obligation on lenders under the Term Loan Facilities to pursue all legal remedies against the Borrower if it were to default on its obligation before such lenders can exercise their rights under the New Guarantees, notwithstanding that the Guarantors have expressly waived their rights under the Note Guarantees, see "Risk Factors—Risks Relating to the Term Loan Facilities. Indonesian companies have filed suits in Indonesian courts to invalidate transactions with structures similar to the Term Loan Facilities and the New Guarantees and have successfully brought legal action against lenders and other transaction participants. Such legal action has resulted in judgments invalidating all obligations under the applicable debt instruments and allowing affirmative recoveries from the lenders in excess of the amounts borrowed" and "Risk Factors—Risks Relating to the Term Loan Facilities. Through the participation in the Term Loan Facilities, lender under the Term Loan Facilities may be exposed to a legal system subject to considerable discretion and uncertainty; it may be difficult or impossible for the lenders under the Term Loan Facilities to pursue claims under the Term Loan Facilities or the New Guarantees."

## **Language of the Finance Documents**

Pursuant to Law No. 24 of 2009 on National Flag, Language, Emblem, and Anthem which was enacted on July 9, 2009 ("**Law No. 24/2009**"), and as clarified by a Letter of Minister of Law and Human Rights No. M.HH.UM.01.01-35 dated December 29, 2009, agreements to which Indonesian entities are a party are required to be executed in the Indonesian language (*Bahasa Indonesia*), although, when a foreign entity is a party, an execution of the document also in English or the national language of the relevant foreign entity is permitted. On 30 September 2019, the President of Republic Indonesia issued Presidential Regulation No. 63 of 2019 on the Use of Indonesian Language ("**PR No. 63/2019**") as the implementing regulation of Law No. 24/2009. PR No. 63/2019 which confirms that any transaction document entered into by an Indonesian party and a foreign party must be made in a bilingual format (or any other format the parties choose so long as there is a corresponding version in the Indonesian language). This is to ensure the common understanding of the parties to the agreement.

The stipulation on the use of English language and/or any other foreign language, as well as the ability to choose the governing language, applies only when there is a foreign party involved in the agreement. As PR No. 63/2019 does not define what a "foreign party" is and the extent of its involvement it may have, there is still substantial uncertainty regarding how Law No. 24/2009 and PR No. 63/2019 will be interpreted and applied, and it is not certain that an Indonesian court would permit the English version of an agreement to prevail or even consider the English version. In addition, the Indonesian court will request all English agreements or documents be translated into Indonesian language by a sworn translator. See "Risk Factors—Risks Relating to Indonesia". The Term Loan Facility Agreement to be entered into in connection with the Term Loan Facilities Agreement will also be prepared in the

Indonesian language. However, there can be no assurance that, in the event of inconsistencies between the Indonesian language and English language versions of those documents, an Indonesian court would hold that the English versions of such documents will prevail.

We will execute bilingual English and Indonesian language versions of the Term Loan Facilities, and the charge to be granted by the Company over the Borrower's shares (the "**Borrower Share Charge**"). The translated documents will provide that in the event of discrepancies or inconsistencies, the parties thereto intend the English version to prevail. Some concepts in English may not have a corresponding term in Indonesian language and the exact meaning of the English text may not be fully captured by the Indonesian language version. If this occurs, there can be no assurance that the terms of the Term Loan Facilities and the Borrower Share Charge will be as described in the Information Memorandum, or will be interpreted and enforced by the Indonesian courts as intended.

### **Our Company**

#### *Introduction*

We are Indonesia's largest producer of aquaculture products which includes fish feed, shrimp feed, shrimp fry and seafood-based products. We produce more than 600,000 Mt of feeds annually and sell them to consumers across Indonesia. We purchase harvested shrimp and fish from the farmers, process them into various food products and sell them to domestic and export markets. All of our operations and assets are located in Indonesia.

In 2020, our total net sales were Rp7,576.2 billion (US\$537.2 million) and our gross profit was Rp1,349.9 billion (US\$95.6 million), consist of:

- (i) Feeds: net sales of Rp5,972.1 billion (US\$423.4 million) and gross profit of Rp1,116.1 billion (US\$79.1 million)
- (ii) Food products: net sales of Rp1,298.6 billion (US\$92.1 million) and gross profit of Rp152.9 billion (US\$10.8 million) and
- (iii) Others: net sales of Rp305.5 billion (US\$21.7 million) and gross profit of Rp80.9 billion (US\$5.7 million).

In 2020, our EBITDA was Rp802.4 billion (US\$56.9 million) and our total comprehensive income for the year was Rp343.8 billion (US\$24.4 million).

The Company has undergone major business transformation and currently adopts a free market model. Specifically, since the termination of its plasma arrangements, our Company's overall operations have become less impacted by virus outbreaks as cultivation risk is now borne by the farmers themselves. Where there is a shortage in the supply of raw materials from the shrimp farmers, our Company is also able to freely source such materials from other parties for the purposes of meeting its frozen shrimp export obligations, hence reducing the Company's reliance on the former plasma farmers.

After such business transformation, feed business has become the most dominant business segment of the Company, representing almost 80% of the Company's total net sales. In addition, the potential of the feed segment is bolstered by significant growth of the pet food business in which the Company holds a sizeable market share in the industry.

### ***Strengths***

- Our strong customer base
- Our ability to comply with strict international manufacturing, social and environmental standards

- Increase sale of pet foods by increasing product variety as well as growing our market share.

## New Security

The Facility A Loan will benefit from security over the assets which shall consist of:

- (1) a first priority fixed and floating charge over all of the assets of the Borrower, including (but not limited to) all of the Borrower's rights under certain advance purchase agreements entered into by the Borrower with our Company and certain of the Subsidiary Guarantors, including, without limitation, any claims which the Borrower has or will have against any Guarantor (the "**New Debenture**"),

All payments made by the Borrower or any Guarantor (each, a "**Payor**") under, or with respect to, the Term Loan Facilities will be made free and clear of, and without withholding or deduction for, or on account of any present or future tax, duty, levy, impost, assessment or other governmental charge (including penalties, interest and other liabilities related thereto) (collectively, "**Taxes**") imposed, levied, collected or assessed by the Republic of Singapore unless the Payor is required to withhold or deduct such Taxes by law or by the official interpretation or administration thereof.

If the Payor is required to withhold or deduct any amount for or on account of Taxes imposed or levied by the Republic of Singapore from any payment made under or with respect to the Term Loan Facilities, the Payor will pay an additional amount equivalent to up to a maximum of 1.08696 multiplied by the amount due if no Taxes had been imposed or levied, subject to that lender providing to the Borrower reasonable evidence to demonstrate that during the relevant tax year it was not tax resident in Singapore (such as by way of example only, a certificate of tax residence issued by a foreign tax authority) (the "**Additional Amounts**").

The Borrower shall at any time be entitled to assume that a Lender is not a tax resident of Singapore unless the Borrower is

provided with evidence by such Lender as to where it is tax resident at that time. For the avoidance of doubt, if a payment is due from a Borrower to a Lender, the Borrower is not required to gross up the amount of that payment if that Lender has not, by the date falling 10 Business Days prior to such payment being due and payable, provided any evidence to the Borrower as to where it is tax resident for the year in which that payment is to be made.

Change of Control

There will be no prepayment interest applicable to voluntary prepayments made on and from 30 June 2022.

For the avoidance of doubt, no penalty or fees will be payable upon any mandatory prepayment of the Loans or any repayment of the Facility A Loans in accordance with the Cash Sweep.

If Events of Default have occurred and are continuing, the 30% should also be applied in payment of the Repayment Instalments in respect of the Facility A Loans falling due after that date but prior to the Termination Date (in inverse chronological order).

For the avoidance of doubt, any interest, Repayment Instalments or repayments due in respect of the Facility A Loan shall be payable on the terms set out below regardless of whether there is sufficient cash available to satisfy all limbs of the Cash Sweep.

Unless otherwise indicated, US dollar equivalent information for amounts in Rupiah is based on the Indonesia Central Bank Rate (i) as of December 31, 2018, which was Rp14,481 = US\$1.00, (ii) as of December 31, 2019, which was Rp13,901 = US\$1.00, (iii) as of December 31, 2020, which was Rp14,105 = US\$1.00, (iv) as of October 31, 2019 which was Rp14,008 = US\$1.00, (v) as of October 31, 2020, which was Rp14,690 = US\$1.00.
- (2) EBITDA refers to gross profit less selling expenses and general and administrative expenses, added with depreciation and amortization. EBITDA and the related ratios in this Information Memorandum are supplemental measures of our performance and liquidity and are not required by, or presented in accordance with, Indonesian FAS or US GAAP. Furthermore, EBITDA is not a measure of our financial performance or liquidity under Indonesian FAS or US GAAP and should not be considered as alternatives to net income, operating income or any other performance measures derived in accordance with Indonesian FAS or US GAAP or as alternatives to cash flow from operating activities or as measures of our liquidity. In 2020, we implemented new accounting standard, PSAK 73 (leases), which changes the recognition of financial leases that previously classified as operating lease, hence impacted to the additional of depreciation.
- (3) EBITDA margin represents EBITDA as a percentage of net sales.
- (4) Net Interest Expense is calculated as financing cost less interest income.
- (5) Net Debt is calculated as long term debt plus current portion of long-term bank loans and short-term bank loans and bonds payable less cash and cash equivalents

## RISK FACTORS

*Potential parties to the Term Loan Facilities are urged to consider carefully the following specific considerations as well as the other material contained in this Information Memorandum before deciding whether or not to accept the Existing Notes Tender Offer.*

*Participation in the Term Loan Facilities involve risks. Parties to the Term Loan Facilities should carefully evaluate each of the following risk factors (which are not intended to be exhaustive) and all of the other information set forth in this Information Memorandum before deciding whether or not to accept the Existing Notes Tender Offer. Some of the following risk factors relate principally to the industry in which we operate and our business in general. Other considerations relate principally to general economic and political conditions.*

*If any of the following risks actually occur, our business, financial condition, results of operations and/or prospects could be materially and adversely affected. In such circumstances, our ability to meet our obligations under the Term Loan Facilities may be materially and adversely affected. The market price of the Existing Securities could decline and holders of the Existing Securities may lose all or part of their investment.*

### **Risks Relating to Our Company and Our Business**

***Disease or biological hazards, particularly the WSSV and the IMNV virus, may infect our products, which could materially and adversely affect our products and operational performance.***

Disease or biological hazards may affect the aquaculture industry and can disrupt the production process, reducing demand of our aquaculture products. During the first two months of the culturing process, shrimp fries are most vulnerable to diseases and other biological hazards. When the white spot syndrome baculovirus (“WSSV”) infections are detected, farmers generally undertake early harvesting to contain the spread of the virus and to preserve economic value of the harvest, which leads to lower pond yields. More serious outbreaks of WSSV are more likely to occur during the colder months.

In March 2009, the Infectious Myonecrosis Virus (“IMNV”) began affecting Indonesia. The IMNV virus is known to have derived from brackish and marine water, but is not as immediately lethal as certain other viruses, such as WSSV. When all of the environmental conditions in the pond are within optimal levels, even in the presence of moderately high concentrations of IMNV, disease and mortality will not necessarily occur unless the shrimp are subject to stress, for example through (a) co-infection with other viral or bacterial pathogens, (b) subjection to rapid changes in salinity, temperature or pH, or (c) low oxygen and/or high organic matter, hydrogen sulphide, ammonia or nitrite concentrations. As IMNV was only discovered in Brazil (2002) and Indonesia (2006) and has not been discovered anywhere else, very little is known about the virus and its method of transmission. The virus is thought to be primarily transmitted horizontally through contaminated water (i.e. through the water itself or with associated carriers such as phytoplankton, zooplankton or suspended solids). Notwithstanding the above, transmission can also occur, and perhaps is more likely, through water-borne crustaceans and other infected vectors, and through cannibalism of infected shrimp and consumption of other infected hosts.

Our Group developed and socialized procedures to be executed by farmers to mitigate the impact of IMNV:

- intensifying viral exclusion through an increase in filtering stations, disinfecting ponds with chlorine and extending the time for pond preparation;
- improving water quality and reducing stocking density;
- managing the environment through intensified monitoring and surveillance;
- preventing disease transmission to other ponds or farms through restrictions in movement, implementing quarantine measures for equipment;
- implementing new farming operating procedures; and

- conducting research and experiments into other ways of mitigating disease progression.

The White Feces Syndrome (“WFS”) began affecting the shrimp industry in most shrimp-producing countries in 2014. The WFS retards shrimp growth and, as a result, it affects the size of the shrimps, which are smaller if compared to the average shrimp size for the same culture period, leading to a higher feed conversion ratio (for further details on the feed conversion ratio, please see “Business—Shrimp Feed Production”).

Other diseases or biological hazards that could affect farmers' harvest volumes and sales of our products include the Taura Syndrome virus, the infectious hypodermal and hematopoietic necrosis virus (which causes severe deformities and mortality in shrimp) and vibriosis (which are bacteria which infect shrimp and cause high mortality rates). Other viruses or biological hazards that have been detected in other shrimp-producing countries include the Yellow Head virus, Vampire Shrimp syndrome (detected in Thailand), Snow Shrimp syndrome (detected in Thailand), Early Mortality syndrome (detected in China, Vietnam, Malaysia and Thailand) and the *Penaeus vannamei* nodavirus (detected in Belize), could potentially also affect Indonesian shrimp farming industry. The risks of the diseases or biological hazards can arise through transmission by infected disease-carriers such as birds or crabs or other external factors. Our feed customers rely on consistent product quality. Any biological hazard (such as mold) which adversely affects the quality or consistency of our feed products could result in customers choosing feed products from other producers which could have a material adverse effect on our business.

If a disease outbreak or other biological hazards are not successfully mitigated by the biosecurity and disease control management measures, mortality rates of shrimp could increase which could have a material and adverse effect on production and sales of our products to the market.

***The successful completion of the Restructuring and the Scheme of Arrangement notwithstanding, our business and operations continue to face serious difficulties and we may not be able to meet our debt obligations in the future, which would lead to a potential default. As a result, we may be unable to continue as a going concern and the Borrower may be unable to avoid filing for bankruptcy protection or court-ordered liquidation.***

On June 28, 2007, the Borrower issued US\$325.0 million guaranteed notes, which were guaranteed by our Company and certain of its subsidiaries. However, due to the significant decrease experienced at CPB's ponds, primarily due to the impact of infections from IMNV in the ponds, the group suffered significant losses and the Borrower and our Company (as Guarantor) did not make the semi-annual payments of interest payable under the notes issued on June 28, 2007, from December 28, 2009 to December 28, 2011.

Discussions with the holders of the notes issued by the Borrower on June 28, 2007, were initiated in 2009 and the restructuring of such notes was effected in 2013. Pursuant to the restructuring, on June 17, 2013, the Borrower issued the US\$325.0 million amended and restated step up rate guaranteed senior secured notes due 2020 (the "**Amended and Restated Notes**"), which were guaranteed by our Company and certain of our subsidiaries. However, since 2014 the performance of the plasma farmers at CPB continued to decline and the receivables of the Company continued to increase, due to the unfavourable Nucleus Plasma Partnership Agreement. We had total comprehensive loss for the year ended December 31, 2014 in the amount of Rp395.8 billion and total comprehensive income for the year ended December 31, 2015 in the amount of Rp1,073.7 billion. We had total comprehensive loss for the year ended December 31, 2016 in the amount of Rp1,801.5 billion and total comprehensive loss for the period ended June 30, 2017 in the amount of Rp2,267.3 billion. The Borrower and our Company (as Guarantor) did not make the semi-annual payments of interest payable under the Existing Notes from January 1, 2017 to June 30, 2017, totaling US\$6.6 million.

Further discussions with the holders of the Amended and Restated Notes were initiated in 2017 and the restructuring of such Amended and Restated Notes was effected in 2018. Pursuant to the restructuring, on July 26, 2018, the Borrower issued the Existing Notes, which were guaranteed by our Company and certain of its subsidiaries, and Azion Bao issued the MEBs which were exchangeable into certain shares of the Company. However, due to the significant decrease experienced at the Group's cultivation centres, primarily due to a prolonged drought that caused fish farmers to have difficulty obtaining clean water for fish cultivation and an outbreak of WFD attacking cultivation centres in Lampung and Sumatra, the group suffered significant losses and the Borrower and our Company (as Guarantor) did not make the semi-annual payments of interest payable under the Existing Notes from June 30, 2019 to December 31, 2020 or the scheduled principal installment payments from June 30, 2019 to December 31, 2020.

Independent financial review has been carried out, as a result of which we are now conducting this Restructuring and petitioning the courts in Singapore to sanction the Scheme of Arrangement. The successful completion of the Restructuring and the Scheme of Arrangement notwithstanding, our business and operations continue to face serious difficulties and we may not be able to meet our debt obligations in the future, which would lead to a potential default. As a result, we and the Borrower may be unable to continue as a going concern and the Borrower may be unable to avoid filing for bankruptcy protection or court-ordered liquidation.

***Labour activism and unrest, may adversely affect our business.***

As of December 31, 2020 we had a total of 1,791 permanent employees. We depend on the supply of a capable workforce. Labour unrest or activism among our employees could disrupt our operations and have an adverse effect on our business prospects or financial condition. Labour incidents, among others, and labour unrest, may lead to production stoppages or declines in production in the future, and adversely impact our business, results of operations, financial condition and prospects.

***We are exposed to foreign exchange rate fluctuations and translation risk.***

In 2020, approximately 14% of our net sales were denominated in US dollars, due to export of frozen shrimp products outside Indonesia, while 86% of our net sales were denominated in Rupiah, due to the fact that our sale of fish feed, shrimp feed, pet food, shrimp fry and other aquaculture products were primarily in Indonesia.

In 2020, approximately 31% of our costs of goods sold were denominated in US dollars, including our raw material costs for feed products, while approximately 69% of our costs of goods sold were denominated in Rupiah.

As a result, we are exposed to risk associated with the fluctuations in the exchange rates between the US dollar and the Rupiah, especially since a substantial portion of our net sales are denominated in US dollars and there is a time lag between the time we pay in Rupiah for harvested shrimp to our suppliers and the time we are able to subsequently process such shrimp, sell our frozen shrimp products and receive payment in US dollars.

In addition, because our financial statements are presented in Rupiah we are subject to translation risk, which is the risk that our financial statements for a particular period or as of a certain date depends on the prevailing exchange rates of the US dollar against the Rupiah. With respect to translation risk, even though the fluctuations of the US dollar against the Rupiah can be substantial and therefore significantly impact on comparisons with prior periods, the translation impact is a reporting consideration and does not affect the underlying results of operations.

***Our cash balances may be insufficient. We may miss opportunities to invest our capital in plant improvements, take advantage of business opportunities as they arise, or engage in other business-related activities which would improve our business, operations and prospects.***

Our cash and cash equivalent balances as of December 31, 2018, 2019 and 2020 were Rp185.0 billion, Rp129.4 billion and Rp296.5 billion respectively, while our total current liabilities as of these same dates were Rp5,239.9 billion, Rp5,077.5 billion and Rp4,983.2 billion respectively. Given our debt service obligations, we may miss opportunities to invest our capital in plant improvements, take advantage of business opportunities as they arise, or engage in other business-related activities which may improve our business, operations and prospects.

***We are exposed to credit risk associated with our customers.***

Our top 10 customers accounted for approximately 14% of total sales for December 31, 2020. These customers comprise of shrimp product wholesalers and distributors and large food service operators in the EU, US and Japan. Our average collection periods for trade receivables in 2018, 2019 and 2020 were 34 days, 26 days and 24 days, respectively.

Although we usually select our feed customers carefully and most of our customers are typically long-term customers, with whom our Company has done business for over 10 years, if such customers experience failures in

their culture, the Company might be exposed to longer payment terms and this may impact the Company's ability to manage its cashflow.

***We may be materially and adversely affected by an economic slowdown in the markets where we sell our products.***

Export food products represented 14% of our total net sales in 2020. The principal markets for our export food products are the EU, US and Asia (mainly Japan). In 2020, our food product exports to the EU, US and Asia represented 45%, 33% and 22%, respectively of our total net sales for export food products. In 2020, 86% of our total net sales were derived from sales within Indonesia, primarily of fish feed, shrimp feed, pet food, domestic food products and shrimp fry.

We are therefore vulnerable to an economic slowdown in these markets which may adversely affect demand and prices for our products and thus adversely affect our total net sales. While our fish feed, shrimp feed, pet food and shrimp fry sales occur within Indonesia, these sales may be adversely affected should shrimp farmers and fish farmers reduce their purchases of fish feed and shrimp feed in response to a decrease in global or regional demand for fish or shrimp.

Moreover, if there are any unforeseen events such as outbreak of war, terrorist attack or other political, economic or social events in these markets that lead to a protracted economic slowdown, demand for our products may decrease, which would have a material and adverse effect on us.

***Our raw materials, and to a lesser degree our shrimp products, are commodities, and are subject to fluctuations based on market prices.***

Our three largest raw material costs are soybean meal, harvested shrimp and fish meal. Each of these raw materials is a commodity that is priced according to local and international market prices. We have not entered into any hedging transactions with respect to the raw materials we use in our products. We may be unable to pass on increases in these costs to our customers in order to maintain our profit margins. As a result, an increase in the market prices of our raw materials, or a decrease in the prices we can obtain for our products may have a material and adverse effect on our business. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Description of Certain Line Items in the Income Statement—Cost of Goods Sold."

***We may require additional financing in the future.***

We may need to obtain additional debt or equity financing to fund our future capital expenditures or working capital needs, or to refinance our existing debt. Additional equity financing may result in dilution to the holders of our shares and additional debt financing may increase our financing costs and reduce our profitability. Our financing agreements may contain terms and conditions that may restrict our freedom to operate and manage our business, such as terms and conditions that:

- require us to maintain certain pre-set debt service coverage ratios and leverage ratios; and
- require us to use our assets, including our cash balances, as collateral for our indebtedness.

We may not be able to obtain any additional financing on terms that are acceptable to us, if at all.

***Consumers may fall ill from eating our products.***

Despite the biosecurity and food safety measures we have in place to prevent external factors from contaminating our products and our quality control procedures, we may inadvertently sell products which are unsafe for human consumption. For example, our products could be contaminated by bacteria such as salmonella or E. coli. If consumers eat an infected product, they could become seriously ill or die and we may be subject to product liability claims or lawsuits by our customers. We could incur substantial costs in defending any such claims and we could be held liable for compensation. Such claims and lawsuits, regardless of their outcome, would give rise to negative publicity which

could also diminish our brand value and, as a result, future sales of our products could be severely affected. Such circumstances could have a material and adverse effect on our business.

***We may suffer production declines or raw material shortages caused by adverse weather conditions, acts of war, earthquakes or natural disasters or other reasons.***

Shrimp production are mainly located in Lampung and South Sumatera provinces, from which we source a substantial portion of our raw materials, mainly harvested shrimp, from farmers. If any of our production facilities, the ponds or farms from which we purchase harvested shrimp are damaged or suspend production (temporarily or permanently) as a result of adverse weather conditions, acts of war, earthquakes, other natural disasters or similar events that take place in those areas, we may suffer production shortages. Any future unavailability of raw materials would have a material and adverse effect on our business.

Consistently warm weather is conducive to the growth of shrimp and we benefit from the climate of the Indonesian archipelago, where all of our shrimp farms are located. However, extreme weather events like El Nino or La Nina could impact fish and shrimp cultivation process.

Heavy rainfall also adversely impacts our shrimp production if it reduces salinity to below 12 ppt, temperature to below 28 degrees Celsius and pH to below 7.5 in the morning. Salinity, temperature and pH levels below these thresholds cause stress to the shrimp and make them more vulnerable to disease. Heavy rainfall in the first quarter of 2010 and in 2016 (the latter due to the effects of La Nina, which caused heavy rainfall for almost the entire year) reduced shrimp production significantly and a recurrence of these events may adversely affect our operating results in the future.

***Our shrimp exports may be materially and adversely affected by the adoption of international trade barriers.***

Certain overseas markets, or potential markets, may become inaccessible or less accessible to us due to embargoes, import bans, quotas, anti-dumping duties, tariffs or other barriers which affect exports of our shrimp products or international trade with Indonesian companies. For example, China has imposed VAT taxes on exports of non-Chinese shrimp into China. Such taxes put shrimp exports from countries such as Indonesia at a disadvantage to shrimp harvested and produced in China. In addition, the US applied anti-dumping tariffs against shrimp imported from the PRC, Vietnam, Brazil, Ecuador, India and Thailand in 2005. Any adoption of such barriers affecting shrimp exported from Indonesia would have a material and adverse effect on us. See “Business—Trade Barriers Concerning Exports of Indonesian Shrimp” and “The Fish and Shrimp Industry—Legislation and Industry Standards.”

In 2008, United States Customs and Border Protection (“CBP”) investigated our Company for potential transshipment of shrimp products from China through Indonesia to the US. CBP officials found no evidence of wrongdoing on our part and confirmed that our shrimp exports were indeed of Indonesian origin. The investigation nonetheless disrupted our exports to the US for more than six months. Such actions by government agencies of the countries to which we export may in the future delay our shrimp exports, causing a material and adverse effect on our business, results of operations, financial condition and prospects.

***Our business is vulnerable to legal and regulatory changes.***

As we sell our shrimp products to the EU, US and Asia (mostly Japan), our business is subject to a broad range of foreign laws, regulations, treaties and international agreements. These standards govern various aspects of our business, including how we harvest and process shrimp, environmental protection, management of hazardous substances and human health and safety. Although we are currently in compliance with all applicable food safety and quality control standards in the markets that we operate in and sell to, these standards may change and we may not be able to comply with new standards on a timely or cost-efficient basis, if at all. Such non-compliance could prevent us from selling our shrimp products into certain markets, which could have a material and adverse effect on our net sales. In addition, such non-compliance could result in our inability to satisfy obligations to our customers, which could materially and adversely affect us. In addition to foreign standards, we are subject to regulations in Indonesia which are applicable to our business, including with respect to the land we use in our business. We cannot guarantee that

future changes in the legal and regulatory environment in Indonesia or in the countries to which we export our products will not have a material and adverse effect on our business.

***Changes in consumer preferences away from our products could materially and adversely affect us.***

Changes in consumer preferences away from shrimp products or negative publicity regarding human consumption of shrimp or the shrimp industry may reduce worldwide demand for our shrimp products. A reduction in the demand for shrimp may in turn adversely affect demand for our shrimp feed and shrimp fry products. Consumer preferences can change for many reasons including changes in nutritional standards, health advisories and general economic conditions. Similarly, sales of our shrimp and fish feeds could be adversely affected by shifts in consumer preferences away from shrimp or fish.

***Seasonality affects our sales.***

We experience seasonal fluctuations in our sales volume and revenue as our business is sensitive to local and global consumer spending patterns for our products. Peak dry season will have adverse impact on fish cultivation activities. On the other hand, during peak rainy seasons the shrimp cultivation will decrease. Accordingly, any adverse trends such as an unexpected shift in the weather patterns of Indonesia, may affect our business, results of operations, financial condition and prospects.

***Trading of our publicly traded shares may be suspended. In addition, our shares may be delisted from the IDX.***

The Borrower and our Company (as Guarantor) did not make the semi-annual payments of interest payable on the Existing Notes from June 30, 2019 to December 31, 2020 or the scheduled principal installment payments from June 30, 2019 to December 31, 2020. The Indonesia Stock Exchange (“**IDX**”) may therefore temporarily suspend trading of our Company’s ordinary shares.

***Control by Controlling Shareholders.***

The Jiaravanon Family (Mr Jaran Chiaravanont, Mr Montri Jiaravanont, Mr Sumet Jiaravanon and Mr Dhanin Charavanont, who are all brothers, and certain members of their families, also referred to as the “**Controlling Shareholders**”), directly and indirectly own, in aggregate, more than 43% of the issued and paid-up capital of the Group as of December 31, 2020. By virtue of their shareholding in the Company, the Controlling Shareholders have the ability to directly exercise control over the Company, our affairs and business, including the election of directors and the approval of most actions requiring the approval of our shareholders. They have the ability to cause us to take actions that are not in or may conflict with our or our creditors’ (including the lenders under the Term Loan Facilities) best interests as well as matters relating to our governance and business strategy. The Controlling Shareholders are also the controlling shareholders of Charoen Pokphand Foods Public Company Limited, which also has a shrimp aquaculture business and which we consider to be one of our competitors. See “Share Capital and Shareholders” and “Related Party Transactions.”

***We may be unable to successfully manage the growth of our business.***

To manage and grow our operations, we may be required to increase the number of our employees together with the scope of our operational and financial systems, as well as incur capital expenditures for infrastructure, among other things, to handle changes in volume, complexity and expanded geographic area of our operations. In addition, such changes to our operations will place additional demands on our management team, financial reporting and information systems as well as require additional investment. We may not be able to implement our strategy successfully or do so without unreasonable increases in costs or delay.

## **Risks Relating to the Term Loan Facilities**

### ***An event of default could occur under the terms of any existing or future debt agreements or the Term Loan Facilities, which could cause repayment of our debt to be accelerated***

If we are unable to comply with the restrictions and covenants in the Term Loan Facilities or our existing or future debt agreements, there could be an event of default under the terms of such agreements. If an event of default occurs under these agreements, the holders of the debt could terminate their commitments to lend to us, accelerate the debt and declare all amounts borrowed due and payable or terminate the agreements. Furthermore, the Term Loan Facilities and existing debt agreements contain, and future debt or other agreements may contain, cross-acceleration or cross-default provisions. As a result, our default under one debt agreement may cause the acceleration of other debt agreements, including the Term Loan Facilities, or result in a default under our other debt agreements, including the Term Loan Facilities. If any of these events occur, our assets and cash flow may be insufficient to repay our indebtedness in full, or we may be unable to find alternative financing. Even if we could obtain alternative financing, it may not be on terms that are favorable or acceptable to us.

### ***Our significant indebtedness could adversely affect our obligations to lenders under the Term Loan Facilities***

As of December 31, 2020, we had Rp3,514.2 billion (US\$249.2 million) of total outstanding indebtedness which consisted of (i) bonds payable in the amount of Rp2,291.6 billion (US\$162.5 million), (ii) short-term bank loans in the amount of Rp1,151.3 billion (US\$81.6 million) and (iii) long-term debts in the amount of Rp71.3 billion (US\$5.1 million).

Our leverage will have important consequences for lenders under the Term Loan Facilities. As a result of our leverage, we will require significant amounts of cash to meet our obligations. Therefore, a substantial part of our cash flow from operations will not be available for our business. In addition, our leverage has the following consequences:

- our exposure to adverse general economic conditions could increase;
- any failure to comply with the covenants contained in the Term Loan Facilities or the occurrence of any other event of default under the Term Loan Facilities could lead to an acceleration of the Term Loan Facilities, which would require that we immediately repay all of the Term Loan Facilities;
- our compliance with certain provisions in the Term Loan Facilities may not be entirely within our control;
- financial and other restrictive covenants in the Term Loan Facilities limit the amount of additional funds we can borrow and our ability to consummate asset sales;
- our flexibility in planning for, or reacting to, changes in our business and industry may be more limited; and
- we are sensitive to fluctuations in the value of the Rupiah against the US dollar and other currencies because most of our debt is denominated in US dollars, while much of our revenue and costs are denominated in Rupiah.

Our leverage and these restrictions may materially and adversely affect our ability to finance our future operations or capital needs or to engage in other business activities, or may otherwise adversely affect our business, financial condition, results of operations, cash flows and prospects.

In addition, our ability to service current and future debt, including the principal of, and interest on, the Term Loan Facilities and payment obligations under the New Guarantees, will depend upon our future performance, which, in turn, depends on the successful implementation of our strategy and on financial, competitive, regulatory, technical and other factors, general economic conditions, the demand and selling prices for our products, and other factors specific to the aquaculture industry, many of which may be beyond our control. We could face difficulties repaying our debt and may be required to refinance indebtedness, including the Term Loan Facilities, if our liquidity, cash flows or operations deteriorate in the future and we cannot generate sufficient cash flow from operations. Our ability to

refinance such leverage will depend upon our financial condition at the time, the restrictions in the agreements governing our leverage and other factors, including general market and economic conditions. If such a situation arises, we may not be able to refinance our leverage on commercially acceptable terms or at all.

***A depreciation of the Rupiah or the imposition of further exchange controls may have a material and adverse effect on our ability to make payments on the Term Loan Facilities.***

One of the most important immediate causes of the economic crisis which began in Indonesia in mid-1997 was the depreciation and volatility of the value of the Rupiah, as measured against other currencies, such as the US dollar. Although the Rupiah has appreciated considerably from its low point in 1998, the Rupiah continues to experience significant volatility. In addition, the Term Loan Facilities constitute a significant portion of our outstanding US dollar denominated debt. As at December 30, 2020, approximately 76.5% of our loans are denominated in US dollars, depreciation of the Rupiah against the US dollar will increase the Rupiah cost of our debt and debt service, which may have a material and adverse impact on our financial condition, net profit and cash flows.

Instability in the exchange rate of the US dollar may lead to labor incidents or even civil unrest, potentially causing production stoppages or declines in production, and as a result adversely impact our business, results of operations, financial condition and prospects.

Foreign currency is generally freely transferable within or from Indonesia. However, Indonesia does have limited foreign exchange controls. See “Exchange Rate Information and Exchange Control Information.” In addition, from time to time, Bank Indonesia has intervened in the currency exchange markets in furtherance of its policies, either by selling Rupiah or by using its foreign currency reserves to purchase Rupiah. We cannot assure lenders under the Term Loan Facilities that the Government will not impose additional capital controls on the Rupiah, that the current floating exchange rate policy of Bank Indonesia will not be modified, that further depreciation of the Rupiah against other currencies, including the US dollar, will not occur, or that the Government will take additional action to stabilize, maintain or increase the value of the Rupiah, or that any of these actions, if taken, will be successful. Bank Indonesia intervention in the currency markets could result in significantly higher domestic interest rates, liquidity shortages, exchange controls or the withholding of additional financial assistance by multinational lenders. Bank Indonesia intervention in the currency markets or the imposition of additional exchange controls may have a material and adverse effect on our ability to make payments on the Term Loan Facilities.

***The Term Loan Facilities are not listed or traded on any securities exchange.***

The Term Loan Facilities are not listed or traded on any securities exchange. It may therefore be difficult for lenders to sell or transfer their position under the Term Loan Facilities.

***Indonesian companies have filed suits in Indonesian courts to invalidate transactions with structures similar to the Term Loan Facilities and the New Guarantees and have successfully brought legal action against lenders and other transaction participants. Such legal action has resulted in judgments invalidating all obligations under the applicable debt instruments and allowing affirmative recoveries from the lenders in excess of the amounts borrowed.***

In June 2006, the Indonesian Supreme Court affirmed a lower court judgment that invalidated US\$500 million of notes issued through an offshore offering structure similar to that implemented pursuant to the previous exchange. The June 2006 decision involved PT Indah Kiat Pulp & Paper Tbk (“**Indah Kiat**”) as plaintiff and various parties as the defendants using a structure similar to the issuance of the Existing Notes whereby notes were issued through an overseas subsidiary of Indah Kiat and guaranteed by Indah Kiat. The Indonesian Supreme Court upheld the decisions of a District Court and High Court in Indonesia in favor of Indah Kiat. The Indonesian courts ruled that the defendants (including the trustee, underwriter and security agent for the issuance of the Indah Kiat notes) committed a tort (*perbuatan melawan hukum*), and therefore the issuance of the notes was declared null and void. The courts nullified the notes by reasoning that the contracts made in relation to the notes were signed without any legal cause, and so did not meet the provision of Article 1320 of the Indonesian Civil Code which requires a legal cause as one of the elements for a valid agreement. The Indonesian courts accepted the argument of the plaintiff’s lawyer that Indah Kiat acted both as a debtor and as a guarantor of the same debt even though in the facts of the case Indah Kiat International Finance Company BV (its Dutch subsidiary established for the purpose of the issuance of the notes) was the issuer of

the notes and Indah Kiat was the guarantor of such notes. The Indonesian courts also ruled that the establishment of Indah Kiat International Finance Company BV was unlawful as it was intended to avoid Indonesian withholding tax payments. To date, this is the only case regarding notes issued through offshore offering structures which has reached and has been decided by the Supreme Court. The Indonesian Supreme Court is the court of the highest authority in Indonesia, and its decisions are final and binding and may only be subject to a civil review (*Peninjauan Kembali*) where, among others, new evidence is submitted. The Supreme Court may refuse to undertake such a review, and if it undertakes such a review, it may refuse to affirm the original Supreme Court decision.

In several other Indonesian court cases involving Indonesian companies that issued debt securities pursuant to an offshore financing structure using a special purpose vehicle, similar to the one used in the previous exchange, and that defaulted on their payment and other obligations under the debt securities, the Indonesian companies have successfully sued lenders and other transactions participants and obtained, among other relief:

- a declaration that the entire debt obligation is null and void;
- disgorgement of prior payments made to holders of the debt securities;
- damages from holders of debt securities and other transaction participants in amounts exceeding the original proceeds of the debt securities issued; and
- injunctions prohibiting holders of the debt securities from enforcing their rights under the transaction documents and trading in such debt securities.

Published reports do not provide a clear factual basis or legal rationale for these judgments. In reaching these decisions, the Indonesian courts have not followed the contractual choice of New York law as the governing law of the transaction. These courts have in certain instances barred the exercise of remedies available to the investors anywhere in the world. Accordingly, if similar litigation were brought in relation to the Term Loan Facilities or the New Guarantees (See “Description of the Term Loan Facilities, the New Guarantees and the Finance Documents—Security for the Term Loan Facilities and the New Guarantees”), lenders under the Term Loan Facilities (as well as other participants in the Restructuring) could be exposed to verdicts from Indonesian courts that (a) nullify all the Term Loan Facilities offered in the Restructuring, and (b) provide for affirmative money judgments against lenders under the Term Loan Facilities and/or other participants in the Restructuring. Any such decision may effectively prevent lenders under the Term Loan Facilities and other defendants from pursuing or enforcing any remedies with respect to the Term Loan Facilities or the New Guarantees in Indonesia or abroad.

While we do not believe that these recent court decisions were rendered on a basis consistent with Indonesian law, and we have been advised by our Indonesian legal advisors that the New Guarantees are enforceable under Indonesian law, no assurances can be given that in a similar action against the lenders under the Term Loan Facilities, the Indonesian courts will not declare the Term Loan Facilities and the New Guarantees null, void and unenforceable or grant other or additional relief to the Borrower or the Guarantors to the detriment of lenders under the Term Loan Facilities as aforementioned.

Furthermore, no assurance can be given that any cases currently in appeal or, if submitted by the relevant creditors, a civil review (*Peninjauan Kembali*) following the Indonesian Supreme Court decision of June 2006 described above will be resolved in favor of the creditors nor that a successful appeal and/or civil review would constitute a legal precedent preventing future case from being brought at the district court level on the same basis. In addition, Indonesian courts are often unfamiliar with sophisticated commercial or financial transactions such as the financing structure as contemplated in this restructuring, resulting in a lack of certainty in the interpretation and application of Indonesian legal principles in relation to this structure. Therefore, parties to the Term Loan Facilities may have no effective recourse to enforce their rights under the Finance Documents in Indonesia, where substantially all of the Company and the Subsidiary Guarantors’ respective assets are located. Depending on the recognition which non-Indonesian courts may grant to such Indonesian decisions, holders of the New Facilities may also be disabled from enforcing any rights under the Term Loan Facilities, or the Finance Documents, or collecting on the Borrower’s, the Company’s or the Subsidiary Guarantors’ respective assets, anywhere else in the world.

Affirmative relief if granted against the lenders under the Term Loan Facilities by Indonesian courts may be enforced by non-Indonesian courts against the assets of the lenders under the Term Loan Facilities (or other transaction participants) located outside Indonesia (and each lender under the Term Loan Facilities should seek legal advice in that regard). As a result, participation as a lender in this transaction may expose lenders under the Term Loan Facilities to affirmative verdicts by Indonesian courts (beyond the value of the Term Loan Facilities).

***Lenders under the Term Loan Facilities may be exposed to a legal system subject to considerable discretion and uncertainty; it may be difficult or impossible for lenders under the Term Loan Facilities to pursue claims under the Term Loan Facilities or the New Guarantees.***

Indonesian legal principles relating to the rights of debtors and creditors, or their practical implementation by Indonesian courts, may differ materially from those that would apply within the United States or the EU. Neither the rights of debtors nor the rights of creditors under Indonesian law are as clearly established or recognized as under legislation or judicial precedent in most of the United States and the EU jurisdictions. In addition, under Indonesian law, debtors may have rights and defenses to actions filed by creditors that these debtors would not have in jurisdictions such as the United States and the EU member states.

Indonesia's legal system is a civil law system based mainly on written statutes; judicial and administrative decisions do not constitute binding precedents and are not systematically published. Indonesia's commercial and civil laws as well as rules on judicial process were historically based on Dutch law as in effect prior to Indonesia's independence in 1945, and some have not been revised to reflect the complexities of advanced financial transactions and instruments. Indonesian courts are often unfamiliar with sophisticated commercial or financial transactions, leading in practice to uncertainty in the interpretation and application of Indonesian legal principles. The application of Indonesian law depends in large part upon subjective criteria such as the good faith of the parties to the transaction and principles of public policy, the practical effect of which is difficult or impossible to predict. Indonesian judges operate in an inquisitorial legal system, have very broad fact-finding powers and a high level of discretion in relation to the manner in which those powers are exercised. In practice, Indonesian court decisions may omit a clear articulation of the legal and factual analysis of the issues presented in a case. As a result, the administration and enforcement of laws and regulations by Indonesian courts and Indonesian governmental agencies may be subject to considerable discretion and uncertainty. Furthermore, corruption in the court system in Indonesia has been widely reported in publicly available sources. See, for example, U.S. Department of State, *Indonesia: Country Reports on Human Rights Practices* (2003); World Bank, *Raising Investment in Indonesia: A Second Generation of Reforms* (2005); and Transparency International, *International Corruption Perceptions Index* (2003).

In addition, under the Indonesian Civil Code, a guarantor may waive its right to require the obligee to exhaust its legal remedies against the obligor's assets prior to the obligee exercising its rights under the related guarantee. However, a guarantor may be able to argue successfully that the guarantor can nonetheless require the obligee to exhaust such remedies before acting against the guarantors. An Indonesian court may refuse to side with the Company and the Subsidiary Guarantors on this matter, despite the express waiver by the Company and the Subsidiary Guarantors of this obligation in the Guarantees.

As a result, it may be difficult for lenders under the Term Loan Facilities to pursue a claim against the Borrower, the Company or the Subsidiary Guarantors in Indonesia, which may adversely affect or eliminate entirely the ability of the parties to the Term Loan Facilities to obtain and enforce a judgment against the Borrower or the Guarantors in Indonesia or increase the costs of pursuing, and the time required to pursue, claims against the Borrower or the Guarantors.

***There is uncertainty as to whether security interests in Indonesia can be enforced in full and in accordance with their terms.***

The pledge by the Company of its interests in the equity of the Subsidiary Guarantors is governed by Indonesian law. The pledge by CPB of its interest in the equity of CWS is governed by Indonesian law. See "Description of the Term Loan Facilities and the Finance Documents—Security for the Term Loan Facilities and the New Guarantees."

There is uncertainty as to whether the Indonesian security documents can be enforced in full and in accordance with their terms for several reasons including:

- The ability of the Onshore Security Agent to enforce its rights under the Indonesian security documents will depend on whether an Indonesian court is willing to recognize and enforce the principal debt obligations under the Term Loan Facilities. Accordingly, enforcement of claims will be subject to an Indonesian court's accepting Singapore law as the governing law of the Term Loan Facilities or, alternatively, to an Indonesian court's interpretation of Singapore law principles contained in the Term Loan Facilities were Indonesian law to be applied. Indonesian courts have, in practice from time to time, disregarded the parties' choice of foreign law and applied Indonesian law in such cases, and an Indonesian court may refuse to apply Singapore law in any proceedings relating to the enforcement of the Term Loan Facilities.
- Judgments of foreign courts, including Singapore courts, are not enforceable in Indonesia. As a result, the Facility Agent and/or the Onshore Security Agent may be required, prior to the enforcement of the Indonesian security documents, to pursue claims based upon the Term Loan Facilities through the Indonesian courts.
- The enforcement of the Indonesian security documents will be subject to the rules of civil procedures and/or public auction procedures as applied by the Indonesian courts, which rules include court and state auction agency fees being payable in respect of proceedings instituted on the basis of the security documents. Specific performance may not always be available under the laws of Indonesia.
- The security created by the Indonesian security documents will be subject to higher-ranking priority rights created by statute, including rights created pursuant to Articles 1137 and 1139 of the Indonesian Civil Code (*burgerlijk wetboek*) in respect of claims made by the Government, such as tax claims of the Indonesian State Treasury and court and other administrative costs relating to enforcement of the Indonesian security documents and costs to safeguard the relevant secured assets.

The proceeds realized from a sale of the Security may not be sufficient for the lenders under the Term Loan Facilities to recover all amounts due under the Term Loan Facilities. The Term Loan Facilities are secured by the Security, which is comprised of (i) a first priority fixed and floating charge over all of the assets of the Borrower, including (but not limited to) all of the Borrower's rights under certain advance purchase agreements entered into by the Borrower with our Company and certain of the Subsidiary Guarantors, including, without limitation, any claims which the Borrower has or will have against any Guarantor, (ii) a first priority fixed charge by the Company of its capital stock in the Borrower, (iii) a first priority pledge by the Company of its capital stock in each of the Subsidiary Guarantors; (iv) a first priority pledge by CPB of its capital stock in CWS; (v) a first priority charge over the MEBs allocated to the Facility B Lender in connection with the MEB Tender Offer; and (vi) a first priority assignment over the Debt Service Account. If the Borrower fails for whatever reason to repay interest or principal under the Term Loan Facilities, lenders under the Term Loan Facilities will have to rely on the enforcement of the security and the sale of the Security for the repayment of any amounts due under the Term Loan Facilities. The proceeds from the enforcement of the security may not be sufficient to satisfy the Borrower's or the Guarantors' obligations under the Term Loan Facilities or the New Guarantees. The amount of the proceeds will depend on a number of factors, including the market value of the Security at the time of enforcement, the jurisdiction in which the enforcement action or sale is completed, the condition of the Security, the Offshore Security Agent's and the Onshore Security Agent's (as the case may be) ability to dispose of the security to a willing purchaser. An appraisal of the Security has not been prepared in connection with the Restructuring. In addition, any proceeds from the sale of the Security may also be subject to certain transfer taxes and/or transaction costs and expenses. Furthermore, the net amounts realized from the enforcement of any security will be subject to payment of the prior-ranking fees and expenses in accordance with the Term Loan Facilities. Each of these factors could reduce the likelihood of an enforcement action and reduce the amount of any proceeds from an enforcement action.

***The security will not be granted directly to the lenders under the Term Loan Facilities.***

The security for the obligations of the Borrower and the Guarantors under the Term Loan Facilities and the Finance Documents will not be granted directly to the lenders under the Term Loan Facilities but rather will only be granted in favor of the Onshore Security Agent and the Offshore Security Agent pursuant to the Term Loan Facilities.

As a consequence, lenders under the Term Loan Facilities will not have direct security and will not be entitled to take enforcement action in respect of the security for the Term Loan Facilities and the New Guarantees except through the Onshore Security Agent and the Offshore Security Agent, who have agreed to apply any proceeds of enforcement on such security toward such obligations.

In addition, Indonesian law does not recognize the concept of trustee, including without limitation, the relationship of trustee and beneficiary or other fiduciary relationships; accordingly, enforcement of the provisions granting security in favor of third party beneficiaries and otherwise relating to the nature of the relationship between a trustee (in its capacity as such) and the beneficiaries of a trust, in Indonesia will be subject to an Indonesian court accepting the concept of trustee under Singapore law and accepting proof of the application of equitable principles under such security documents.

***The Term Loan Facilities will be effectively subordinated to the debt and other liabilities of any of our future subsidiaries that are not Subsidiary Guarantors, and may be subordinated to our other secured obligations and our Subsidiary Guarantors.***

Because only we and our Subsidiary Guarantors will be required to guarantee the Term Loan Facilities, the Term Loan Facilities and the New Guarantees will be effectively subordinated to the debt and other liabilities of any of our future subsidiaries that are not Subsidiary Guarantors, as such term is defined in “Description of the Term Loan Facilities and the Finance Documents.” The effect of this subordination will be that, in the event of a bankruptcy, liquidation, dissolution, reorganization or similar proceeding involving one of our subsidiaries that is not a Restricted Subsidiary, the assets of the affected entity cannot be used to pay lenders under the Term Loan Facilities until after all other claims against such subsidiary, including trade payables, have been fully repaid.

Although the Term Loan Facilities restrict us and our Subsidiary Guarantors from incurring additional debt, these restrictions will not apply to subsidiaries that are not Subsidiary Guarantors. In addition, the Term Loan Facilities and the New Guarantees will be subordinated to secured obligations of us and our Subsidiary Guarantors to the extent that the assets pledged to secure such obligations do not also secure obligations under the Term Loan Facilities or the Guarantees. Although the Term Loan Facilities restrict us and our Subsidiary Guarantors from incurring liens on their property, these restrictions are subject to important exceptions. See “Description of the Term Loan Facilities and the Finance Documents—Certain Covenants—Limitation on Liens.”

***We may be unable to finance a Change of Control mandatory repayment.***

Upon the occurrence of a “Change of Control”, as such term is defined in “Description of the Term Loan Facilities and the Finance Documents”, the Term Loan Facilities will require us to mandatorily repay the entire Facility A Loans plus accrued and unpaid interest. In connection with our mandatory repayment of the Facility A loan, we may also be required to repay other debt outstanding at the time, or obtain consents from the lenders of such debt to permit the repayment of the Facility A loan.

If we are unable to repay such debt or obtain such consents, we can either mandatorily repay the Facility A loan in violation of these other debt agreements or choose not to mandatorily repay the Facility A loan. The failure to mandatorily repay the Facility A loan would constitute an event of default under the Term Loan Facilities. We may not have sufficient funds available at the time of a Change of Control event to make any debt repayment (including a mandatory repayment of the Facility A loan) as described above.

***The Term Loan Facilities may not be a suitable investment for all investors.***

Participants must determine the suitability of participating in the Existing Notes Tender Offer in light of their own circumstances. In particular, they should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Term Loan Facilities and the merits and risks of participating in the Existing Notes Tender Offer;

- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of their particular financial situation, a participation in the Existing Notes Tender Offer and the impact the Term Loan Facilities will have on their overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of a participation in the Term Loan Facilities, including where the currency for principal or interest payments is different from their currency;
- (iv) understand thoroughly the terms of the Term Loan Facilities and be familiar with the behavior of any relevant indices and financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial advisor) possible scenarios for economic, interest rate and other factors that may affect their investment and their ability to bear the applicable risks.

### **Risks Relating to Indonesia**

*Our Company is headquartered in Jakarta, the capital city of Indonesia. Our Company has operations, directly or through its subsidiaries, dispersed at each of its main production areas. Substantially all of our Company's commissioners, directors and officers are based in Indonesia and substantially all of our assets and operations are located in Indonesia. In common with other companies which conduct substantially all of their business in Indonesia, we could be adversely affected by changes in Government policies, social instability or other political, economic, legal, regulatory or international developments in or affecting Indonesia, examples of which are described below.*

#### ***Domestic, regional or global economic changes may adversely affect us.***

The economic crisis which affected Southeast Asia, including Indonesia, from mid-1997 was characterized in Indonesia by, among other effects, currency depreciation, negative economic growth, high interest rates, social unrest and extraordinary political developments. These conditions had a material and adverse effect on Indonesian businesses, including our business. Indonesia entered a recessionary phase with relatively low levels of growth from 1999 through 2002. More recently, the global financial crisis, which was triggered in part by the subprime mortgage crisis in the United States, caused failures of large U.S. financial institutions and rapidly evolved into a global credit crisis. U.S. bank failures were followed by failures of a number of European banks and declines in various stock indexes, reductions in foreign direct investment, as well as large reductions in the market value of equities and commodities worldwide, including in Indonesia. The global economic downturn has adversely affected the economic performance of Indonesia, resulting in declining economic growth, slowing household consumption and weakening investment due to loss of external demand and increased uncertainty in the global economy. Any adverse economic conditions in the future may have a negative impact on Indonesian businesses and consumers, and may reduce demand for our products.

In 2010, a financial crisis emerged in the EU, triggered by high budget deficits and rising direct and contingent sovereign debt in Greece, Ireland, Italy, Portugal and Spain, which created concerns about the ability of these EU member nations to continue to service their sovereign debt obligations. These conditions impacted the financial markets and resulted in high and volatile bond yields on the sovereign debt of many EU nations. Certain EU nations continue to experience varying degrees of financial stress, and yields on government-issued bonds in Greece, Ireland, Italy, Portugal and Spain have risen and remain volatile. Despite assistance packages to Greece, Ireland and Portugal, the creation of a joint EU-IMF European Financial Stability Facility in May 2010, and other EU actions aimed at addressing the financial crisis, uncertainty over the outcome of the EU governments' financial support programs and worries about sovereign finances persist.

Indonesia and other member countries of the Association of Southeast Asian Nations ("ASEAN") have been negatively affected, along with developing market countries globally, by the unprecedented financial and economic conditions in developed markets. Although the Government has taken a number of responses to these unprecedented conditions with the aim of maintaining economic stability and public confidence in the Indonesian economy,

continuation of these unprecedented conditions may negatively impact economic growth, the Government's fiscal position, the exchange rate and other facets of the economy.

The Government continues to have a large fiscal deficit and a high level of sovereign debt, its foreign currency reserves are modest, the Rupiah continues to be volatile and has poor liquidity, and the banking sector is widely seen as undercapitalized and suffers from high levels of non-performing loans. The Government funding requirements to areas affected by natural disasters, as well as increasing oil prices, may increase the Government's fiscal deficits. The economic difficulties faced by Indonesia during the Asian economic crisis that began in 1997 resulted in, among other things, volatility in interest rates, which had a material adverse impact on the ability of many Indonesian companies to service their existing indebtedness. Although the interest rate for one-month Bank Indonesia certificates has declined from a peak of 70.8% in late July 1998 to 4.75% in June 2017, the recent improvement in economic conditions may cease or reverse and adverse economic conditions in Indonesia and the rest of the Asia-Pacific region may occur again in the future. Since August 2016, interest rate reference was changed to BI 7-day (reverse) Repo Rate.

An economic downturn in Indonesia could also lead to additional defaults by Indonesian borrowers and could have a material adverse effect on our business, financial condition and results of operations and prospects. A loss of investor confidence in the financial systems of emerging and other markets, or other factors, including a further deterioration of the global economy due to the European sovereign debt crisis, may cause increased volatility in the Indonesian financial markets and a slowdown in economic growth or negative economic growth in Indonesia. Any such increased volatility or slowdown or negative growth could have a material and adverse effect on our business, financial condition, results of operations and prospects.

***Terrorist activities in Indonesia could destabilize the country.***

Since 2002, several bombing incidents have taken place in Indonesia, most significantly in October 2002 in Bali. Other bombing incidents, although on a lesser scale, have also been committed in Indonesia on a number of occasions over the past few years, including at churches, government buildings, shopping centers and business and financial centers, including the IDX. On October 1, 2005, bombs exploded in tourist areas in Bali, killing at least 23 people and injuring at least 101 others. Indonesian, Australian and U.S. government officials have indicated that these bombings may be linked to an international terrorist organization. Demonstrations have taken place in Indonesia in response to U.S., British and Australian military action in Iraq and Afghanistan. In January 2007, sectarian terrorists conducted bombings in Poso. In July 2009, bomb blasts in the JW Marriot and Ritz Carlton hotels in Jakarta killed six people and injured at least 50 people. In January 2016, four civilians were killed when militants detonated explosives in or near a Starbucks cafe in Central Jakarta. In May 2018, suicide bombers including a mother and her two children, bombed three churches in Surabaya killing 15 civilians and injuring 57 others. That same night, a bomb shook an apartment complex in Sidoarjo killing at least three members of the same family. In November 2019, a suicide bombing at Medan Police Headquarters wounded four police officers, a part-time worker and a civilian. In March 2021, a woman opened fire against the National Police Headquarters, before she was shot dead by responding officers. Further terrorist acts may occur in the future. Terrorist acts could destabilize Indonesia and increase internal divisions within the Government as it evaluates responses to that instability and unrest. Violent acts arising from, and leading to, instability and unrest have in the past had, and may continue to have, a material and adverse effect on investment and confidence in, and the performance of, the Indonesian economy, which, in turn, could have a material and adverse effect on our business, financial condition, results of operations, cash flows and prospects.

***Indonesia remains subject to considerable political and social instability.***

Indonesia's democratic transition began in May 1998, when its long-time president, Suharto, resigned from the presidency after 32 years in office. Supported by the military, the bureaucracy and his Golkar party, Suharto had ruled the archipelago after suppressing a communist coup attempt in October 1965. The Asian Financial Crisis of 1997 to 1998 led to the collapse of the Indonesian economy, destroying the foundations upon which Suharto's power had rested. As a result, cracks in the regime emerged, which in turn emboldened street protests and encouraged Western capitals to reconsider their support for their former anti-communist ally. After losing his support bases, Suharto resigned.

While Suharto's resignation occurred amid significant mass mobilization, the regime change itself took place as a pact-based transition. Opposition forces allowed Suharto's vice president, B.J. Habibie, to take power in exchange

for assurances of substantial political reform. Indeed, Habibie's reforms – most of which he began implementing only a week after Suharto's fall – far exceeded the opposition's expectations. He scheduled free and fair elections, lifted restrictions on the press, released political prisoners and even launched a decentralization process that turned the heavily centralized state into one of the most decentralized polities in the developing world. The June 1999 parliamentary elections were globally praised as free, fair and competitive, and Habibie handed over power to his successor Abdurrahman Wahid in October 1999. However, Wahid was appointed by the only partially elected People's Consultative Assembly, making political conflict unavoidable. He was replaced by Vice President Megawati Sukarnoputri, who governed between 2001 and 2004.

During Megawati's presidency, important reforms were launched. Direct presidential elections were introduced; a Constitutional Court was established; an Anti-Corruption Commission was founded; and direct local elections for governors, mayors and district chiefs were enshrined in decentralization laws. When these reforms became fully operational in 2004 and 2005, Indonesia finally completed its democratic transition. The main beneficiary of this trend was Susilo Bambang Yudhoyono, who won the first direct presidential elections in 2004 and was re-elected in 2009. At the end of Yudhoyono's second term, two populist challengers emerged who competed for his succession: Prabowo Subianto, who proposed a return to stronger centralist government; and Jokowi, who campaigned for the continuation of the democratic status quo while promising improvements to public service delivery. Jokowi eventually won the elections in July 2014 and remains the incumbent president. However, various political and social tensions remain.

Political and related social developments in Indonesia have been unpredictable in the past, and social and civil unrest may occur in the future and on a wider. Such disturbances may, directly or indirectly, have a material and adverse effect on our business, financial condition, results of operations and prospects.

***Downgrades of credit ratings of the Government or Indonesian companies could adversely affect our business.***

Beginning in 1997, certain recognized credit rating organizations, including Moody's and Standard & Poor's Rating Services, ("**Standard & Poor's**"), downgraded Indonesia's sovereign rating and the credit ratings of various credit instruments of the Government and a large number of Indonesian banks and other companies. Indonesia's sovereign foreign currency long-term debt is currently rated "Baa2 (stable outlook)" by Moody's and "BBB (negative outlook)" by Standard & Poor's and its foreign currency short-term debt is currently rated "Baa2" by Moody's and "A-2" by Standard & Poor's. These ratings reflect an assessment of the Government's overall financial capacity to pay its obligations and its ability or willingness to meet its financial commitments as they become due.

Moody's or Standard & Poor's or any other credit rating organization may downgrade the credit ratings of Indonesia or Indonesian companies, including our Company. Any such downgrade could have an adverse impact on liquidity in the Indonesian financial markets, the ability of the Government and Indonesian companies—including us—to raise additional financing and the interest rates and other commercial terms at which such financing is available. Interest rates on Indonesian Rupiah-denominated debt would also likely increase.

***Indonesia is located in an earthquake zone and is subject to significant geological risk that could lead to social and economic difficulties.***

Substantially all of our existing facilities and operations are located entirely in the Indonesian archipelago. The Indonesian archipelago is one of the most volcanically active regions in the world, located in the convergence zone of three major lithospheric plates. As a result, it is subject to significant seismic activity that can lead to destructive earthquakes and tsunamis, or tidal waves. On December 26, 2004, an underwater earthquake off the coast of Sumatera caused the tsunami that devastated coastal communities in Indonesia, Thailand and Sri Lanka. In Indonesia, more than 220,000 died or went missing in the disaster. Aftershocks from the tsunami have also claimed casualties and left thousands of people homeless. In May 2006, a 6.3 magnitude earthquake struck roughly 30 miles southwest of Mount Merapi, in Central Java, killing at least 6,000 people and leaving at least 200,000 people homeless in the Yogyakarta region and prompted eruption of the volcano. In July 2006, a 7.7 magnitude underwater earthquake that struck approximately 220 miles south of Jakarta and the resulting tsunami that followed killed at least 500 people and left at least 35,000 people homeless. A 7.9 magnitude earthquake struck Bengkulu and West Sumatera on September 12, 2007 resulting in 25 deaths, numerous injuries and the evacuation of some 115,000 people. In September 2009, two major earthquakes struck West Java and West Sumatera, with magnitudes of 7.0 and 7.6 respectively, leading to the death of more than 600 people. In January and February 2007, many parts of Jakarta and its surrounding areas suffered

extensive flooding. Approximately 100 people were killed and 100,000 people in Jakarta and its surrounding areas were evacuated to safe and dry areas due to the flood. This 2007 flood resulted in more damage, deaths and victims left homeless than prior floods in Jakarta. Flooding and landslides in Central and East Java that occurred between the end of 2007 to early 2008 caused 100 deaths and estimated damage amounting to Rp2 trillion. Most recently, on October 25, 2010, a 7.7 magnitude earthquake struck Mentawai Island, just off West Sumatera, and on October 26, 2010, Mount Merapi, located in Java, erupted.

While these events did not have a significant economic impact on the Indonesian capital markets, the Government has had to spend significant amounts on emergency aid and resettlement efforts in response to such acts of God. Most of these costs have been underwritten by foreign governments and international aid agencies. However, such aid may cease, or it may not be delivered to recipients on a timely basis. If the Government is unable to timely deliver foreign aid to affected communities, political and social unrest could result. Recovery and relief efforts are likely to continue to impose a strain on the Government's finances, and may affect its ability to meet its obligations on its sovereign debt. In addition, future geological occurrences may have a larger impact on the Indonesian economy. A significant earthquake or other geological disturbance in any of Indonesia's more populated cities and financial centers could severely disrupt the Indonesian economy and undermine investor confidence, thereby materially and adversely affecting our business, financial condition, results of operations, cash flows and prospects.

***We may be adversely affected by unforeseen circumstances such as an outbreak of infectious diseases, including human avian influenza, H1N1 and COVID-19.***

The spread of human avian influenza or any other contagious or virulent diseases may potentially affect our businesses, especially to the extent it is connected in any manner to the product categories we sell.

Large parts of Asia have experienced unprecedented outbreaks of human avian influenza. According to the United Nations Food and Agricultural Organization, the avian flu virus is entrenched in 31 of Indonesia's 33 provinces and efforts to contain avian flu are failing in Indonesia. This means that there is an increasing possibility that the virus may mutate into a deadlier form. As of January 2012, the World Health Organization (the "WHO") confirmed that the death toll from human avian influenza in Indonesia has increased to 152 out of 184 confirmed cases since 2006.

In April 2009, there was an outbreak of H1N1 virus that originated in Mexico but has since spread globally to countries including Indonesia, Hong Kong, Japan, Malaysia, Singapore and elsewhere in Asia. In August and September 2009, there were a number of deaths in Indonesia resulting from H1N1. The H1N1 virus is believed to be highly contagious and may not be easily contained. As of October 25, 2009, the WHO had confirmed over 5,700 fatalities in more than 440,000 cases of H1N1 reported to the WHO, which only reports laboratory confirmed cases of H1N1.

In March 2020, the COVID-19 outbreak was declared a pandemic by the WHO. The outbreak and the response of governments in dealing with the pandemic is interfering with general activity levels within the global community, the economy and the operations of the Group's business. Due to COVID-19, demand for local shrimp and surimi products in 2020 declined due to social restrictions affecting the Group's main customers in the Hotel, Restaurant & Cafe (HORECA) industry. This is expected to recover gradually in 2021. On the other hand, global shrimp supply decreased as COVID-19 affected major shrimp producing countries, increasing the average selling price for the Group's export food products in 2020.

Although the continued scale and duration of these developments remain uncertain as at the date of this Information Memorandum, they have had an impact on the Group's earnings, cash flow and financial condition.

It is difficult to precisely quantify the impact of the outbreak's longer term effects or governments' varying efforts to combat the outbreak and support businesses. This being the case, the Group does not consider it practicable to provide a quantitative or qualitative estimate of the potential impact of this outbreak on the Group at this time.

To help manage the impact of COVID-19 on trading, the Group continues to focus on streamlining its operations and managing its cost base proactively.

***Lenders under the Term Loan Facilities may not be able to enforce a judgment of a foreign court against us or our commissioners, directors, or officers.***

Judgments of foreign courts, including Singapore courts, are not enforceable in Indonesia. In addition, there is doubt as to whether Indonesian courts will enter judgments in original actions brought in Indonesian courts predicated solely upon the civil liability provisions of other jurisdictions. As a result, the Facility Agent and/or the Onshore Security Agent may be required, prior to the enforcement of the Indonesian security documents, to pursue claims based upon the Term Loan Facilities through the Indonesian courts. Lenders under the Term Loan Facilities may also be required to pursue claims against us in Indonesia under Indonesian law.

The claims and remedies available under Indonesian law may not be as extensive as those available in other jurisdictions. The Indonesian courts may refuse to protect the interests of investors in the same manner or to the same extent as would other courts. Indonesia's legal system is a civil law system based on written statutes, and decided legal cases do not constitute binding precedent. The administration of laws and regulations by courts and Government agencies may be subject to considerable discretion. In addition, because relatively few disputes relating to commercial matters and advanced financial transactions and instruments are brought before Indonesian courts, such courts do not necessarily have the experience of courts in other jurisdictions. There is no certainty as to how long it will take for proceedings in Indonesian courts to be concluded and the outcome of proceedings in Indonesian courts may be more uncertain than that of similar proceedings in other jurisdictions. Accordingly, it may not be possible for investors to obtain timely and equitable enforcement of their legal rights. Moreover, recent judicial decisions in Indonesia have been adverse to the interests of foreign investors and have called into question the soundness of Indonesia's legal system.

In addition, lenders under the Term Loan Facilities may have more difficulty in protecting their interests against actions by our commissioners, directors or officers than they might have as lenders to a corporation established under the laws of another jurisdiction.

***Corporate disclosure and accounting standards in Indonesia may vary from those in other jurisdictions.***

There may be different publicly available information about Indonesian public companies, such as ours, than is regularly made available by public companies in Singapore and in other jurisdictions. These differences include the timing and content of disclosure of beneficial ownership of equity securities of officers, directors and significant shareholders; officer certification of disclosure and financial statements in periodic public reports; and disclosure of off-balance sheet transactions in management's discussion of results of operations in periodic public reports. Our financial statements for 2018 and 2019 and for the ten months ended October 31, 2020 and our management accounts for the ten months ended October 31, 2019 and for the year ended December 31, 2020 are prepared in accordance with Indonesian FAS.

We have not quantified or identified the effects of the aforementioned differences between Indonesian FAS and U.S. GAAP in this Information Memorandum. Accordingly, there can be no assurance, for example, that net income distributable by us and share capital and reserves reported in accordance with Indonesian FAS would not be lower if determined in accordance with U.S. GAAP. Potential investors should consult their own professional advisors if they want to understand the differences between Indonesian FAS and U.S. GAAP and how they might affect the information contained herein. See "Summary of Certain Principal Differences Between Indonesian FAS and U.S. GAAP."

***A recent Indonesian Law requiring agreements involving Indonesian parties to be written in the Indonesian language may raise issues as to the enforceability of agreements entered into in connection with the Term Loan Facilities and New Guarantees.***

On July 9, 2009, the Government enacted Law No. 24/2009 requiring that agreements involving Indonesian parties be written in the Indonesian language. Where an agreement also involves foreign parties, it may also be executed in both the Indonesian language and a foreign language, provided that the agreement in the foreign language and the agreement in the Indonesian language are equally authoritative. Law No. 24/2009 is silent on the governing language if there is more than one language used in a single agreement. Article 40 of Law No. 24/2009 states that further stipulation on the use of Bahasa Indonesia shall be regulated by the implementing regulations to be issued. On

30 September 2019, the President of Republic Indonesia issued PR No. 63/2019 as the implementing regulation of Law No. 24/2009. PR No. 63/2019 confirms that any transaction document entered into by an Indonesian party and a foreign party must be made in a bilingual format (or any other format the parties choose so long as there is a corresponding version in Indonesian language). This is to ensure the common understanding of the parties to the agreement.

Although the Term Loan Facilities and any other agreements will be prepared in dual English and Indonesian versions as required under Law No. 24/2009 and PR No. 63/2019, we cannot assure you that, in the event of inconsistencies between the Indonesian language and English language versions of these agreements, an Indonesian court would hold that the English version would prevail. Some concepts in the English language may not have a corresponding term in the Indonesian language and the exact meaning of the English text or may not be fully captured by such Indonesian version. If this occurs, we cannot assure you that the terms of the Term Loan Facilities, will be as described in this Information Memorandum, or will be interpreted and enforced by the Indonesian courts as intended.

***Indonesian regulations may affect the ability of non-bank corporations to obtain financing.***

On December 29, 2014, Bank Indonesia issued Regulation No. 16/21/PBI/2014 on Application of Prudential Principles in Management of Offshore Loan of Non-Bank Corporations (“**PBI 16/21/2014**”) which revokes Bank Indonesia Regulation No. 16/20/PBI/2014, and on March 6, 2016, Bank Indonesia issued the implemented circular letters, as amended by Bank Indonesia Regulation No. 12/4/PBI/2016. PBI 16/21/2014 (as subsequently amended), which requires borrowers who are non-bank corporations in Indonesia to strengthen their risk management when obtaining offshore foreign currency denominated debt by ensuring that such entities adopt certain prudential principles to mitigate the risks related to such offshore foreign currency denominated debt. Pursuant to PBI/16/21/2014m (as subsequently) amended, non-bank corporations that have offshore loans in foreign currency are required to adopt prudential principles including complying with certain requirements relating to (i) hedging ratio, (ii) liquidity ratio and (iii) credit ratings as follows:

- Hedging ratio. Minimum hedging ratio set at 25% of (i) the negative difference between the foreign exchange assets and the foreign exchange liabilities that will become due within three months from the end of the relevant quarter; and (ii) the negative difference between the foreign exchange assets and the foreign exchange liabilities that will become due in the period between the commencement of the fourth and the end of the sixth month after the end of the relevant quarter. After January 1, 2017, hedging transactions shall be undertaken with banks in Indonesia;
- Liquidity ratio. Minimum liquidity ratio (of at least 70% liquidity) by reserving sufficient foreign exchange assets against foreign exchange liabilities that will become due within three months from the end of the relevant quarter; and
- Credit rating. Minimum credit rating of “BB-” issued by a rating agency recognized by Bank Indonesia. Such credit rating will be in the form of a rating over the relevant corporation and/or bonds. Transactions exempted from this requirement are (i) the refinancing of offshore loans in foreign currency; (ii) offshore loans in foreign currency from (a) international bilateral/multilateral institutions; and (b) syndicated loan with the contribution of international bilateral/multilateral institution exceeding 50%, in relation to financing for infrastructure projects; (iii) offshore loans in foreign currency in relation to Government (central and regional) infrastructure projects; (iv) offshore loans in foreign currency that are guaranteed by international bilateral/multilateral institution; (v) offshore loans in foreign currency that are in the form of trade credit, which refers to debt arising from credit that is granted by offshore suppliers over transactions relating to goods and/or services; (vi) offshore loans in foreign currency that are in the form of other loans, which refer to any loan other than a loan agreement, debt securities and trade credit that are, among others, payment of insurance claim and unpaid dividend; (vii) offshore loans in foreign currency of financing companies, as long as (a) the offshore loans have a minimum “sound” financial soundness rating which were last issued by the OJK; and (b) the offshore loans fulfil the maximum gearing ratio as regulated by the OJK; and (viii) offshore loans in foreign currency of Indonesian Export Financing Institution (Lembaga Pembiayaan Ekspor Indonesia or LPEI).

Non-bank corporations that have offshore loans in foreign currency must report to Bank Indonesia on the implementation of prudential principles and the exemptions, along with the relevant supporting documents. The procedure for submitting the report and supporting documents have to be conducted in line with Bank Indonesia regulations on the reporting of foreign exchange traffic activities and on the reporting of the implementation of prudential principles in the management of offshore loans by non-bank corporations. Failure to comply with the implementation of prudential principles will subject non-bank corporations to administrative sanctions in the form of warning letters. PBI 16/21/2014 is effective as of January 1, 2015, except that (i) the administrative sanction requirement will only be effective from the fourth quarter of 2015, and (ii) the minimum credit rating requirement will only apply to offshore loans that are signed or issued on or after January 1, 2016.

As a result of these developments and imposition of restrictions, there can be no assurance that to the extent that our current strategy changes and we seek financing in the future we will be able to obtain adequate financing, either on a short-term or long-term basis.

### **Risks Relating to the Scheme of Arrangement**

#### ***If the Scheme of Arrangement is not implemented one or more members of the Group may be unable to continue as a going concern.***

If we do not obtain court sanction for the Scheme of Arrangement and/or the Scheme of Arrangement cannot be implemented in accordance with its terms, the Borrower may be unable to continue as a going concern in Singapore. Moreover, the Guarantors may be unable to satisfy their obligations in respect of the Note Guarantees and may be unable to continue as a going concern in Indonesia. Bankruptcy proceedings in respect of the Borrower and/or the Guarantors might also be initiated as a result of enforcement action by creditors and/or suppliers.

The collateral for the Existing Notes includes a debenture in respect of the assets of the Borrower and pledges of the shares in the principal Indonesian operating subsidiaries of the Company. However: (i) the Borrower is a special purpose vehicle whose only asset is the benefit of certain unsecured claims against the Company and certain of its Indonesian operating subsidiaries; and (ii) substantially all of the assets of the onshore operating subsidiaries are subject to security in favor of onshore creditors. Accordingly, the proceeds of enforcement of the collateral for the Existing Notes are unlikely to be sufficient to satisfy the claims of the holders of the Existing Notes in full and the holders of the Existing Notes will rank as unsecured creditors in respect of their unsatisfied claims.

The realizable value of assets in bankruptcy proceedings generally represents a significant discount to their book value. In addition, the bulk of our assets are specifically for aquaculture and potential buyers for these specialized assets will likely be limited to those persons engaged in related businesses. All participants in our industry face a difficult operating environment and we anticipate that there would be a limited universe of potential buyers for our assets in the event that bankruptcy proceedings were commenced. Accordingly, the proceeds of realization of our assets in any bankruptcy proceedings may be insufficient to provide a material return to unsecured creditors.

#### ***The Scheme of Arrangement may be objected to and may not be completed.***

The Scheme of Arrangement may fail to become effective and/or may fail to be implemented in accordance with its terms. In particular, the Scheme of Arrangement will not be effective unless approved by a majority in number representing three fourths by value of those creditors (“**Scheme Creditors**”) that are present and voting (in person or by proxy) at the Scheme Meeting and subsequently sanctioned by the Singapore courts.

If the Scheme of Arrangement is approved at the Scheme Meeting, it is possible for a person with an interest in the Scheme of Arrangement (whether a Scheme Creditor or otherwise) to file objections to the Scheme of Arrangement with the Singapore courts, to attend or be represented at the hearing of the court to sanction the Scheme of Arrangement in order to make representations that the Scheme of Arrangement should not be approved and to appeal against any court order sanctioning the Scheme of Arrangement. Therefore, there can be no assurance that objections will not be made at or before the court sanction hearing or that an appeal will not be made against the court order sanctioning the Scheme of Arrangement and that any such objections or appeal will not delay or prevent the implementation of the Scheme of Arrangement once approved.

In addition, even if the Scheme of Arrangement becomes effective and is not subject to objection or appeal, it may fail to be implemented in accordance with its terms. Implementation is subject to certain factors that are beyond the control of the Borrower and the Company.

***The enforcement of the Scheme of Arrangement would take place under the laws of Singapore and the laws of other jurisdictions which may differ significantly from the law of the U.S. and other jurisdictions with which the lenders under the Term Loan Facilities may be familiar.***

Any proceedings to enforce the terms of the Scheme of Arrangement would most likely be taken in accordance with the laws of Singapore, which differ in significant respects from, and may not be as favorable to the lenders under the Term Loan Facilities as, similar provisions under the laws of other jurisdictions with which the lenders under the Term Loan Facilities may be familiar.

## **USE OF PROCEEDS**

The proceeds from the Term Loan Facilities will be used as follows:

- to settle the purchase of the Existing Notes tendered in the tender offer by the Borrower for the Existing Notes;
- for the purpose of prefunding the Debt Service Account;
- to pay the commitment fees;
- to pay the consent fees payable pursuant to the RSA;
- for the purpose of repaying the Existing Notes;
- to settle the purchase of the MEBs tendered in the MEB Tender Offer (as defined in the Term Loan Facilities); and
- for the purpose of settling the Group's contingency expenses and professional fees and expenses.

## EXCHANGE RATE INFORMATION AND EXCHANGE CONTROL INFORMATION

Bank Indonesia is the sole issuer of the Rupiah and is responsible for maintaining its stability. Since 1970, Indonesia has implemented three exchange rate systems: a fixed rate between 1970 and 1978, a managed floating exchange rate system between 1978 and 1997 and a free-floating exchange rate system since August 14, 1997. Under the managed floating rate system, Bank Indonesia maintained the stability of the Rupiah through a trading band policy, pursuant to which Bank Indonesia would enter the foreign currency market and buy or sell Rupiah, as required, when trading in the Rupiah exceeded bid and offer prices announced by Bank Indonesia on a daily basis. On August 14, 1997, Bank Indonesia terminated the trading band policy and instituted the current free-floating exchange rate system, allowing the Rupiah to float without an announced level at which it would intervene, which resulted in a substantial decrease in the value of the Rupiah relative to the U.S. dollar. Under the current system, the exchange rate of the Rupiah is determined by the market, reflecting the interaction of supply and demand in the market. Bank Indonesia may take measures, however, to maintain a stable exchange rate.

The following table shows the exchange rate of Rupiah for US dollars based on the middle exchange rates during the periods indicated. The Rupiah middle exchange rate is calculated based on Bank Indonesia's buying and selling rate. No representation is made that the Rupiah or US dollar amounts referred to herein could have been or could be converted into US dollars or Rupiah, as the case may be, at any particular rate or at all.

### Exchange controls

Indonesia has limited foreign exchange controls. The Indonesian Rupiah has been, and in general is, freely convertible within or from Indonesia. However, to maintain the stability of the Rupiah and to prevent the utilization of the Rupiah for speculative purposes by non-residents, Bank Indonesia has introduced regulations to restrict the movement of Indonesian Rupiah from banks within Indonesia to offshore banks, an offshore branch of an Indonesian

bank or any investment denominated in Rupiah with foreign parties and/or Indonesian parties domiciled or permanently residing outside Indonesia, thereby limiting offshore trading to existing sources of liquidity. In addition, Bank Indonesia has the authority to request information and data concerning the foreign exchange activities of all persons and legal entities that are domiciled, or who plan to be domiciled, in Indonesia for at least one year.

Pursuant to Bank Indonesia Regulation No. 16/22/PBI/2014 regarding Reporting on Foreign Exchange Activities and Reporting on the Implementation of Prudential Principles in the Management of Non-Bank Corporation Offshore Borrowings, all Indonesian residents who engage in foreign exchange traffic activities, whether individuals or legal entities, must report to Bank Indonesia: (i) trade activities in goods, services and other transactions between residents and non-residents of Indonesia, (ii) the position and changes in the balance of foreign financial assets and/or foreign financial liabilities and (iii) offshore borrowing transactions. Bank Indonesia requires reports to be submitted monthly through an online system by the 15th day of the following month, at the latest. In the event a correction is required, the correction must be submitted through the online system no later than the 20th day of the reporting month. For offshore borrowings, the report shall be submitted at the beginning of each year, no later than March 15, and any amendment thereto by no later than July 1.

### **Purchasing of foreign currencies against Rupiah through banks**

Pursuant to Bank Indonesia Regulation No. 16/16/PBI/2014 dated September 17, 2014 concerning the Foreign Currency Exchange Transactions Against Rupiah between Banks and Domestic Parties as most recently amended by Bank Indonesia Regulation No. 17/15/PBI/2015 dated October 2, 2015 (“**PBI 17/15/2015**”), as implemented by the Circular Letter of Bank Indonesia No. 16/14/DPM as most recently amended with Circular Letter Bank Indonesia No. 17/49/DPM dated December 21, 2015, the conversion of Rupiah to foreign currencies or the purchase of foreign currency in an amount exceeding a specified threshold must be based on an underlying transaction, which is defined as an activity the basis for which foreign currencies are purchased. These thresholds are: (i) a purchase of foreign exchange against Rupiah of more than US\$25,000 or its equivalent per month per customer for spot transactions; (ii) the purchase of foreign exchange against Rupiah of more than US\$100,000 or its equivalent per month per customer for derivative transactions, and (iii) the sales of foreign currency against Rupiah of more than US\$5,000,000 or its equivalent per transaction per customer for forward transactions; and (iv) the sales of foreign currency against Rupiah of more than US\$1,000,000 or its equivalent per transaction per customer for option transactions.

The following transactions may be deemed underlying transactions under PBI 17/15/2015: (i) domestic and international trade of goods and services; and/or (ii) investments such as direct investment, portfolio investments, loans, capital and other investments inside and outside Indonesia. Underlying transactions do not include: (i) the placement of funds in banks in the form of, among others, saving accounts, demand deposit accounts, time deposits, and negotiable certificate deposits; (ii) money transfer activities by remittance companies; and (iii) granting of undisbursed credit facilities (i.e. in form of standby loan and undisbursed loan).

Indonesian companies purchasing foreign currencies in excess of the threshold stipulated under the PBI 17/15/2015 will be required to submit certain supporting documents to the selling bank, including among others, the relevant underlying transaction document and a duly stamped statement confirming that the underlying agreement is valid and that the foreign currency purchased will only be used for settlement of the payment obligations under the underlying agreement. For purchases of foreign currency not exceeding the threshold stipulated under the PBI 17/15/2015, such company must declare in a duly stamped letter or an authenticated letter stating that its aggregate foreign currency purchases do not exceed the threshold stipulated under the PBI 17/15/2015 in the Indonesian banking system.

On September 17, 2014, Bank Indonesia issued Bank Indonesia Regulation No. 16/17/PBI/2014 regarding Foreign Exchange Transactions Against Rupiah between Banks and Foreign Parties as amended by: (i) Bank Indonesia Regulation No. 17/7/PBI/2015 dated May 29, 2015, (ii) Bank Indonesia Regulation No. 17/14/PBI/2015 dated August 25, 2015, and (iii) Bank Indonesia Regulation No. 17/16/PBI/2015 (“**PBI 17/16/2015**”) dated October 2, 2015, as implemented by the Circular Letter of Bank Indonesia No. 16/15/DPM dated September 17, 2014 as amended by: (i) Circular Letter No.17/16/DPM dated June 12, 2015, (ii) Circular Letter No. 17/21/DPM dated August 28, 2015, and (iii) Circular Letter No. 17/50/DPM dated December 21, 2015. While PBI 17/15/2015 and PBI 17/16/2015 collectively govern foreign exchange transactions against Rupiah in Indonesia, PBI 17/15/2015 governs Indonesian bank customers, whereas PBI 17/16/2015 governs foreign exchange transactions by banks and foreign parties.

Similar to PBI 17/15/2015, PBI 17/16/2015 also requires an underlying transaction for a foreign exchange transaction against Rupiah if it exceeds specified thresholds. These thresholds are: (i) a purchase of foreign exchange against Rupiah of more than US\$25,000 per month per customer for spot transactions; and (ii) the purchase of foreign exchange against Rupiah of more than US\$1 million per month per customer for derivative transactions. PBI 17/16/2015 has a single threshold amount for derivative transactions of US\$1 million per month per customer for any kind of derivative transaction, and (iii) specifically for forward transactions, of more than US\$5 million or its equivalent per transaction per foreign party or per outstanding sale or purchase per bank.

The following transactions may be deemed underlying transactions under PBI 17/16/2015: (i) domestic and international trade of goods and services; and/or (ii) investments in the form of foreign direct investments, portfolio investments, loans, capital and other investments inside and outside Indonesia; including income and expense estimation. Underlying transactions do not include, among other things, (a) the use of Bank Indonesia Certificate for foreign currency derivative transactions against Rupiah and (b) placement of funds in banks (vostro) in the form of, among others, regular deposits, demand deposits, term deposits, and negotiable certificate deposits.

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

*The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our audited consolidated financial statements as of and for the years ended December 31, 2018 and 2019 and for the ten months ended October 31, 2020 and our management accounts for the ten months ended October 31, 2019 and for the year ended December 31, 2020, together with the related notes thereto, all of which are included elsewhere in this Information Memorandum. This discussion and analysis contains data derived from our consolidated financial statements and forward-looking statements that involve risks and uncertainties. Our actual results may differ significantly from those projected in the forward-looking statements. Factors that might cause future results to differ significantly from those projected in the forward-looking statements include, but are not limited to, those discussed below and elsewhere in this Information Memorandum, particularly in "Risk Factors."*

*The audited consolidated financial statements for the years ended December 31, 2018 and 2019 and for the ten months ended October 31, 2020 have been prepared in accordance with Indonesian Financial Accounting Standards ("FAS"), which comprise the Statements and Interpretations issued by the Financial Accounting Standards Board of the Indonesian Institute of Accountants ("DSAK") and the Regulations and Guidelines on Financial Statement Presentation and Disclosures issued by Financial Services Authority ("OJK").*

### **Basis of Presentation**

The following discussion is based on our audited consolidated financial statements as of and for the years ended December 31, 2018 and 2019 and for the ten months ended October 31, 2020 and our management accounts for the ten months ended October 31, 2019 and for the year ended December 31, 2020.

### **Introduction**

We are Indonesia's largest producer of aquaculture products which includes fish feed, shrimp feed, shrimp fry and seafood-based products. We produce more than 600,000 Mt of feeds annually and sell them to consumers across Indonesia. We purchase harvested shrimp and fish from the farmers, process them into various food products and sell them to domestic and export markets. All of our operations and assets are located in Indonesia.

In 2020, our total net sales were Rp7,576.2 billion (US\$537.2 million) and our gross profit was Rp1,349.9 billion (US\$95.6 million), consist of:

- (iv) Feeds: net sales of Rp5,972.1 billion (US\$423.4 million) and gross profit of Rp1,116.1 billion (US\$79.1 million)
- (v) Food products: net sales of Rp1,298.6 billion (US\$92.1 million) and gross profit of Rp152.9 billion (US\$10.8 million) and
- (vi) Others: net sales of Rp305.5 billion (US\$21.7 million) and gross profit of Rp80.9 billion (US\$5.7 million).

In 2020, our EBITDA was Rp802.4 billion (US\$56.9 million) and our total comprehensive income for the year was Rp343.8 billion (US\$24.4 million).

### **Significant Factors Affecting Our Results of Operations**

Our results of operations are affected by a number of factors, the most significant of which are described below.

### ***Raw material prices and availability***

In 2020, 80.5% of our total manufacturing cost was the cost of raw materials used in our business, respectively. Typically, our three largest raw material costs are harvested shrimp, soybean meal and fish meal. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations - Results of Operations - Cost of goods sold.” The prices of harvested shrimp that are supplied by farmers largely reflect local market prices, though we negotiate the purchase price with farmers. We are not reliant on any individual supplier for our supply of harvested shrimp.

Although our feed products generally contain the same ingredients each year (primarily soybean meal, fish meal, corn and wheat flour), the recipes for our feed products are regularly reviewed and adjusted. As a result, the quantities of raw materials we purchase for our feed products vary depending on our sales volumes and our ingredient requirements. We procure soybean meal and fish meal on spot or short-term contracts with our suppliers. We have close and long-established relationships with most of our suppliers. Soybean meal is a commodity that is widely traded on global markets, such as the Chicago Board of Trade. Thus, prices of these contracts, whether procured locally or overseas, are closely benchmarked against global market prices. Fish meal is also a commodity that is traded internationally on certain exchanges, including the Chicago Mercantile Exchange. For our fish meal contracts, prices are generally benchmarked against the market prices at each locality. We are not reliant on any of our soybean meal or fish meal suppliers.

### ***Our product prices***

Our fish feed and shrimp feed products, which are sold to feed distributors and local farmers in Indonesia, also have prices that are benchmarked against the local market prices. For these products, we believe that we have been able to command premium pricing because of our superior product branding and quality.

The price levels of our products are a function of market conditions, which depend on factors such as demand and supply conditions, the quality of our products, our product mix (especially the product mix between our Conventional Products, Value-Added Products and Food Products), foreign exchange rates, our customer relationships, the markets to which we sell our products and competition. Our exported shrimp product prices, which are denominated in US dollars (although our net sales are reported in Rupiah), are benchmarked against international prices, which are regularly published by industry bodies such as Uner Barry. In US dollar terms, the average sales price of our shrimp products are US\$10.07/Kg, US\$8.93/Kg and US\$9.60/Kg in 2018, 2019 and 2020 respectively.

### ***Export food production and sales volumes***

Sale of our export food products accounted for 14.0% of our net sales in 2020. Substantially all of our export food products in 2020 are sold outside Indonesia, primarily in the EU, US and Asia (mostly Japan). As a result, a significant factor affecting our business is the amount of shrimp which can be produced or procured and subsequently processed. The volume of shrimp products available on the market is affected by the volume of harvested shrimp which can be produced or procured, which in turn is affected, among other factors, by the health of the farmers' ponds, shrimp stocking density, shrimp survival rates, weather conditions and our processing capacities.

In contrast to production volumes, our sales volumes, and hence our net income, may be affected by macroeconomic demand-side factors. We believe global demand for our shrimp products is determined largely by factors such as global economic conditions, population growth rates, changing consumption patterns, and income levels. Global demand for shrimp products is subject to some fluctuation. See “The Fish, Shrimp and Pet Business Industry.”

### ***Consumer preferences***

As we operate in the food industry, our shrimp product business is significantly affected by changes in consumer preferences. Consumer preferences can change for many reasons including changes in nutritional guidelines or health advisories. Any significant changes in consumers’ preferences in the EU, US and Asia (mostly Japan), with respect to shrimp products would likely have a material impact on us. We believe global demand for shrimp products is

increasing. See “The Fish, Shrimp and Pet Business Industry.” Demand for our feed products and our shrimp fry is also indirectly affected by consumer preferences, as local farmers respond to changing demand levels, especially any material change in the consumption of fish or shrimp.

### ***Regulatory environment***

Our cost of goods sold is affected by the regulatory environment in Indonesia, as well as the regulatory environments where we sell our products, including the EU, US and Asia (mostly Japan). Except for regulations pertaining to restrictions on land ownership, Indonesia currently has no regulations which have a material impact on our business. Changes in regulations regarding the preparation of our products could significantly impact our cost of goods sold, including our raw material and labor costs if, for example, they require us to make material changes to our operations. In addition, the imposition of tariffs by foreign countries which increases the cost of our products to our customers could have an adverse effect on our net sales. In contrast, tariffs or embargoes imposed against countries other than Indonesia could have a positive impact on our net sales. We are not aware of any new tariffs that will be required by any of the countries or regions where we sell our products.

### ***Significant changes in the Indonesian economy and political climate***

Substantially all of our operations and assets are located in Indonesia, and in 2020, approximately 86% of our net sales were generated from customers in Indonesia. Accordingly, our results of operations may be influenced by political and economic developments in Indonesia. In particular, any developments that affect the economic or social conditions of our employees or farmers could have a material impact on our business.

#### ***Planned capital expenditures***

Our Group intends to undertake maintenance and expansion related capital expenditures in the amount of approximately Rp305.9 billion in the period from 2021 to 2025. The breakdown of these expenditures will be set out in the annual budgets.

#### ***Indebtedness***

#### **Off-balance Sheet Arrangements**

As of December 2020, we have not entered into any off-balance sheet arrangement.

#### **Market Risks**

We are subject to various market risks, including interest rate risk, foreign exchange rate risk, commodity price risk, credit risk and inflation risk.

#### ***Interest rate risk***

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Our exposure to the risk of changes in market interest rates is related to bank loans. We manage this risk exposure by selecting the bank that can give the lowest loan interest rate.

#### ***Foreign exchange rate risk***

In 2020, approximately 14% of our net sales were denominated in US dollars, due to sales of frozen shrimp products, while 86% of our net sales were denominated in Rupiah, due to our sales of primarily fish feed, shrimp feed, pet food, shrimp fry and other aquaculture products being primarily in Indonesia.

In 2020, approximately 31% of our costs of goods sold were denominated in US dollars, including our raw material costs for frozen shrimp products, while approximately 69% of our costs of goods sold were denominated in Rupiah.

Our obligations relating to the Term Loan Facilities are denominated in US dollars. Any depreciation of the Rupiah against the US dollar will increase the Rupiah cost of our debt and debt service, which may have a material and adverse impact on our financial condition, net profit and cash flows.

As a result of the foregoing, we are exposed to fluctuations in the exchange rates between the US dollar and the Rupiah, especially because of the time lag between the time we pay for harvested shrimp and the time we sell our frozen shrimp products. Our net sales increase in Rupiah terms as the US dollar depreciates. In addition, our financial statements are presented in Rupiah. Changes in the value of the US dollar against the Rupiah can cause fluctuations in our results of operations and could have a material impact on our reported financial results.

### ***Commodity price risk***

The preparation of our products requires raw materials, principally harvested shrimp, fish meal and soybean meal. We do not enter into any hedging transactions with respect to the commodities we purchase. We procure soybean meal and fish meal on spot or short term contracts with our suppliers. As a result, we are subject to increases in the market price of these raw materials, although we are typically able to increase our sales prices to adjust to any increases in our raw materials costs. Our Conventional Products are also commodities, and the sales price of these products is also subject to commodity price risk.

### ***Credit risk***

Our top 10 customers accounted for approximately 14% of total sales in 2020. These customers comprise of shrimp product wholesalers and distributors and large food service operators in the EU, US and Asia (mostly Japan). None of our customers accounted for more than 10% of our net sales in the same period. We minimize our credit risk by requiring customers for our shrimp products to pay us via Telegraphic Transfer (only selected customers), Documents against Payment, Documents against Acceptance and Letters of Credit. Purchasers of our feed products normally pay cash before delivery or cash upon delivery. Credit is only provided for distributors with whom we have long-term relationships.

Our average collection periods for trade receivables in 2018, 2019 and 2020 were 34 days, 26 days and 24 days, respectively.

### ***Inflation risk***

According to the BPS—Statistics Indonesia, Indonesia's annual overall inflation rate as measured by the consumer price index was approximately 3.1% in 2018, 2.7% in 2019 and 1.7% in 2020. As a substantial part of our expenses are denominated in Rupiah, inflation typically has an adverse effect on our labor costs. However, we expect most cost increases due to inflation to be reflected in the price of our products when sold, although this is more difficult for our shrimp products which are sold internationally.

### ***Seasonality***

We experience seasonal fluctuations in our sales volume and revenue as our business is sensitive to local and global consumer spending patterns for our products. Peak dry seasons will have adverse impact on fish cultivation activities. On the other hand, during peak rainy seasons, shrimp cultivation will decrease. Accordingly, any adverse trends in sales or other factors affecting Indonesia or our target export geographies, such as an unexpected shift in the weather patterns of Indonesia, may affect our sales.

## **Critical Accounting Policies**

Our critical accounting policies are those that we believe are the most important to the portrayal of our financial condition and results of operations and that require our management's most difficult, subjective or complex judgments. In many cases, the accounting treatment of a particular transaction is specifically dictated by generally accepted accounting principles with no need for the application of our judgment. In certain circumstances, however, the preparation of financial statements in conformity with generally accepted accounting principles requires us to use our judgment to make certain estimates, assumptions and decisions regarding accounting treatment. These estimates, assumptions and decisions affect the reported amount of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities at the date of our financial statements. We base our estimates on historical experience and on various other assumptions that our management believes are reasonable under the circumstances. However, critical accounting policies are reflective of significant judgments and uncertainties and are sufficiently sensitive to result in materially different results under different assumptions and conditions. We believe that our critical accounting policies are those described below.

### ***Provision for impairment***

Provision for impairment is established when there is objective evidence that the outstanding amounts will not be collected. Receivables are written-off during the period in which they are determined to be not collectible.

**Fixed Assets**

*Direct ownership*

Fixed assets are stated at cost, less accumulated depreciation.

Depreciation (except for land which is not depreciated) is computed using the straight-line method, after taking into account their salvage values at certain percentage of carrying values (except for land improvements which have no salvage value), over the estimated useful lives of the assets as follows:

	<b>Years</b>
Land improvements and building improvements .....	5 - 20
Buildings .....	10 - 20
Machinery and equipment.....	5 - 20
Transportation equipment .....	2 - 20
Furniture, fixtures and office equipment.....	5
Electrical and water installation .....	5 - 10
Laboratory equipment .....	5

**Impairment of asset values**

We conduct a review to determine whenever there is any indication of assets impairment including for assets not used in operations at the end of the year. If such indication exists, we are required to determine the estimated recoverable value of the assets and recognize the impairment in assets value as a loss in the consolidated statements of income for the year.

### History of Our Company and the Group

We were incorporated under the laws of Republic of Indonesia on April 30, 1980, under the name of PT Proteina Prima. We were founded by the Charoen Pokphand Group, a group of companies focused on agrobusiness, agribusiness, aquaculture, telecommunications, logistics and retailing. In 1989, we changed our name to PT Central Proteinaprima.

We initially listed our ordinary shares on the IDX in May 1990. In 2004, we commenced a corporate restructuring exercise to focus our operations on aquaculture business principally the global shrimp farming industry. We believe the global shrimp farming industry offers us better opportunities and potentially higher margins. Our restructuring process included the following measures:

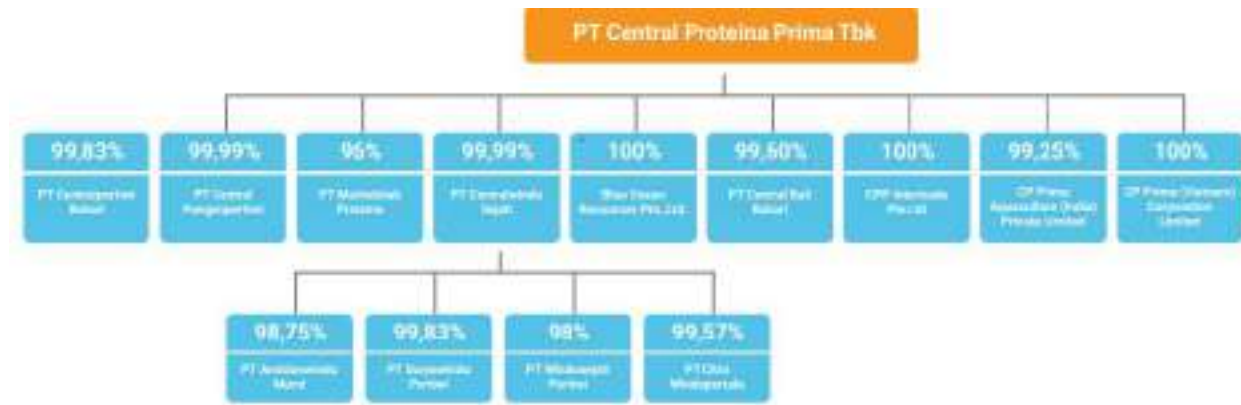

- in December 2004, we voluntarily delisted our ordinary shares from the IDX;
- in May 2006, we completed the major part of the restructuring by acquiring interest in the aquaculture business conducted by the Charoen Pokphand Group and divesting part of our non-aquaculture related business to the Charoen Pokphand Group; and
- in November 2006, we completed a listing of our ordinary shares on the regular market of the IDX.

Our ordinary shares currently trade on the IDX under the symbol "CPRO". See "Risk Factors—Risks Relating to Our Company and Our Business—Trading of our publicly traded shares may be suspended. In addition, our shares may be delisted from the IDX."

## Corporate Structure

Our current corporate structure is as follows:

Our principal subsidiaries include the following:

- CPB focuses on the business of food products, feeds, shrimp fry and others;
- CPgP and CWS focus on the feed business;
- MLP focuses on probiotics; and
- the Borrower is an export trading company.

CPB, CPgP, CWS and MLP are Subsidiary Guarantors. In 2009, we ceased the operating activities of PT Andalas Windumurni, PT Citra Windupertala, PT Suryawindu Pertiwi and PT Windusejati Pertiwi (the operating subsidiaries of CWS). In 2013, PT Suryawindu Pertiwi recommenced its operating activities.

The Company has undergone major business transformation and currently adopts a free market model. Specifically:

- On May 7, 2011, PT Aruna Wijaya Sakti ceased its operations due to ongoing disputes with the plasma farmers and closed the feedmill and processing facilities at the location.
- On October 17, 2016, the Company and CPB's farmers terminated the Nucleus Plasma Partnership Agreement, and changed the operational model from a fully subsidized model to an independent operational model.
- On May 1, 2017, the Company and WM farmers changed the operational model from high density culture operation to low density culture operation, leading to large reduction of manpower in the shrimp farming business unit.

Since the termination of the plasma arrangements, our Company's overall operations have become less impacted by virus outbreak as cultivation risk is now borne by the farmers themselves. Where there is a shortage in the supply of raw materials from the shrimp farmers, the Company is also able to freely source such materials from other parties for the purposes of meeting its frozen shrimp export obligations, hence, reducing the Company's reliance on the former plasma farmers.

After such business transformation, feed business became the most dominant business segment of the Company, representing almost 80% of the Company total net sales. In addition, the potential of the feed segment is bolstered by significant growth of the pet food business in which the Company holds a sizeable market share in the industry.

## **Our Competitive Strengths**

### ***Our position as a leading end-to-end aquaculture value chain player***

We are Indonesia's largest producer of aquaculture products which includes fish feed, shrimp feed, shrimp fry and seafood-based products. Our operations include shrimp and fish hatcheries, shrimp feedmills, fish feedmills, partner-operated shrimp farms and shrimp processing. We enjoy the following competitive advantages as a result of this position:

- *Business prospects and strategy.* We believe that Indonesia will remain as one of the world's leading seafood producers for the foreseeable future. Indonesia is geographically located for year around farming where most of the general population is not only keen to consume seafood, but the country has also become a strong base for fish and shrimp operation for export and domestic consumption.
- *Economies of scale and operating efficiency.* We believe our leading position in Indonesia's aquaculture end-to-end value chains allows us to benefit from economies of scale associated with the purchase of raw materials as well as actual operational and process efficiencies.
- *Higher profit margin.* We are renowned as the leading aquaculture company with high quality products. Our high quality products enable us to command premium selling prices due to our reputation for producing high quality aquaculture and shrimp products in an environmentally conscious and sustainable manner.

### ***Our strong customer base***

We have long-established and close relationships with most of our key customers. Many of our major customers have been our customers since 1980. We supply our customers with our products throughout the year and engage them on a regular basis about their expected needs, thus allowing us to plan accordingly.

### ***Our ability to comply with strict international manufacturing, social and environmental standards***

Our products and systems have been approved by a wide number of international standards organizations, including Hazard Analysis and Critical Control Point, BRC Global Standard, Good Manufacturing Practices, BAP/ACC and GlobalG.A.P. For more details on these standards, please see the section titled "Business—Food Safety and Quality Control—Standards" as set forth herein. In addition, substantially all of our raw materials are fully traceable and meet international traceability standards. In addition to meeting standard industry practices, our customers typically visit our facilities several times a year to ensure that our facilities meet their strict production and food safety standards, as well as standards for social and environmental compliance. (See "Business—Food Safety and Quality Control").

It is also our policy not to use antibiotics on our customers' shrimp farms in the farming process. This allows us to increase the quality of the shrimp that our customers harvest. The whole shrimp production value chain is able to achieve higher profit margins from selling the antibiotic-free final shrimp products to consumers in the US, Europe or Japan markets. Furthermore, by operating in an environmentally conscious manner, we believe that we can sustain our operations over the long-term.

### ***Our advantageous location in the Indonesian archipelago***

We believe that we benefit from certain competitive advantages by having substantially all of our operations located in Indonesia. The Indonesian archipelago is considered an ideal setting for aquaculture because of its access to water, long coastline and the availability of large tracts of land. Indonesia's proximity to the equator ensures that our ability to farm shrimp is not subject to significant seasonality, as consistent climate conditions in Indonesia allow shrimp to be harvested uninterrupted, year-round. As a result, we are better able to serve our customers compared to competitors in other geographic locations which are impacted by changes in temperature caused by seasonality, such as Thailand and the PRC (where the months of December and January are typically cooler). In addition, we believe

labor costs in Indonesia are lower as compared to other markets, which is an important competitive advantage, given the labor-intensive nature of our business.

### ***Our superior aquaculture technology***

We believe that we have superior aquaculture technology compared to many of our competitors and we believe that we are a pioneer in aquaculture know-how. We have a strong R&D team that is at the forefront of aquaculture sciences and applied technologies. We transfer the know-how to our customers to apply advanced shrimp and fish farming technology which improves the quality of our products and our operating efficiency. Our stringent biosecurity measures include our disease-free and disease-resistant shrimp fry stocking policy, closed-water management system and our water disinfection system. We have strict standard operating procedures that we utilize during the harvesting cycle, including in relation to preparing and cleaning our ponds.

### **Our Strategies**

We intend to implement the following strategies to drive our future growth and profitability:

- Increase sale of shrimp feed through the implementation of standardised Shrimp Farming Standard Operating Procedures (SOPs) as well as by raising technical competency assistance in shrimp farming generally.
- Increase sale of fish feeds by maintaining margin of fish feeds, developing high quality feeds through better product formulation, increasing production capacity to fulfill market demand as well as regularly promoting our “Let’s eat Seafood” campaign in the media.
- Increase export sales of frozen shrimp products in existing markets as well as exploring and developing new potential markets.
- Increase sale of pet foods by increasing product variety as well as growing our market share.
- Increase sale of shrimp fry by providing better quality brood stock which has stronger resistance to diseases as well as increasing shrimp fry production capacity not only at our existing hatchery facility but also through the construction of new hatchery facilities.
- Fulfill increased market demand for food products to meet changing domestic and international consumption behavior.
- Increase cost efficiency for all business lines in order to improve the Company's performance.

### Shrimp Aquaculture Process

Each major phase of our shrimp aquaculture process is set out in the chart and described below:

## Feed Production

High quality feed is critical to successful feed production. Our feed has been formulated to:

- minimise the Feed Conversion Ratio (“FCR”). The FCR is the ratio of dry weight of feed to the weight gain of the shrimp or fish. It measures the efficiency of shrimp or fish converting feed to weight gain. We continue to do research on various compositions in nutrients and raw materials in feed mix to lower FCR and improve profit margins;
- maintain consistency of shrimp quality (such as size, color, firmness of flesh and texture) and fish quality (such as growth rate); and
- continuous improvement of pet food quality to increase the market share, since pet food is produced using fish feed machineries.

In 2020, we sold 610,300 Mt of feeds to third parties. Our feeds are primarily composed of soybean meal, fish meal, wheat flour, rice bran and other grains and oils. After grinding and mixing, feeds are pelletized, cooked and weighed. All of our feed production is sold to third-party customers in Indonesia.

### Our feedmills

We operate feedmills West Java, East Java, Lampung and North Sumatera.

- West Java: This facility produces fish feed (floating and sinking) for commercial fish (such as catfish, milkfish, common carp and tilapia) and pet food (ornamental fish feed, such as koi fish) and is located in Cikampek.
- East Java: There are two facilities; one facility produces shrimp feed and is located in Dupak (Surabaya) and another facility produces fish feed (floating and sinking) and pet food (ornamental fish feed, bird, cat food and dog food) and is located in Sepanjang (Sidoarjo).
- Lampung: This facility produces shrimp and floating fish feed.
- North Sumatera: There are two facilities; one facility produces shrimp feed and another facility produces fish feed (floating and sinking), both facilities are located in Medan.

### Our Feedmill Facilities

The following table sets forth the average capacity, production volumes and utilization rates for our feedmill facilities (i.e. fish feed, shrimp feed and pet food) for the periods indicated:

Notes:

### Our feed brands

We sell our shrimp feed under four different brands, three of which are for Vannamei shrimp and one is exclusively for Monodon shrimp (feed for Monodon shrimp have higher protein content). The Vannamei shrimp feed brand is *Irawan* and is specifically formulated for intensive production of Vannamei shrimp. *Novo* and *Marine* brand are for semi intensive Vannamei shrimp culture. The Monodon shrimp brand is *Bintang*. *Bintang* is our premium Monodon shrimp feed brand and has the highest protein content among the four.

*Hiprovite*, which is made for catfish, is our most popular brand of floating fish feed. *Common Carp Floating Feed 779* has the highest protein content and is our most expensive brand of floating fish feed. Floating feed for milk fish is produced under *Turbo* brand. Our *Turbo* brand, also formulated exclusively for tilapia and common carp, is our most popular brand of sinking fish feed. *Bintang* is our premium brand of sinking fish feed. To cover economical and retail segment, *Allfeed* and *Ekofeed* brand were launched for all types of fish.

Currently, we sell pet food in the domestic market but there is potential to export our pet food in the future. Our CWS subsidiary produces and sells the pet food products. The production facility uses fish feed machineries under our fish feed mill. Our popular brand for ornamental fish feed is *Takari* and *Sakura* for koi fish and *Hiro* for premium koi fish. *CP Singing Bird* and *Classic* is our brand for bird food. *Bolt* is our famous brand for cat and dog food in the economy segment and contributes 80% of our pet food sales.

## Hatcheries and Breeding

We have nine shrimp hatcheries in strategic locations throughout Indonesia to produce high quality disease-free Vannamei shrimp fry. Our shrimp fry production is sold to third-party customers that distribute them to the shrimp farmers throughout Indonesia.

To produce shrimp fry, we import disease-free shrimp broodstock from third-party suppliers. These broodstock mate and spawn fertilized eggs. After 24 hours, the eggs hatch to produce nauplii. The nauplii undergo metamorphosis and become zoea, and then become mysis. Twelve days after hatching, mysis become shrimp fry, which are small shrimps about three millimeters long having all of the physical characteristics of adult shrimp. The shrimp fry are grown for approximately ten more days before being transferred to culture ponds.

### Our shrimp hatcheries

We operate nine shrimp hatchery facilities in eight provinces of Indonesia: Aceh, North Sumatera, Lampung, Banten, West Java, Central Java, East Java and South Sulawesi.

*Aceh* (two facilities): Operations at Aceh began in 2015.

*Medan*, North Sumatera: Operations at Medan began in 2000.

*Lampung*: Operations at Lampung began in 1995.

*Anyer*, Banten: Operations at Anyer began in 2015.

*Pangandaran*, West Java: Operations at Pangandaran began in 2017.

*Rembang*, Central Java: Operations at the Rembang site began in 2001.

*Situbondo*, East Java: The Situbondo site was acquired in late 2005 and began operations in July 2006.

*Makassar*, South Sulawesi: Operations at Makassar began in 2011.

The following table sets forth the total average capacity, production volumes and utilization rates for our shrimp hatchery facilities for the periods indicated:

	Capacity (million shrimp fry) For the year ended December 31,			Production (million shrimp fry) For the year ended December 31,			Utilisation <sup>(1)</sup> (%) For the year ended December 31,		
	2018	2019	2020	2018	2019	2020	2018	2019	2020

## **Probiotics**

Our MLP subsidiary produces and sells probiotics, which are beneficial bacteria and enzymes for growing shrimp. MLP is located in Serang, Banten. In 2020, MLP produced approximately 1.5 million litres of probiotics.

## **Food Processing**

Food processing includes products which are sold in export and domestic markets.

These products are broadly grouped into three categories according to the level of processing they undergo and the related increase in value:

- **Conventional Products:** Conventional Products are the most basic product form, including uncooked head-on and headless shrimp.
- **Value-Added Products:** Value-Added Products are shrimp that have undergone additional processing to increase the value and usability of the products. Examples include peeled shrimp, deveined shrimp and cooked shrimp.
- **Food Products:** Food Products include sushi ebi and nobashi ebi, wontons, shrimp balls, shrimp nuggets and shrimp rolls.

Currently, we only sell shrimp products in the export market. Fish-based food products are however increasingly popular in the domestic market. The biggest market in Indonesia is the economy segment and most of the domestic food products sold use surimi as the main raw material. Some of the products sold in domestic market include fish balls, shrimp balls, squid balls, chikuwa, fish roll, fish cake and dumplings.

Throughout processing, each batch of food is accompanied by a tracking label that indicates time, date, pond source and the processing sequence which ensures full traceability of our products. The steps taken during processing vary according to the product request of our buyers but generally include washing, sizing, deheading, peeling, deveining, cooking, freezing and packaging. While some of the more routine processes are accomplished automatically with machines, most shrimp processing is performed by hand due to the fragility and natural variability of shrimp. For example, shrimp sold in the export market is deveined one at a time using pins, while tempura and sushi shrimp are manually stretched with a special stretching tool. We package most export shrimp products in our customers' own packaging brands.

### ***Our processing plant facilities***

We have two processing plant facilities in Lampung, which produce processed shrimp products and have cold storage facilities to store shrimp products before export. However, we are currently running only one processing plant

with a daily production capacity of 55 Mt, which produces food products to serve our overseas customers. This is primarily due to low harvest volume caused by the new operational models implemented by CPB and WM.

For the domestic market, we built a processing plant facility on leased land in Surabaya, primarily producing fish-based products. This facility has a daily production capacity of 20 Mt.

The table below shows the average capacity and production volumes of our processing facilities for the periods indicated.

	Capacity (Mt)			Production <sup>(1)</sup> (Mt)			Utilization <sup>(2)</sup> (%)		
	For the year ended			For the year ended			For the year ended		
	December 31,			December 31,			December 31,		
	2018	2019	2020	2018	2019	2020	2018	2019	2020
Total .....	24,700	25,100	22,900	20,900	15,700	14,900	85	63	65

*Notes:*

- (1) Production reflects the volume of processed food products. The actual percentage of output versus input for a particular product depends on the level of processing.
- (2) The utilization of food processing facility is calculated by dividing actual production by average capacity.

***Our food product brands***

For international market, we have three shrimp brands, namely *Bird River*, *Blue Anchor* and *Krakatoa*. For domestic market, we market the products under the *Golden Fiesta Seafood*, *Fiesta Seafood*, *Champ Seafood*, *Frosh*, and *Shifudo* brands.

**Sales, Marketing and Distribution**

***Feeds and Fries***

We are recognized for the high quality of our feeds and fry products. We leverage our strong market share in the feed businesses to bolster our external sale of fries. We accomplish this by utilizing a bundling strategy which pairs sales of our shrimp fry with our shrimp feed. As a result, we supply and meet all of the shrimp feed requirements of our shrimp fry customers. Furthermore, as part of our bundling strategy we routinely host customer visits, attend to sales inquiries and offer technical support and general know-how to our customers.

***Sale of all our shrimp feed and shrimp fry is denominated in Rupiah and is typically on cash terms. Credit terms are only provided to distributors with whom we have long-term relationships. Pet food***

Although pet food products are produced in our feed mills, the characteristics of their buyers are totally different from feed buyers who are typically farmers. Pet food is categorized as FMCG (fast moving consumer goods) and its distribution channel is through petshops, vets and retail outlets. Cat food is our most popular product and contributes almost 80% of our total pet food sales. This is because cats form the biggest pet population in Indonesia.

Our sales and marketing teams establish and maintain relationships with our customers, most of whom are big distributors with nation-wide coverage. Currently, we have a strong market share in the economy segment but we expect to develop different products in order to penetrate the premium markets in the future.

With people confined to their homes for longer periods during the COVID-19 crisis and with limited opportunities for social contact, many have sought companionship from pets such as cats, which they have either adopted or purchased from breeders. This has helped to drive demand for cat litter, especially since many pet cats were raised

largely indoors during the pandemic and will likely continue to be kept indoors. Our pet food products have therefore also experienced growth during the COVID-19 crisis.

As the pandemic has accelerated the development of e-commerce and increased the importance of digital communication with consumers, we too, have developed our own e-commerce platform to accommodate online selling. We expect the distribution channel to experience rapid growth going forward.

### ***Food products***

Most of our export shrimp products are packaged with the brands of our customers. Food products such as ebi fry, wonton, shrimp nuggets and shrimp balls are sold in domestic retail outlets. Fish-based frozen food products which are currently in trend in the domestic market are sold under *Champ Seafood*, *Shifudo* and *Frosh* brands and contributes 50% of our domestic food products sales. As most of our food products are frozen, distributing these products requires strong cold logistics chains.

We believe that in addition to price, our customers generally consider the following key factors when selecting a supplier for export shrimp products:

- quality of the shrimp product, particularly in terms of freshness and the supplier’s processing capabilities,
- ability to maintain continuity of supply,
- traceability of the shrimp through the production process, from processing facility to pond and ultimately to the brood stock and raw materials such as shrimp feed,
- compliance with relevant food safety standards, (See “Business—Food Safety and Quality Control—Standards”),
- the supplier’s commitment to sustainable aquaculture practices,

The terms of our shrimp product export contracts typically include the following provisions,

- sales denominated in US dollars (including sales to Europe and Japan), based on cost and freight,
- delivery on CNF terms, and
- Telegraphic Transfer, Documents against Payment, Documents against Acceptance and Letters of Credit.

Our domestic food product sales in 2020 were greatly affected by the COVID-19 crisis, as many hotels and restaurants were closed during the local lockdown period and consumers took time to adjust eating habits at home. Together with our pet food product plans, our own e-commerce platform is able to accommodate the online selling of domestic food products.

### **Export logistics**

Our export shrimp products are transported through a variety of third-party shipping companies. The vessels travel between Lampung and Singapore, where products are transferred to oceangoing vessels to be shipped to customers in the US, Europe and Japan. Our shrimp products are held in climate-controlled cold storage facilities pending shipment.

### **Competition**

The market for shrimp products is global and fragmented. Competition in our feed business is entirely domestic. Many of our current and potential competitors are large international companies that have longer operating histories, better name recognition, greater ability to influence industry standards, access to larger customer bases and significantly greater financial, sales and marketing, manufacturing, distribution, technical and other resources than we have. As a result, they may be able to respond more quickly to changing customer demands and industry standards,

and also sell and market these products better than we do. The competition we face in each of these products varies accordingly. We believe that our main competitors in each of the following products are:

- Feeds: We primarily compete with other Indonesian feed-producing companies, including PT Suri Tani Pemuka (Japfa Comfeed), PT Cargill Indonesia, PT Malindo Feedmill, PT Sinta Prima Feedmill, PT Matahari Sakti, PT Universal Agri Bisnisindo (DeHeus).
- Pet food: We primarily compete with other Indonesian pet-producing and foreign brand distributor companies, including PT Matahari Sakti, PT Perfect Companion Indonesia and PT Royal Canin Indonesia.
- Shrimp fry: We primarily compete with other Indonesian fry-producing companies, including Japfa Comfeed, Ayen Hatchery, Summa Group and Ndaru Laut Khatulistiwa.
- Food products: We compete with other Indonesian food-processing companies, including PT Bumi Menara Internusa, Sekar Group, PT Kelola Mina Laut, and PT CitraDimensi Arthali.

### **Trade Barriers Concerning Exports of Indonesian Shrimp**

In 2020, approximately 14% of our net sales was derived from the export of shrimp products, primarily to the US, Europe and Japan. As a result, our shrimp products may be affected by the imposition of trade barriers, embargoes, import bans, quotas, anti-dumping duties, tariffs or other barriers which are imposed against us, Indonesia generally, or even other countries or other shrimp product exporters.

### **Raw Materials and Suppliers**

Our purchases of raw materials consist mainly of soybean meal, fish meal, wheat flour, rice bran and other grains and oils for our feed businesses; fresh harvested shrimp, fish and other food ingredients for our food products.

### **Food Safety and Quality Control**

#### ***Fresh harvested shrimp***

We ensure that we process and deliver high quality products to our customers by adhering to global and local food safety standards and implementing stringent procedures with regard to food handling, food safety and hygiene and food preparation.

Our food safety and quality control measures include:

- maintaining product freshness by reducing the time between harvesting and processing through placement of on-site processing facilities;
- minimizing harmful microbial contamination through regular checks on microbial population levels;
- minimizing contamination from heavy metals, pesticides and other chemical pollutants through systematic testing procedures;
- increasing shrimp survival rates without resorting to antibiotics; and
- increasing shrimp survival rates by implementing biosecurity measures at all stages of the production process from the hatcheries to the shrimp ponds.

We have a comprehensive traceability system, including an electronic database, for each batch of shrimp from breeding, culturing and processing.

### ***Food processing facilities***

We observe strict hygienic and sanitation practices and do not use any food additives or color additives at any stage of processing other than salt (for taste), sodium phosphate (for texture) and sodium metabisulphite (for crunchiness), which are all standard industry additives approved by global and local food safety guidelines. We also maintain strict environmental controls. During shrimp processing, the shrimp is maintained at a temperature of 10 degrees Celsius or lower. The finished shrimp products are then maintained at temperatures below minus 20 degrees Celsius.

The water supply for our food processing plant facilities is first treated, filtrated and sanitized with chlorine. The water and ice are checked regularly by each plant's laboratory and various quality control measures are undertaken. At the end of every shift, all equipment is cleaned and sanitized, and undergoes certain quality control checks. The personal hygiene of employees is also monitored and checked regularly. Pest control is also carefully monitored to ensure cleanliness, and electronic fly killers and plastic curtains are used to ensure pests do not become a hygiene threat. The risk of cross contamination is minimized by preventing contact by the same employees with both cooked and raw products, which are also kept separated at all stages of production. Our plants also maintain a well-equipped micro-biological laboratory which consistently tests the quality of raw materials, products in process, finished products, ice, water, including personnel and environmental swab tests. We have measures in place to ensure that all outgoing shipments conform to the required quality standards of the buyer.

### ***Feedmill***

We have a dedicated quality assurance and quality control team to ensure a high quality production process for our feed products. Throughout the production process, we analyze key parameters to ensure the quality of production during the critical stages associated with the grinding, mixing, conditioning, extrusion and sizing processes.

To ensure that the raw material for feed and the feed conform to our required high quality specification, we perform systematic checks on the raw materials and the feed to test the following parameters: water stability, water content, crude protein, fat, fiber, size uniformity, ash content and color.

### ***Biosecurity measures***

We include advanced shrimp farming techniques in our shrimp farming standard operating procedures which are applied in our customers' farms. This results in safer fresh harvested shrimp for our food consumers. We strictly prohibit the use of antibiotics during the shrimp farming process. We impose the same prohibition on every harvested shrimp we purchase from farmers. This is especially important for export to markets such as the US, Europe or Japan as such markets require shrimp to be produced free of antibiotics.

We are able to avoid using antibiotics in the shrimp farming process as a result of our biosecurity measures which include the following:

- Specific Pathogen Free shrimp fry stocking policy: Specific Pathogen Free broodstock is used in our hatchery operations. Our shrimp broodstock are purchased from certified US suppliers and are inspected to confirm they are disease free. The shrimp fries are screened for all major viruses including WSSV, TSV and IHHNV. If at any time the broodstock or shrimp fry test positive for a virus, they are immediately destroyed and the tank facilities sterilized;
- the water used in farmers' ponds goes through a strict disinfection procedure before entering the farm system to eradicate wild crustacean and fish which might be disease-carriers and may enter the ponds. Shrimp waste sediment is regularly removed through our waste processing procedure which removes sludge from the ponds. A water intake screen in our ponds filters out potential disease carriers and other organisms or animals which compete for food;
- infected ponds are disinfected prior to water discharge to prevent disease transmission between ponds;

- sanitized castnets are used to collect the shrimp for sampling, such as weekly shrimp body weight sampling and shrimp quality sampling, to prevent disease transmission from pond to pond when a disease outbreak occurs;
- birds and crabs are suspected carriers of diseases. Farmers equip their ponds with non-lethal predator controls such as bird scaring devices to ward off birds approaching the ponds and a crab protecting device is installed to prevent crabs entering the culture ponds;
- farmers are encouraged to prohibit avian and mammalian husbandry in their shrimp farms to minimize the possibility of salmonella bacteria entering the ponds; and
- farmers are encouraged to have a policy of vehicle wheels and boot washing with anti-microbial and anti-fungal disinfectant to protect the ponds from disease originating from the external environment.

### ***Standards***

We comply with the following food standards:

*HACCP*. Hazard Analysis and Critical Control Point (“**HACCP**”) was introduced in July 1992 by the National Oceanic and Atmospheric Administration, an agency under the United States Department of Commerce. This procedure focuses on seafood product inspection using HACCP protocol. The procedure, aimed at ensuring quality consistency of end products with safe and healthy distribution and appropriate food labeling, is a preventive system to ensure safety of food products. This international standard requires that all hazards that may occur in the food production chain, including hazards associated with processing and facilities, are identified and assessed. HACCP consists of seven basic components: hazard analysis, critical control points, critical limits, monitoring procedure, corrective action, record keeping and verification procedure.

*BRC*. British Retailers Consortium (“**BRC**”) Global Standard is a standard made and released by the British Retailers Consortium, including Tesco, Sainsbury’s, Iceland Foods, Waitrose, Safeway and ASDA stores. BRC Global Standard requires implementation of HACCP and management of facility environment, products, processes and personnel.

*GMP*. Good Manufacturing Practices (“**GMP**”) is a set of regulations set forth by the Food and Drug Administration of the United States (“**FDA**”) to ensure that various products intended for human consumption and use are safe. GMP provides production and technical guidance for companies by improving seafood processing facilities in seven areas, including selection of raw material, handling and processing, additives, chemicals, packaging, storage and distribution.

*GlobalG.A.P.*, formerly known as EUREPGAP, is a set of standards formulated by various international working groups, to address the concerns of consumers around the world on food safety, animal welfare, environmental protection, and worker welfare. GlobalG.A.P. provides guidance for continuous improvement, development and understanding of best practices. The key to compliance with these standards is a “pre-farm gate audit,” which means our supply chain needs to be audited for compliance also.

*BAP-ACC*, set by Global Aquaculture Alliance (GAA). The main focus of this standard is food safety, community, environment, and traceability. There are distinct standards for hatcheries, farms, food processing and feedmills. For those are BAP-ACC certified for food processing, if such operations use raw material that come from BAP-ACC certified farms, hatcheries, and feedmills, such processors can place the BAP-ACC “four star” logo on the packaging of its processed food products.

*ASC* (Aquaculture Stewardship Council), is an independent non-profit organization founded by the WWF (World Wildlife Fund) and IDH – Netherlands, which focuses on environmentally sustainable aquaculture and on the development of practices to mitigate the environmental and social impact of aquaculture. ASC launched its set of standards for shrimp farming, which include the preservation of biodiversity, the traceability of shrimp feed, the adherence to specific requirements to minimize disease outbreaks and to specific working requirements in order to

ensure safe and equitable working environments. All products sold as ASC certified, will carry a ASC logo on the packaging.

*BPOM code*, is a local certification issued by the National Agency of Drug and Food Control of Indonesia (BPOM) for protecting public health through the control and supervision of prescription and over-the-counter pharmaceutical drugs (medications), vaccines, biopharmaceuticals, dietary supplements, food safety, traditional medicine and cosmetics.

*Halal Certificate*, is a local certification issued by The Indonesian Council of Ulama (MUI), which states the halalness of a product in accordance with Islamic law and is a requirement for the inclusion of a halal label on food and beverage products, medicines, and cosmetics. In order to receive such certification, products (i) must not contain pork DNA and ingredients of traditional origin from pigs, (ii) must not contain prohibited ingredients such as animal blood, (iii) all ingredients that come from animals must be slaughtered in accordance with Shari'a rules, (iv) all storage places used in the sale, processing or transportation of products must not be used for pork; and where such places have been used for pork or other non-halal goods, it must first be cleaned in accordance with Shari'a rules.

## **Research and Development**

Our research and development department aims to improve efficiencies and productivity across all of our business segments. In addition, we have been conducting research to protect shrimp against disease and biological hazards. We have taken a scientific approach by developing biologically-active materials to specifically inhibit viral replication after the shrimp is infected. To date, several candidate biologics have provided some degree of protection against IMNV, WSSV and WFS in laboratory studies. We are also developing potential delivery systems for the administration of these biologics to shrimp stock through shrimp feed. This research is still in the preliminary stages, and it is too early to tell if these biologics and delivery systems will make a significant difference in controlling and containing viral pathogens such as IMNV, WSSV and WFS.

## **Environmental and Social Considerations**

We consider environmental issues to be an important factor in aquaculture operations and we take various measures to ensure that the operations do not negatively impact the environment. We encourage farmers to use biological techniques that we believe are safer and more effective compared to chemical alternatives.

Our facilities comply with all applicable national and local environmental and social requirements of Indonesia's laws and regulations, including implementing an AMDAL (*Analisa Mengenai Dampak Lingkungan*) or Indonesian Environmental Impact Assessment, environmental monitoring plan (UPL) and environmental management plan (UKL)) as well as strict internal social policies and environmental, health and safety guidelines.

### *Mangrove habitat*

Traditional shrimp farmers in Indonesia often have to cut down coastal mangroves to transform the land into shrimp ponds. In areas of the world where mangroves have been removed for development purposes, this often creates problems of trace metal contamination of seawater and biota. Mangroves also provide significant value in the coastal zone as a buffer against erosion, storm surge and tsunami.

When we first developed our shrimp ponds, we made an agreement with the Government to recover mangrove habitat along the coast, where it had been previously destroyed by traditional shrimp farmers. We have developed a strategic mangrove conservation program to manage both environmental and social issues for mangrove habitat rehabilitation, and promote sustainable shrimp farming.

### *Water sources and water environments*

The fresh water sources for our shrimp hatcheries, feedmills and shrimp farms are from a combination of surface water, deep wells, and/or rain water. Fresh water for the processing plant and for the daily usage of the shrimp farmers and our employees are from deep wells, where water is pre-treated in our water treatment plant. The seawater needed

for our shrimp hatcheries and shrimp farms is pre-treated before being pumped into shrimp hatcheries and ponds. The wastewater is treated before it is discharged into the sea.

## Employees

As of December 31, 2020 we had a total of 1,791 permanent employees. The breakdown of permanent employees by Business Unit is shown below:

Business Units	Production	Marketing	Finance Accounting	Other	Total
Feed business	431	237			668
Food business	239	35		2	276
Other business	267				267
R & D				200	200
Support			161	219	380
<b>Total employees</b>	<b>937</b>	<b>272</b>	<b>161</b>	<b>421</b>	<b>1,791</b>

The challenge going forward is to ensure that the employees of the group embrace the strategic direction taken by the Company and are confident that the current business model is sustainable and therefore it is important to focus on employees' development, engagement and retention. We have a policy of paying above average remuneration to our high performing employees compared to others in the industry. We have introduced more attractive bonus and incentive schemes, mainly for employees with a direct impact on revenue such as those in Sales & Marketing and Production positions. The new bonus and incentive schemes are based on such employees' actual achievements compared to stated objectives, while bonus intended for all other employees will be paid based on the Company's profitability and their individual performance.

We are maintaining to be fully compliant with all regulations relating to employment in Indonesia and aim to be more competitive in terms of our overall reward system in order to attract and to retain good talents for the success of our business. We are registered with, and make contributions to the Indonesian Workers Social Security Scheme (*BPJS*), so that all employees are covered with mandatory medical insurance and minimum pension schemes set by the Government on top of an additional medical scheme provided by the Company.

## Training, Development and Engagement

As mentioned above, we are currently focusing on our employees' development, engagement and retention. Due to the major reorganization carried out by our Company, we are now redesigning our employees' roles, for the purpose of ensuring that our employees are given the opportunity to optimize their potential and are provided with a clear career path within the organization. In order to reach this objective, our Company is implementing a performance-based remuneration system and is developing several programs, including a promotion review, the benefits review and programs to engage young talents.

Since we understand that the future of our Company will very much be dependent on young talents, we created GEMA CP PRIMA (Generasi Muda CP Prima – The Young Generation of CP Prima) to proactively give them freedom to initiate “engagement programs” that are more suitable for them. Training is classified into 3 different clusters: (1) Managerial Training for Supervisor up to Executive Level, (2) Functional Training to strengthen functional competencies at all levels, (3) Aquaculture Technical Training for our technical employees.

## Intellectual Property

We have registered our trademarks and logos which we use for our products with the Department of Law and Human Rights of the Republic of Indonesia.

**Licenses**

We have obtained the necessary business licenses for our day-to-day operations. None of the licenses or approvals required for our operations have been revoked by the relevant government ministries or authorities for the past three years prior to the date of this Information Memorandum.

**Insurance**

We maintain insurance for our equipment, machinery, motor vehicles and fixed assets. This insurance provides for the replacement cost of the inventory and assets and covers business interruption and losses from flooding, fires, theft, earthquake and volcanic eruption. In addition, we maintain third-party liability insurance.

**Properties**

We own the land where our feedmills, hatcheries and processing plants are located, save for the processing facility located in Surabaya. We have entered into a lease agreement for our offices in Jakarta.

- Lease for our office in District 8, Sudirman Central Business District will expire in 2024.
- Lease for our office in Puri Matari will expire in 2021.

### Fish Industry Overview

The role of fish as a source of animal protein supply is becoming more and more important in meeting the increasing protein consumption by human, due to the increase in world population. Fish continues to be one of the most traded commodities worldwide, with more than half of fish exports by value originating in developing countries. It contributes significantly to food security and adequate nutrition for a global population expected to reach 9.5 billion by 2050.

Global food fish consumption increased at an average annual rate of 3.1 percent from 1961 to 2017, a rate almost twice that of annual world population growth (1.6 percent) for the same period, and higher than that of all other animal protein foods (meat, dairy, milk, etc.), which increased by 2.1 percent per year. Per capita food fish consumption grew from 9.0 kg (live weight equivalent) in 1961 to 20.5 kg in 2018, by about 1.5 percent per year.

Despite persistent differences in levels of fish consumption between regions and individual States, clear trends can be identified. In developed countries, apparent fish consumption increased from 17.4 kg per capita in 1961 to peak at 26.4 kg per capita in 2007, and gradually declined thereafter to reach 24.4 kg in 2017. In developing countries, apparent fish consumption significantly increased from 5.2 kg per capita in 1961 to 19.4 kg in 2017, at an average annual rate of 2.4 percent. Among these, the least developed countries (LDCs) increased their consumption from 6.1 kg in 1961 to 12.6 kg in 2017, at an average annual rate of 1.3 percent. This rate has increased significantly in the last 20 years, reaching 2.9 percent per year, because of expanding fish production and imports. In low-income food-deficit countries (LIFDCs), fish consumption increased from 4.0 kg in 1961 to 9.3 kg in 2017, at a stable annual rate of about 1.5 percent (FAO).

Figure 1 - World capture fisheries and aquaculture production

In 2017, fish consumption accounted for 17 percent of the global population’s intake of animal proteins, and 7 percent of all proteins consumed. Globally, fish provided more than 3.3 billion people with 20 percent of their average per capita intake of animal proteins, reaching 50 percent or more in countries such as Bangladesh, Cambodia, the Gambia, Ghana, Indonesia, Sierra Leone, Sri Lanka and several small island developing States (SIDS).

Global capture fisheries production in 2018 reached a record 96.4 Mt (Table 1 and Figure 1), an increase of 5.4 percent from the average of the previous three years. The increase was mostly driven by marine capture fisheries, where production increased from 81.2 million Mt in 2017 to 84.4 million Mt in 2018, still below the all-time high of 86.4 Mt in 1996).

Fish and fishery products remain some of the most traded food commodities in the world. In 2018, 67 million Mt, or 38 percent of total fisheries and aquaculture production, were traded internationally.

### Indonesia Fisheries and Aquaculture

As the world’s largest archipelagic state, the ocean plays an undeniably central role in Indonesia. With a water area that is nearly four times larger than its land area (Fig.2), the country derives pivotal benefits from the sea for its economy, geopolitics, culture, and natural environment. Situated at the center of major maritime trade routes, its seas are a gateway linking Europe, the Middle East, Africa, and South Asia. Its coastal and marine waters make up one of the most fertile fishing grounds in the world: Indonesia is the second largest fish producer in the world, second only to China. Roughly 55 percent of this production comes from coastal areas, particularly from seagrass beds, mangroves, coral reefs, and estuaries. The country has the world’s largest area of mangrove forests which cover about 3 million hectares and contain five times as much carbon per hectare as tropical forests. A global hotspot and priority for conservation. Indonesia has one of the highest levels of marine biodiversity in the world. (CEA)

Indonesia is the second-largest fish producer in the world after China, with wild capture fisheries and aquaculture production of 5.9 and 4.4 Mt, respectively, in 2015. Similar to global trends, wild catch in Indonesia has plateaued in recent decades, while aquaculture production has expanded at a rapid rate. However, the rate of aquaculture growth in Indonesia has been even more staggering than the global average, as it has more than quadrupled from 2000 to

2015. Capture fisheries production showed a growth rate of less than 1 percent from 2014 to 2015, while aquaculture production increased by 9 percent (Fig. 4). Excluding seaweed, aquaculture currently accounts for roughly 42 percent of fisheries production in the country (Fig. 5).<sup>4</sup> Seaweed production in Indonesia has increased at an even faster rate than other types of aquaculture production, accounting for roughly 11.3 Mt of production in 2015. The total value of wild capture and aquaculture exports in 2017 was between USD 3.17 and 4.09 billion.

Figure 4 - Volume of seafood production in Indonesia (2000-2015)

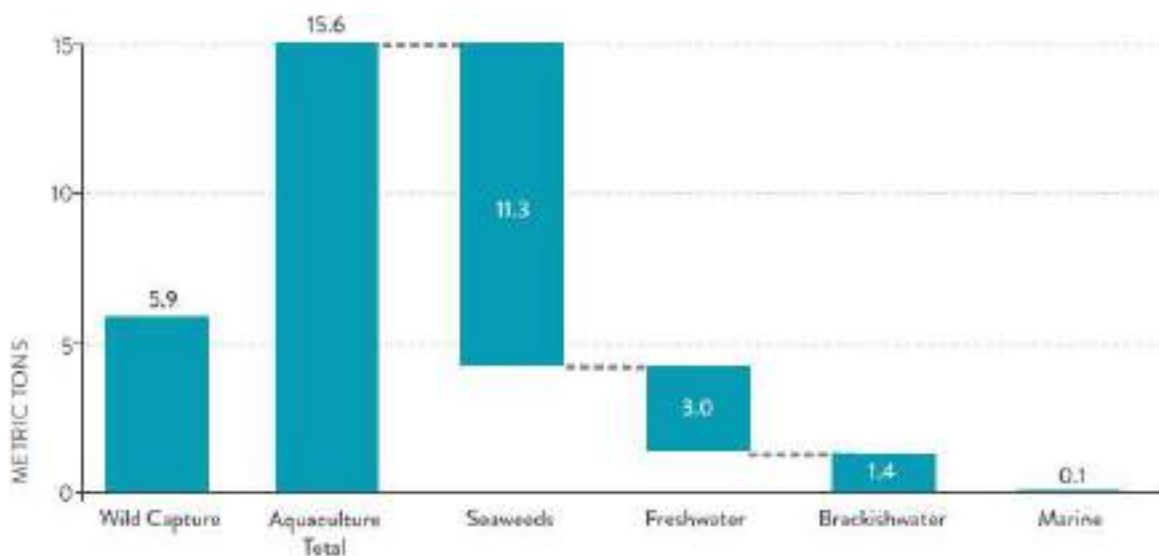

Figure 5 - Wild Fisheries and Aquaculture production in Indonesia, 2015

According to analysis from WorldFish, aquaculture is projected to surpass wild capture fisheries as the leading source of fish production in Indonesia sometime between 2026 and 2030. Although aquaculture growth will be important for meeting future food security demands in the country, there are inevitable challenges associated with this growth. Aquaculture expansion introduces concerns on feeds, wild fry, disease and the genetic implication of escapees (which affect already stressed wild stocks).

Aquaculture in Indonesia is practiced in fresh, brackish and marine water using a variety of species, production facilities and methods. Freshwater aquaculture began to develop in the late 1970s when there was a significant increase in production from freshwater aquaculture as a result of the introduction of new farming technologies which contributed to the availability of hatchery-produced seed and the development of compound feed (FAO).

Aquaculture has an important role in rural development, particularly where the level of technology used is relatively low and so many communities can afford to engage in aquaculture. West Java is famous for communities that culture common carp, Central Java for goramy (*Osphronemus goramy*) and cat fish (*Clarias* sp.) culture, the north coast of East Java for milkfish (*Chanos chanos*) and South Sulawesi for rabbit fish culture (FAO).

Indonesia has one of the world's highest rates of seafood consumption. Seafood contributes to an estimated 54 per cent of animal protein intake in Indonesia and 15 per cent of total protein intake (ABARES). Fish is a key component of the Indonesian diet.

The Indonesian government has been implementing several policies to support aquaculture growth. The government strategies are focusing on supporting aquaculture in Indonesia through, among other things:

1. The development of hatchery, nursery and grow out production systems.
2. The planning, design and building of infrastructures.
3. The promotion of entrepreneurship.
4. The implementation of policies able to provide concrete solutions to the business and environmental issues faced by local players in the aquaculture industry.
5. The development of adequate technologies.

The Indonesian government continues to adopt new policies in order to enhance the living standards of fishermen and boost investment in the fishery sector. These policies include the opening of six sub-sectors in the fish processing industry to foreign investments, the provision of fishing equipment, storage and processing facilities such as modern ships and cold storage, and facilitating access to financing. Currently there are 11.8 million hectares used for aquaculture in the sea, 2.3 million hectares of aquaculture area in brackish water, and 2.5 million hectares used for freshwater aquaculture.

Although the role of aquaculture in the future growth of the fisheries sector and its contribution to the food security of the increasing world population are largely acknowledged by international organizations (such as FAO) and by players in the aquaculture industry, nevertheless there are future challenges in fisheries and aquaculture (which have also been highlighted in the FAO report "*The State of World Fisheries and Aquaculture 2016. Contributing to food security and nutrition for all*"), such as:

- Illegal and unregulated fishing and the overcapacity of fishing fleets globally are important threats to fishing resources and to the sustainability of fisheries.
- Ongoing practice of fleets moving their operations from depleted areas to new areas can cause a long-term decline in global catches as overfishing spreads.
- Future prices might be influenced not only by higher feed prices but also by the introduction of more rigorous regulations on the environmental protection, food safety, food trace ability and animal welfare.
- Land and water associated conflicts may significantly affect fisheries.
- Feed, seed supply and genetic resources may threaten the sustainability of fisheries.
- Environmental integrity and disease problems.
- Development and adoption of new and improved farming technologies.
- Market, trade and food safety.
- Climate change.
- Investment capital impediments.
- Problems that can originate from unguided and unmonitored aquaculture practices.

### **Shrimp Industry Overview**

Total marine shrimp production has been growing worldwide as a result of the development of marine shrimp aquaculture and production has growing from 3.7 million Mt in 2010 to 4.4 million Mt in 2017 at a CAGR of 2.2% and continue growing to estimated 5.4 Mt in 2021 (FAO, GOAL).

World marine shrimp aquaculture production is dominated by operations located in seven countries, namely, China, Thailand, Vietnam, Indonesia, Ecuador, Mexico and India. The key component of this dominance is

geographical, with each country having suitable climates, long coastlines and extensive areas suitable for shrimp farm development. The industry showed signs of recovery in 2016 and 2017, resulting in a CAGR of 2.2 percent for the period 2012 to 2017 (FAO). In Asia, production has recovered since 2015, reaching 3.75 million Mt in 2018 and potentially 4.00 million Mt in 2021. Growth will be stronger in Vietnam and China, with predicted CAGRs of 4.6 and 3.9 percent from 2018 to 2021, respectively and in Latin America the most important development in the region is the spectacular growth of the Ecuadorian shrimp farming industry, Production is expected to reach 700,000 Mt in 2021, with a CAGR of 11.3 percent between 2015 and 2020. This growth would make Ecuador the third largest producer in the world after China and Vietnam.

World seafood consumption has been rising and sat at 20.5 kg per capita up at an average annual rate of 3.1% since 1960, when it was of 9 kg per capita (Undercurrents). While due to the rising production of shrimp, per capita consumption of shrimps is highest in Japan at 3.28 kg, followed by USA (consumption in USA was up 3/10ths of a pound, from 4.1 lbs to 4.4 lbs (+7.3%)) and Europe about 1.5 kg per person. The European Union estimates that 62% of that shrimp comes from the wild and 38% from aquaculture, of which approximately 85% to 90% consists of Pacific white shrimp and about 10% of black tiger shrimp. Most shrimp imported into Europe is consumed in Southern Europe. The annual per capita consumption of shrimp is almost 3 kg in Spain, 2 kg in Portugal and 1.5 kg in France

Modern shrimp aquaculture only began in the mid 1980's and the industry is still in its early stages of development. Prior to shrimp aquaculture development, wild caught shrimp was the only source of shrimp. Shrimp was largely considered a luxury product in international markets, and its demand largely depended on the respective market's economic climate. As a result of the development of shrimp aquaculture, it has become possible to produce large quantities of consistently high quality shrimp. Aquaculture shrimp can also generally be produced more economically than wild caught shrimp, due to improvements in technology and culturing techniques and the increasing cost of diesel fuel for the shrimp trawlers.

Shrimp aquaculture has made it possible to produce large quantities of shrimp economically and with consistent quality. Other customer preferences such as freshness, traceability, reliability of supply, certification, social and environmental responsibility, are driving the growth of the shrimp aquaculture industry. The shrimp aquaculture industry is expected to continue to expand to meet the expected increasing demand for shrimp due to its consistent quality, stable supply and lower costs compared to sea catch shrimp. Sea catch production has unpredictable supply, inconsistent product freshness, food health concerns (mercury levels), environmental concerns (damage to ecosystem), inconsistent product quality (size, species) and a stagnant and even declining availability.

Development of shrimp aquaculture has been the main reason for the increase in shrimp trade. Total shrimp production has grown significantly worldwide since 2005. Increased production and improved efficiencies in production have caused average shrimp prices to decrease, and, together with increasing demand, world shrimp consumption has increased.

### **Shrimp Production**

Global shrimp aquaculture production has increased steadily for many years, but has accelerated particularly rapidly over the past decades. The following table shows the world production of marine shrimp between 2010-2019, with estimates until 2021.

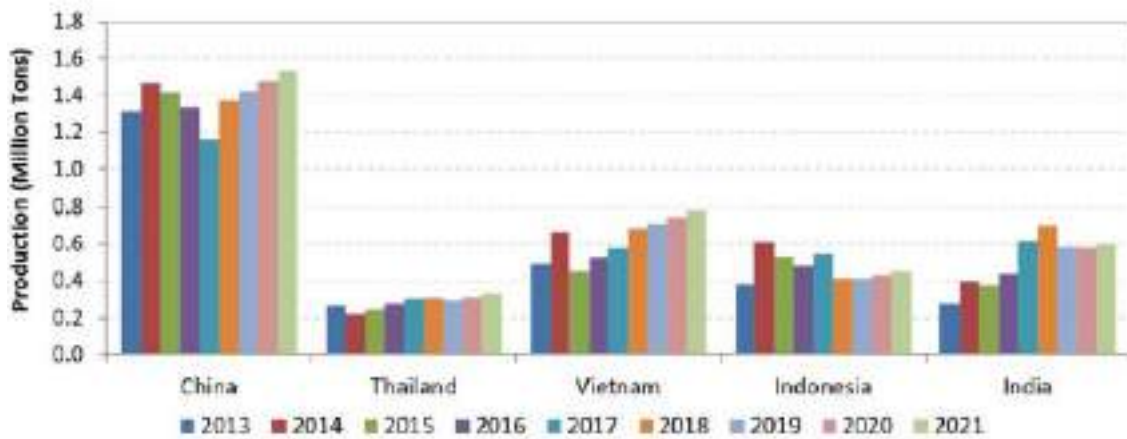

Source: FAO, GOAL survey

Growth rates of global shrimp aquaculture have been especially rapid from 2012-2017 (at a CAGR of 2.2%), and is expected continue growing from 2017-2021 with CAGR 5.4%. Nevertheless, shrimp is still one of the most important internationally traded commodities.

For shrimp aquaculture, the major producing countries are in Asia (with 85% of global production) – predominantly India, China, Indonesia, Vietnam, and Thailand, whilst most of the remainder comes from Latin America, especially Ecuador, Mexico and Brazil

### Shrimp Demand

The principal international markets for shrimp (both cultured and caught) are Europe, the US, China and Japan. These four markets imported more than 75% of the total shrimp imports in 2020. For the period between 2012 and 2020, the China and US markets have been the fastest growing importers of shrimp, with Japan showing a slight decline.

The following table shows the total shrimp imports into Europe, the United States, China, Japan and the rest of the world between 2016 and 2020.

### Production Form Trend

Production in Latin America continues to be oriented towards green shrimp. Head-on shrimp has become the dominant product form over head-off shrimp. It accounted for 55 percent of production in 2018, up from 40 percent in 2007. Increased shipments of Ecuadorian shrimp to European and Asian markets are an important factor driving this trend.

Asia has reported a move towards production of smaller shrimp sizes (51-60 pieces per kilogram or smaller) since 2011. The share of smaller shrimp sizes increased from 27 percent in 2010 to 37 percent in 2018. Early harvests caused by EMS and other diseases is a likely driver of this trend.

The following table shows the total size of shrimp production between 2010 and 2018

### Shrimp Pricing Trends

Development of the shrimp aquaculture industry is wholly responsible for increasing production volumes and decreasing prices. Shrimp price has since stabilized, however in 2019, due to COVID-19, shrimp price experienced a slight decline.

The following table shows the historical price (in US\$/kg) of frozen shrimp imported into the EU, US and Asia (mostly Japan) from 2012 to 2020:

Urner Barry produces a Shrimp Index for headless shell on (HLSO) shrimp as an indication of the general conditions in the shrimp market for both black tiger (*P. monodon*) and white (*P. vannamei*) shrimp every month. These have shown that prices stabilized to a normal level from the high price level in 2016-2018, which were due to the higher prices resulting from the shortage in supply caused by the Early Mortality Syndrome.

### United States Shrimp Market Overview

The United States is the biggest single country importing shrimp in the world. As of 2020, the US accounted for 27% of total global shrimp imports (Urner Barry). From 2016 to 2020, the US shrimp import market was growing at a CAGR of 4.3%/year. Retail market has been growing significantly in 2020 as an impact of the drop of food service due to COVID-19.

The following is a table of the imports of shrimp into the USA in quantity and value between 2012 - 2020:

Shrimp imports into the US grew by an annual compounded growth rate of 3.8% between 2012-2020 but have growth in 2016-2020 to 4,3% as the US economy improve. The increase in US shrimp imports in recent years has been due in part to increased shrimp aquaculture production and retail market growth.

Shrimp has become the United States' most consumed seafood product. In 2017-2018, the US has consumed a stable average of 2.13 kg of shrimp per capita. For 2020, shrimp consumption was at 2.43 kg per capita, out of a total seafood consumption of 7.03 kg.

US population of 331 million in 2020 equates to a total consumption of 746,998 Mt of shrimp per year in the USA. With increasing population growth, expected to reach 351 million by 2030, even at a constant consumption rate, the US would be expected to consume over 790,000 Mt of shrimp per year. If expected population patterns continue and USA reaches its estimated population of 394 million by 2050 – then US shrimp consumption would be in the region of 888,000 Mt/year.

The following is a table of the historical and projected consumption of shrimp in the USA since 2012:

Value added shrimp products are a fast growing segment in the US shrimp industry. In 2012, value added shrimps only accounted for 58%, but by 2020, this share had increased to 62%. Value added shrimps include other processed products as well as peeled products.

### European Union

As of 2020, the EU accounted for 27% of total global shrimp imports. Imports of shrimp into the EU grew from 563,702 Mt in 2016 to 582,557 Mt in 2020 at a CAGR of 0.7%.

The following is a table of the imports of shrimp into EU (from outside EU) in quantity and value between 2012-2020:

The shrimps entering the EU market are split between cold water captured shrimp originating from Argentina, China, Denmark and Greenland (especially to Spain), and warm water cultured shrimp coming predominantly from Ecuador, India, Bangladesh, Vietnam, and Thailand.

Of the frozen penaeid shrimp imported into the EU in 2020, Ecuador exported 22%, Greenland 12%, Argentina and Vietnam 11%, India 10.7%, and Indonesia 1.7% (Eurostat).

US shrimp import market grew at a CAGR of 4.3%/year. Popular products are raw black tiger, peeled block and IQF shrimp with 7% glazing.

In addition, Russia is a growing market for imported shrimp. The Russian shrimp import market grew at a CAGR of 13.6% from 2016 to 2020. Major current suppliers are Canada, China and Vietnam. Russia's market for farmed tropical shrimp is currently growing quickly and should be a large market in the future (Globefish website, ITC Trade Map).

Europe has been a growing market for imported shrimp for some countries, despite the current financial crisis in many European member countries, and helped by the strengthening Euro against the US Dollar, making Europe more competitive. This growth is likely to continue in the future as the European population grows and seafood consumption continues to grow. The trend is for increased imports of warm water aquacultured shrimp.

### Japan

As of 2020, Japan accounted for 7% of total global shrimp imports. The majority of shrimp imported into Japan has always been frozen shrimp. Imports of frozen shrimp declined from 260,360 Mt in 2012 to 208,860 Mt in 2020 with CAGR -2.4%

This change was caused by reduced shrimp consumption due to the economic decline, COVID-19(in 2019-2020) and in part due to a reduction in unit value following the switch from the higher value black tiger shrimp (*P. monodon*) to the smaller, lower valued white legged shrimp (*P. vannamei*) during the past 10 years. However, recent increases in value have been noted, as with elsewhere in the world due to a global shortage in supply of shrimp.

The following is a table of the imports of frozen shrimp into Japan in quantity and value between 2012-2020:

<b>Year</b>	<b>Volume Mt</b>	<b>Value(US\$Bn)</b>	<b>Value(US\$/Kg)</b>
2012	260,360	1.7	6.70

As mentioned above, most shrimp entering the Japanese market has always been frozen conventional products, but this percentage is slowly declining as Japan opts for more value added shrimp. The main types of value added shrimp responsible for the reduction in frozen conventional products in the Japanese market include Peeled and Deveined, Peeled Tail On, Shell On, Cooked or Sushi and Fry.

Most of the shrimp entering the Japanese market is from Asian countries, with Thailand currently being the biggest (after capturing much of the market from Vietnam and Indonesia), followed by Vietnam, India, Indonesia and China.

The following is a table showing the percentage supply of shrimp into the Japanese market from the major producing countries between 2012-2020:

Despite the recent resurgence in Japanese shrimp imports, continuing economic problems, reduced seafood consumption, after-effects of the 2011 earthquake and tsunami, combined with a shrinking population do not bode well for continued expansion of the Japanese shrimp market.

### **Other Shrimp Import Markets**

Major and growing import markets include China, Korea, Canada, Russia, Australia and Morocco. Each of these markets has seen significant increases in imports over the past few years, but none more so than China.

In 2018, China had a population of 1.39 billion people and consumed 1.5 million Mt of shrimp per year at a per capita consumption rate of 1.13 kg/year. Shrimp aquaculture production in China has decreased from 2010 to 2020 with a CAGR -4.8% due to serious disease problems (60% impacted by Decapod iridescent virus 1 (DIV1)).

Main driver of the shrimp usage in China is food service (60%). Live shrimp market in China remain stable and huge potential (market size >500,000 Mt) and growing demand for smaller size shrimp in China for dumpling productions. Growing popularity of shrimp paste products (currently supplied from China domestically, Thailand and Vietnam).

### Shrimp Species

Despite the large number of shrimp species, only a few of the larger species are cultivated commercially, all of which belong to the family of penaeids (family *Penaeidae*) and within it to the genus *Penaeus*. Others are deemed unsuitable for farming, either because of their smaller size or because they stop growing when crowded together. Some of the species are also deemed to be too susceptible to disease. The two species dominating the shrimp aquaculture industry (92% of production) are:

1. Pacific whiteleg shrimp (*P. vannamei*) is currently by far the most important cultured shrimp species. This species is native to the Pacific coast of the Americas from Peru in the south to Mexico in the north. It grows to a maximum size of 23 cm. This shrimp is the only species being commercially cultured in the Americas, and since being introduced to Asia in 2000, has largely replaced the traditional culture of *P. monodon* in Asia. The reasons for the popularity of this species over all others (including *P. monodon*) is the availability of disease free (SPF or Specific Pathogen Free), domesticated stocks from numerous breeding programs around the world, its ability to be cultured at very high density, its habit of living throughout the water column, its tolerance to diseases and cold weather, and relatively high survival rates and feeding efficiencies during grow-out, leading to lower cost of production.

2. Giant tiger prawn (*P. monodon*, commonly known as black tiger shrimp) occurs in the wild in the Indian Ocean and in the Pacific Ocean from Japan to Australia. This is the largest of all cultured shrimp, growing to a length of 36 cm, and is the main other species farmed in Asia. As mentioned, it is currently being replaced in Asia as the preferred species for culture since it is difficult to get stocks of domesticated, selected SPF animals (although there has been some progress recently) and its susceptibility to various diseases including the whitespot disease and monodon slow growth syndrome.

Other species also cultured in Asia and the Middle East include:

Kuruma shrimp (*P. japonicas*) which is farmed now principally in China and Japan. This is a high value species, which currently only has a market in Japan.

Chinese white shrimp (*P. chinensis*, also known as the fleshy prawn) occurs along the coast of China and the Western coast of Korea and is currently mostly farmed in China, although this has now been largely replaced by *P. vannamei*. It grows to a maximum length of only 18 cm, but tolerates colder water (minimum 16°C). Once a dominant player on the world market (220,000 Mt being produced in 1991), today it is used almost exclusively for the Chinese domestic market after a viral disease destroyed nearly all stocks in 1993. Recent work has been done on domestication of the species, so it may yet regain popularity in China if this work is successful.

Indian white shrimp (*P. indicus*) is a native to the coasts of the Indian Ocean and is widely cultured in India, Iran, Saudi Arabia and other Middle Eastern countries, and along African shores. Saudi Arabia is currently the biggest producer of this species as they have developed breeding programs to domesticate and select this species, which has a high tolerance for the high salinity conditions found in this region.

Banana shrimp (*P. merguensis*) is another cultured species from the coastal waters of the Indian Ocean, from Oman to Indonesia and Australia. It can also be grown at high densities and is now produced mostly in Indonesia and one farm in Australia which has domesticated it and started selectively breeding the species, producing a better quality culture animal.

Western blue shrimp (*P. stylirostris*) was a popular choice for shrimp farming in Latin America (especially Mexico and Ecuador), until the IHNV virus wiped out nearly the entire population in the late 1980s. A few stocks survived and became resistant to this virus. When it was discovered that some of these were also resistant to the Taura

virus, some breeding work was done to produce SPF stocks, but these have also fallen out of favor and this species is now only cultured to a limited degree in Brunei.

Several other species of *Penaeus* play only a very minor role in shrimp farming. Some other kinds of shrimp can also be farmed, e.g. *Metapenaeus spp.* or miscellaneous penaeid shrimp. Their total production from shrimp aquaculture is approximately 40,000 and 88,000 Mt/year respectively, which is relatively small in comparison to that of the main culture species of penaeids.

Historically, the average sales price for *P. monodon* was significantly higher than the average sales price for *P. vananmei*, however, the difference between the prices for the two species has been consistently narrowing over the years.

### **Legislation and Industry Standards**

In recent years, traceability of food products has been an area requiring greater transparency and regulation. Increasing traceability has been achieved by the development of international standards, industry guidelines and legislation, which include, among others:

*Codex Alimentarius Commission (“CAC”).* CAC was formed under the joint sponsorship of the United Nations World Health Organization and the Food and Agriculture Organization in 1962, to develop international standards for food safety. The main purpose of CAC is to protect the health of the consumer and ensure fair trading practices based on sound scientific evidence.

*General Standard for pre-packaged Food*, which states that:

The country of origin of the food shall be declared if its omission would mislead or deceive a consumer; and

When food undergoes processing in a second country which changes its nature, the country in which the processing is performed shall be considered the country of origin for the purposes of labeling.

*Generic Official Certificates, Formats and Production and Issuance of Certificates (CAC/GL 38-2001).* Details of the product being certified should have a clear documented certificate, containing the following information, among others: nature of food, name of product, quantity in appropriate units, lot identifier or dating code, identity, and as appropriate, the location of production establishment, name and contact details of exporter or consignor, country of dispatch, and country of destination.

*Third Party Certification schemes.* In order to ensure compliance with Good Aquaculture Practices and traceability, there have been a number of recent standards applied to all phases in the culture and processing of shrimp to produce internationally recognized certificates proving the products supplied adhere to norms of good hygiene, and that they were farmed in an economically, socially and environmentally responsible and sustainable manner.

Of these certification schemes, the main ones include the Aquaculture Stewardship Council (ASC), the Global GAP and the Global Aquaculture Alliance’s Aquaculture Certification Council (ACC) Best Aquaculture Practices (BAP) scheme. Many of the main shrimp importing companies in the EU, US and Asia (mostly Japan) now require that any shrimp producers are certified by one or other of these schemes, before they will purchase their products.

Additionally, other major seafood buyers, including most international supermarket chains have their own sets of standards, which are broadly on par with the above standards to ensure the shrimp being purchased meets international standards.

Currently, our Company is BAP Four star certified (meaning hatchery, feed mill, farm and processing plant are all certified) under the GAA BAP certification scheme. Additional accreditations for include Good Manufacturing Practices (GMP certification) and Hazard Analysis and Critical Control Point (HACCP certification); and the BRC Global Standard (BRCS) for Food Safety Issue 8 certification which is one of the most recognized food safety management system standard released by the British Retailers Consortium (BRC) to ensure food safety, and ASC to

ensure food quality and sustainability. US seafood legislation is controlled by the FDA. The cornerstone legislation is FDA Rule 21 CFR 123 “The procedures for the Safe and Sanitary Processing and Importing of Fish and Fishery Products.” Critical to this legislation is the HACCP system which sets standards and controls for production and processing standards, with emphasis on hygiene.

Europe and Japan also have equally strict regulations that govern food safety and the hygienic preparation of food. The chart below shows an overview of legal and industry requirements and industry trends of the three different regions:

	USA	EU	Japan
Legal Requirements	FDA Registration Number HACCP (processing plant)	EU Approval Number HACCP (processing plant)	Food Sanitation Law HACCP
Industry Requirements	Global Aquaculture Alliance (GAA) Best Aquaculture Practices (BAP) certification or Specific Buyer audits (supermarkets)	BRC Ethical audit Specific Buyer audits (supermarkets) GlobalGAP or Aquaculture Stewardship Council (ASC) certification	Specific buyer audits (supermarkets) Aquaculture Stewardship Council (ASC) certification
Industry Trends	Increased occurrence of antibiotic usage as competition intensifies Increased occurrence of Salmonella, Vibrio counts Major issues related to melamine use	Increased concerns and requirements towards social responsibility and sustainability (environment, farmers) Zero tolerance for “non approved” chemicals (antibiotics)	Increased demand for ASC certified products Recent increases in antibiotic occurrence has reduced significant volumes from Vietnam

## Pet Products Industry Overview

Urbanisation has led demographic changes associated with the rise of upper middle class who have high purchasing power. With increasing singles, smaller families without kids and elderlies, as well as rising income, people demand for companions or pets to take care of and are willing to spend on premium products to cater their needs and for healthy and happy pets. This group of people treat pets as their own children, this behavior is referred pet humanization. Such phenomenon is happening in developing South East Asian country such as Thailand and such phenomenon is predicted to occur in Indonesia.

In Indonesia, the COVID-19 crisis did not lead to a shortage of pet food nor major incidents of panic buying. While stores were restricted to shorter operating hours, they were able to open daily. Demand across pet care product categories has been bolstered by the crisis, as people lacking social contact because of concerns about exposure to the SARS-CoV-2 virus that causes COVID-19 and the shift to remote working and distance learning sought companionship from pets. During the crisis, there have been fewer incidents of pet owners giving away pets and, indeed, more people have bought pets in their search for companionship and for hobbies to pass the long hours spent at home. All pet care categories have experienced positive growth as a result of conditions under the pandemic. Pet food has generally experienced a polarisation of demand, with consumers with higher incomes who have been relatively unaffected by the economic fallout of measures to contain COVID-19 upgrading to premium pet food, while those who have been most affected switching to more economic options. As for pet products, the demand for pet healthcare products such as multivitamins has increased in line with the overall rise in health-awareness supported by the pet humanisation trend and the rumour that pets could also be infected by COVID-19 if their immune systems were not fully functional.

Leading players in the Indonesian market have performed well during the pandemic with demand increasing from both existing pet owners and new pet owners that acquired pets during the crisis. With growth across all product categories, many leading players have gained share as they are top of mind and have established more extensive distribution in the market. Major players have also been quick to strengthen their online operations as the pandemic has accelerated the development of e-commerce and increased the importance of digital communication with

consumers. Moreover, the use of e-commerce marketplaces is becoming more prominent and most of the leading brands have opened official stores on platforms such as Shopee, Tokopedia and Lazada.

'000s of animals	2016	2017	2018	2019	2020	2021	CAGR
Bird	1,111.5	1,137.1	1,163.2	1,189.4	1,812.0	1,855.5	10.8%
Cat	2,150.3	2,290.0	2,438.9	2,599.8	2,772.7	2,958.5	6.6%
Dog	459.1	477.5	497.1	515.8	535.2	556.8	3.9%
Reptile	26.1	27.5	29.0	30.5	32.2	34.0	5.4%
Small Mammal	22.6	22.8	23.0	23.2	23.4	23.6	0.9%

Cat is the most popular pets in Indonesia followed by bird and dog. However, in terms of tonnage, pet food segment is dominated by cat food followed by dog food. Pet food segment in Indonesia still has robust growth potential in the future. Throughout 2016 to 2021, sales of dog and cat food has a CAGR of 14.2%. It is estimated that sales of dog and cat food has a CAGR of 8.7% throughout 2021 – 2026 (Euromonitor).

In Indonesia, the majority of pet food products are imported from other countries. During the pandemic, there have been no major interruptions to the importation of products. Moreover, restrictions on the operating hours of pet shops has not had an adverse effect on the market's performance, as pet owners have sought alternative options such as ordering via WhatsApp or phone, or turning to e-commerce. The COVID-19 crisis has seen a significant acceleration in the development of e-commerce, as consumers have appreciated the reduced risk of viral transmission through social contact provided by the channel, as well as the convenience of 24/7 ordering and home delivery and the channel's competitive pricing. At the same time, new technology has been adopted more quickly or been developed in response to the pandemic situation and widespread home seclusion. For example, the use of third-party delivery services such as Go Send and Grab Express have become more prominent for delivering pet food and products across all e-commerce platforms. Some pet shops have partnered with niche delivery service players such as Help and Paxel, which offer more affordable pricing and are, therefore, attractive to consumers, particularly in the economic uncertainty resulting from the COVID-19 crisis. This has more commonly been seen amongst small to medium-sized enterprises with customers ordering via WhatsApp.

Developments seen during the COVID-19 crisis are expected to lay the foundation for the further expansion of pet care in the Indonesian market during the forecast period. The expansion of the pet population during the pandemic will support continued demand. Furthermore, the existing pet humanisation trend has been bolstered as the pandemic has seen long hours spent together cement the bonds between pet owners and their pets. This will strengthen the influence of trends from human product categories in pet care, including supporting the further development of pet owners' awareness of pets' health and wellness.

The rise in health-consciousness is set to have an impact across product categories, leading to demand for food with a healthier image and pet healthcare products such as nutritional supplements. Such developments will support the continued polarisation of demand. Those pet owners who have been less affected by the economic consequences of the pandemic, and, indeed, in many cases saved money during the crisis will shift upmarket to higher-value products, while those who have suffered more severely will seek out more economical options. Moreover, rates of pet abandonment are likely to be correlated with economic performance as it impacts pet owners' disposable income.

The expansion of e-commerce seen during the pandemic is likely to have a lasting effect on consumer behaviour during the forecast period, with the return to more hectic lifestyles enhancing the importance of the channel's convenience even as the positive effect of concerns about viral transmission through social contact diminish. The competitive pricing offered by e-commerce will also attract consumers in the challenging economic conditions resulting from the COVID-19 crisis.

## DESCRIPTION OF THE TERM LOAN FACILITIES AND THE FINANCE DOCUMENTS

### General

The Existing Notes were issued by the Borrower pursuant to the Existing Indenture among the Borrower, the Company, CPB, CWS, MLP and CPgP (the “**Subsidiary Guarantors**”) and Madison Pacific Trust Limited, as trustee for the holders of the Existing Notes (the “**Trustee**”). The Borrower is proposing the Scheme of Arrangement under Section 210 of the Companies Act (Chapter 50; 2006 Revised Edition) of the Republic of Singapore to certain of its creditors, including (but not limited to) the Trustee and the holders of the Existing Notes (collectively, the “**Scheme Creditors**”).

It will be a term of the Scheme of Arrangement that on the Settlement Date:

- (1) the Borrower will restructure the Existing Notes into the Term Loan Facilities;
- (2) the cash to which the holders of the Existing Notes who elected to participate in the Existing Notes Tender Offer are entitled under the Scheme of Arrangement will be transferred for value;
- (3) the cash to which the holders of the MEBs who elected to tender their MEBs in connection with the MEB Tender Offer are entitled under the terms of the MEB Tender Offer will be transferred for value;
- (4) the holders of the Existing Notes who elected to participate in the Existing Notes Exchange will receive their share of the MEB Tranche A Allocation; and
- (5) the Existing Notes will be cancelled and discharged.

The Existing Notes will be discharged and cancelled and the Term Loan Facilities will be documented and governed by multilateral term loan facilities agreements that are not subject to the registration requirements of the Securities Act. See “Transfer Restrictions”. The terms of the Term Loan Facilities will include those stated in the Term Loan Facilities. The Transaction Security Documents referred to below under the caption “—Security for the Term Loan Facilities” define the terms of the security for the Term Loan Facilities.

The following description is a summary of the material provisions of the Term Loan Facilities and the Transaction Security Documents. It does not restate these agreements in their entirety. We urge lenders under the Term Loan Facilities to read the Finance Documents in their entirety because they, and not this description, define the obligations of the Borrower, the Company and the Guarantors and your rights as lenders under the Term Loan Facilities. Copies of the Finance Documents are available for inspection during normal business hours as set forth below under “—Additional Information”. Certain defined terms used in this description but not defined below under “—Certain Definitions” have the meanings assigned to them in the Term Loan Facilities.

Only Finance Parties to the Term Loan Facilities will have rights under the Term Loan Facilities. The Finance Parties are entitled to the benefit of, are bound by, and are deemed to have notice of all provisions of, the Term Loan Facilities.

### Brief Description of the Term Loan Facilities and the Guarantees

The Term Loan Facilities will:

- (1) be general direct obligations of the Borrower;

- (2) rank *pari passu* in right of payment with all existing and future unsubordinated obligations of the Borrower, except for such obligations as may be preferred by provisions of law that are both mandatory and of general application;
- (3) be secured by Liens on the Transaction Security, described below;
- (4) rank senior in right of payment to any future subordinated obligations of the Borrower;
- (5) rank effectively senior in right of payment to unsecured obligations of the Borrower with respect to the value of the Transaction Security pledged by the Obligors securing the Term Loan Facilities (subject to any priority rights of such unsecured obligations pursuant to applicable law); and
- (6) be unconditionally and irrevocably guaranteed, on a joint and several basis, by the Guarantors.

### ***The Guarantees***

The Term Loan Facilities will be unconditionally and irrevocably guaranteed by the Company and each of the Guarantors (together, the “**Guarantors**”). Each guarantee of the Term Loan Facilities (each, a “**Guarantee**”) will be senior obligations of each Guarantor and will not be subordinated to any other Indebtedness.

Each Guarantee will:

- (1) be a general direct obligation of each Guarantor;
- (2) rank *pari passu* in right of payment with all existing and future unsubordinated obligations of each Guarantor, except such obligations as may be preferred by provisions of law that are both mandatory and of general application;
- (3) be secured by Liens on the Transaction Security, described below;
- (4) rank senior in right of payment to any future subordinated obligations of each Guarantor; and
- (5) rank effectively senior in right of payment to unsecured obligations of each Guarantor with respect to the value of the Security pledged by the Pledgors securing the Guarantees (subject to any priority rights of such unsecured obligations pursuant to applicable law).

The obligations of each Guarantor under its Guarantee will be limited as necessary to prevent that Guarantee from constituting a fraudulent transfer or transaction under value under applicable law.

### **Principal, Maturity and Interest**

The Borrower will repay the aggregate Facility A Loans in instalments by repaying on each Facility A Repayment Date an amount which reduces the outstanding aggregate Facility A Loans by the amount set out opposite that Facility A Repayment Date:

<b><u>Facility A Repayment Dates</u></b>	<b><u>Repayment Instalment</u></b>
June 30, 2022	2.5% of the Facility A Loans

December 31, 2022	2.5% of the Facility A Loans
June 30, 2023	2.5% of the Facility A Loans
December 31, 2023	2.5% of the Facility A Loans
June 30, 2024	2.5% of the Facility A Loans
December 31, 2024	2.5% of the Facility A Loans
June 30, 2025	2.5% of the Facility A Loans
December 31, 2025	2.5% of the Facility A Loans
Termination Date in relation to the Facility A	The outstanding aggregate Facility A Loans (including all capitalised interest)

Each Repayment Instalment shall satisfy and discharge the principal amount of the Term Loan Facilities set out above, which principal amount shall be deemed no longer outstanding for purposes of the Term Loan Facilities. Interest shall cease to accrue on the principal amount of the Term Loan Facilities repaid on each Facility A Repayment Date.

The Facility B Loan will be repaid in full on the Termination Date in relation to Facility B.

*Interest on the Term Loan Facilities*

*Facility A Loan*

On each Interest Payment Date falling after the date of the Term Loan Facilities and on or prior to March 31, 2022, the Borrower will pay an amount of accrued interest on the Facility A Loans equal to 8.0% per annum (the "**Base Interest Rate**") in cash and add an amount of accrued interest on the Facility A Loans equal to the difference between the Margin and the Base Interest Rate to the principal amount of the Facility A Loans and such interest shall thereafter constitute principal for the purpose of the Term Loan Facilities.

On each Interest Payment Date falling after March 31, 2022 and on the Termination Date in relation to Facility A, the Borrower shall pay accrued interest on the Facility Loans in cash.

The Margin is dependent on the percentage of the Outstanding Principal Amount of the Existing Notes participating in the Existing Notes Exchange Offer. Specifically:

- if holders of less than 50% of the Outstanding Principal Amount of the Existing Notes participate in the Existing Notes Exchange Offer, the Margin shall be 14.0% per annum;
  - if holders of less than 75% but more than or equal to 50% of the Outstanding Principal Amount of the Existing Notes participate in the Existing Notes Exchange Offer, the Margin shall be 12.0% per annum;
- and

- if all holders or holders of less than 100% but more than or equal to 75% of the Outstanding Principal Amount of the Existing Notes Exchange Offer, the Margin shall be 10.0% per annum.

Cash interest accrued in respect of the Facility A Loan for the period from (and including) December 31 2020 to (and including) the Interest Payment Date falling on or immediately prior to the Settlement Date will be payable on the last Business Day of the calendar month in which the Settlement Date occurs.

#### *Facility B Loan*

There will be no cash interest payable on the Facility B Loan. The accrued interest on the Facility B Loan shall not be payable in cash but shall instead be automatically added to the principal amount of the Facility B Loan on each Interest Payment Date and such interest shall thereafter constitute principal for all purposes of the Term Loan Facilities.

#### *Default interest*

If an Obligor fails to pay any amount payable by it under a Finance Document on its due date, interest shall accrue on the Unpaid Sum from the due date up to the date of actual payment (both before and after judgment) at a rate which is 2% higher than the Margin. Unpaid interest arising on an overdue amount will be compounded with the overdue amount on each Interest Payment Date but will remain immediately due and payable.

#### **Methods of Receiving Payments on the Term Loan Facilities**

Interest payable on the Term Loan Facilities will be paid by Madison Pacific Trust Limited in its capacity as the Paying Agent to the lenders under the Term Loan Facilities.

#### **Paying Agent for the Term Loan Facilities**

Madison Pacific Trust Limited will initially act as paying agent under the Term Loan Facilities. Principal and interest payable on the Term Loan Facilities will be paid by Madison Pacific Trust Limited to the lenders under the Term Loan Facilities.

#### **Transfer**

A lender under the Term Loan Facilities may transfer its commitments under the Facility A Loan in accordance with the provisions of the Term Loan Facilities. Lenders will be required to pay all taxes due on transfer.

#### **Security for the Term Loan Facilities**

The obligations of the Borrower under the Facility A loan Facilities will be secured by a security package and shall consist of the following Security (the “**Transaction Security**”):

- guarantees from the Company and each of the Guarantors
- a first priority fixed and floating charge over all of the assets of the Borrower, including (but not limited to) all of the Borrower’s rights under certain advance purchase agreements entered into by the Borrower with our Company and certain of the Subsidiary Guarantors, including, without limitation, any claims which the Borrower has or will have against any Guarantor
- a first priority fixed charge by the Company of its capital stock in the Borrower (representing the entire issued share capital of the Borrower)

- a first priority pledge by the Company of its capital stock in each of the Subsidiary Guarantors
- a first priority pledge by CPB of its capital stock in CWS
- a first priority charge over the MEBs allocated to the Facility B Lender in connection with the MEB Tender Offer
- a first priority assignment over the Debt Service Account.

The Borrower and the Guarantors (together, the “**Obligors**”) will enter into various security documents (the “**Transaction Security Documents**”) with the Security Agents to define the terms of the security for the Term Loan Facilities. These Security Documents will secure the payment and performance when due of all the obligations of the Borrower under the Term Loan Facilities (together, the “**Secured Liabilities**”) as provided in the Transaction Security Documents.

### *General*

No appraisals of the Transaction Security have been prepared in connection with this Restructuring. There can be no assurance that the proceeds of any sale of the Transaction Security, in whole or in part, pursuant to the Term Loan Facilities or the Transaction Security Documents following an acceleration of the Term Loan Facilities prior to the maturity date, will be sufficient to satisfy amounts due under the Term Loan Facilities. By its nature, some or all of the Transaction Security will be illiquid and may have no readily ascertainable market value. Accordingly, there can be no assurance that the Transaction Security would be sold in a timely manner or at all. Furthermore, the value of the Transaction Security securing the Term Loan Facilities may not be sufficient to satisfy the Borrower’s or the Guarantors’ obligations under the Term Loan Facilities. See “Risk Factors—Risks Relating to the Term Loan Facilities—The proceeds realised from a sale of the Transaction Security may not be sufficient for the Facility A Lenders under the Term Loan Facilities to recover all amounts due on the Term Loan Facilities”.

### *Enforcement of Transaction Security*

The Liens securing the Term Loan Facilities will be granted to the Security Agents. The Security Agents will hold such Liens in the Transaction Security granted pursuant to the Transaction Security Documents with sole authority, as directed by the written instruction of the Majority Facility A Lenders (as defined in the Term Loan Facilities) under the Term Loan Facilities, to exercise remedies under the Transaction Security Documents. The Security Agents have agreed to act as secured party on behalf of the Finance Parties (as defined in the Term Loan Facilities and other secured parties under the applicable Transaction Security Documents, to follow the instructions provided to them under the Term Loan Facilities and the Transaction Security Documents and to carry out certain other duties. However, to the extent the Security Agents enforcing the security pursuant to the Transaction Security Documents sell the shares under the Transaction Security and the purchaser of such shares is a foreign investor or foreign company (PMA Company/PT PMA), the purchaser of such shares will be the legal owner of the shares only upon satisfaction of the following conditions: (i) reporting the transfer of shares through the Online Single Submission (OSS) system, subject to the limitations on maximum foreign ownership under Indonesian law; (ii) amending the Articles of Associations of all companies which will be sold to the purchaser; and (iii) obtaining the approval of the Ministry of Law and Human Rights.

All payments received and all amounts held by the Agent or its agent in respect of the Transaction Security under the Transaction Security Documents will be applied as follows:

- First: in or towards payment pro rata of any unpaid fees, costs and expenses of the Administrative Parties under the Finance Documents;

- Second: in or towards payment pro rata of any accrued interest, fee or commission due but unpaid under the Term Loan Facilities;
- Third: in or towards pro rata of any principal due but unpaid under the Finance Documents;
- Fourth: in or towards payment pro rata of any other sum due but unpaid under the Finance Documents.

The Security Agents may decline to foreclose on the Transaction Security or exercise remedies available if they do not receive indemnification to their satisfaction. In addition, the Security Agents' ability to foreclose on the Transaction Security may be subject to lack of perfection, the consent of third parties, prior Liens and practical problems associated with the realisation of the Security Agents' Liens in the Transaction Security. Neither the Security Agents nor any of their respective officers, directors, employees, attorneys or agents will be responsible or liable for the existence, genuineness, value or protection of any Transaction Security securing the Term Loan Facilities, for the legality, enforceability, effectiveness or sufficiency of the Transaction Security Documents, for the creation, perfection, priority, sufficiency or protection of any of the Liens, or for any defect of deficiency as to any such matters, or for any failure to demand, collect, foreclose or realise upon or otherwise enforce any of the Liens or Transaction Security Documents or any delay in doing so, in each case except to the extent that any such liabilities arise from the Security Agents' fraud, willful misconduct or gross negligence.

The Transaction Security Documents provide that the Obligors will indemnify the Security Agents for all liabilities, obligations, losses, damages, penalties, actions, judgments, suits, costs, expenses or disbursements of any kind imposed against the Security Agents arising out of the Transaction Security Documents except to the extent that any of the foregoing are finally judicially determined to have resulted from the fraud, gross negligence or wilful misconduct of the Security Agents.

### ***Release of Security***

The security created in respect of the Transaction Security granted under the Transaction Security Documents may be released in certain instances, including:

- upon full repayment of the Term Loan Facilities and satisfaction of all other obligations outstanding under the Term Loan Facilities and the Transaction Security Documents;
- upon satisfaction and discharge of the Term Loan Facilities, as set forth under the caption “—Satisfaction and Discharge”; and
- in whole or in part, with the consent of the Majority Facility A Lenders under the Term Loan Facilities in accordance with the provisions described under the caption “—Amendment, Supplement and Waiver”.

### **Tax Gross Up**

All payments made by the Borrower or any Guarantor (each, a “**Payor**”) under, or with respect to, the Term Loan Facilities will be made free and clear of, and without withholding or deduction for, or on account of any present or future tax, duty, levy, impost, assessment or other governmental charge (including penalties, interest and other liabilities related thereto) (collectively, “**Taxes**”) imposed, levied, collected or assessed by the Republic of Singapore unless the Payor is required to withhold or deduct such Taxes by law or by the official interpretation or administration thereof.

If the Payor is required to withhold or deduct any amount for or on account of Taxes imposed or levied by the Republic of Singapore from any payment made under or with respect to the Term Loan Facilities, the Payor will pay an additional amount equivalent to up to a maximum of 1.08696 multiplied by the amount due if no Taxes had been

imposed or levied, subject to that lender providing to the Borrower reasonable evidence to demonstrate that during the relevant tax year it was not tax resident in Singapore (such as by way of example only, a certificate of tax residence issued by a foreign tax authority) (the “**Additional Amounts**”).

The Borrower shall at any time be entitled to assume that a Lender is not a tax resident of Singapore unless the Borrower is provided with evidence by such Lender as to where it is tax resident at that time. For the avoidance of doubt, if a payment is due from a Borrower to a Lender, the Borrower is not required to gross up the amount of that payment if that Lender has not, by the date falling 10 Business Days prior to such payment being due and payable, provided any evidence to the Borrower as to where it is tax resident for the year in which that payment is to be made.

The Payor will pay any present or future stamp, court or documentary taxes, or any other excise or property taxes, charges or similar levies which arise in any jurisdiction from the execution, delivery or registration of the Term Loan Facilities or any other Finance Documents (other than a transfer of a commitment under the Term Loan Facilities).

The foregoing obligations will survive any termination or discharge of the Term Loan Facilities and will apply mutatis mutandis to any jurisdiction in which any successor to a Payor is organised or any political subdivision or taxing authority or agency thereof or therein.

### **Voluntary Prepayment**

The Borrower may at its option voluntarily prepay the Facility A Loan, in whole or in part, provided that if prepaid prior to June 30, 2022, a penalty fee in an amount equal to 3% of the Facility A Loan prepaid shall be payable. There shall be no penalty applicable to voluntary prepayments made on and from June 30, 2022.

### **Cash Sweep**

In addition to the scheduled amortisation on each Repayment Instalment Date, on each Quarter Date falling on or after December 31, 2021, the Company shall apply an amount of cash that is not less than 50% of the Group's EBITDA for the fiscal quarter ending on the immediately preceding Quarter Date in accordance with and in the order set out below

- (1) first, in payment of cash interest accrued on the Facility A Loan and falling due on or prior to that date;
- (2) second, in payment of Repayment Instalments in respect of the Facility A Loan falling due on or prior to that date;
- (3) third, in payment of interest accrued on the Facility A Loan and to be and/or which has been capitalised on or before that date; and
- (4) fourth, of the cash remaining after payment of the items set out above:
  - (a) 70% shall be applied in prepayment of the Repayment Instalments in respect of the Facility A Loans falling due after that date but prior to the Termination Date for the Facility A Loans (in inverse chronological order); and
  - (b) provided that there are no events of default which have occurred and are continuing, 30% shall be applied in accordance with and in the order set out below:
    - (i) first, in payment of interest accrued on the Facility B Loan and to be and/or which has been capitalised on or before that date; and
    - (ii) second, repayment of the Facility B Loan.

If events of default have occurred and are continuing, the 30% shall be applied in prepayment of the Repayment Instalments in respect of the Facility A Loan falling due after that date but prior to the Termination Date for the Facility A Loans (in inverse chronological order).

Any interest, Repayment Instalments or repayments due in respect of the Facility A Loan shall be payable on the terms set out in the Term Loan Facilities regardless of whether there is sufficient cash available to satisfy all limbs of the Cash Sweep.

## **Mandatory Repayment**

### ***Change of Control***

If a Change of Control occurs, or all or substantially all of the assets of the Group whether in a single transaction or a series of related transactions are sold, the Facilities will be immediately cancelled and shall immediately cease to be available for further utilisation and all Loans, accrued interest and other amounts under the Finance Documents, shall become immediately due and payable.

The mandatory repayment provision includes a phrase relating to sale (in a single transaction or a series of related transactions) of “all or substantially all” of the assets of the Group. Although there is a limited body of case law interpreting the phrase “substantially all”, there is no precise established definition of the phrase under applicable law. Accordingly, the ability of a lender to require the Borrower to mandatorily repay the Facilities as a result of a sale of less than all of the assets of the Group to another Person or group may be uncertain. The Borrower’s obligation to make mandatory repayment of the Facilities upon a Change of Control may be waived or modified at any time prior to the occurrence of such Change of Control with the written consent of the Majority Facility A Lenders. See “Amendment, Supplement and Waiver”.

The Borrower’s ability to pay cash to the Lenders upon a Change of Control may be limited by the Borrower’s and the Company’s then existing financial resources. See “Risk Factors—Risks Relating to the Term Loan Facilities—We may be unable to finance a Change of Control Mandatory Repayment”.

## TAXATION

The following summary of certain Singapore and Indonesian income tax consequences of the participation in the Term Loan Facilities and the acquisition, ownership and disposition of the MEBs is based upon applicable laws, regulations, administrative guidelines and circulars, rulings and decisions in effect as of the date of this Information Memorandum, all of which are subject to change or interpretation by the relevant tax authorities or the courts, occurring after such date (possibly with retroactive effect). Neither these statements nor any other statements in this Information Memorandum intended or are to be regarded as advice on the tax position of any lender under the Term Loan Facilities and/or holders of the MEBs or of any person acquiring, selling or otherwise dealing with the Term Loan Facilities and/or MEBs or on any tax implications arising from the participation in the Term Loan Facilities or the acquisition, sale or other dealings in respect of the MEBs. The statements made herein do not purport to be a comprehensive or exhaustive description of all of the tax considerations that may be relevant to a decision to participate in the Term Loan Facilities and acquire, own or dispose of the MEBs and do not purport to deal with the tax consequences applicable to all categories of investors, some of which (such as dealers in securities) may be subject to special rules or tax rates. The statements should not be regarded as advice on the tax position of any person and should be treated with appropriate caution. Lenders under the Term Loan Facilities and holders of MEBs (each, a “**MEB holder**”, and, together, “**MEB Holders**”) are advised to consult their own tax advisors as to the tax consequences of the participation in the Term Loan Facilities and the acquisition, ownership of or disposition of the MEBs, including, in particular, the effect of any foreign, state or local tax laws to which they are subject. It is emphasised that none of the Borrower, the MEB Issuer or any other persons involved in the Term Loan Facilities accepts responsibility for any tax effects or liabilities resulting from the participation in the Term Loan Facilities or acquisition, ownership or disposition of the MEBs.

### **Singapore Taxation**

The statements made herein regarding taxation are general in nature and are based on certain aspects of current income tax laws in Singapore and administrative guidelines issued by the relevant authorities in force as at the date of this Information Memorandum and are subject to any changes in such laws or administrative guidelines, or the interpretation of those laws or guidelines, occurring after such date, which changes could be made on a retroactive basis. These laws and guidelines are also subject to various interpretations and the relevant tax authorities or the courts could later disagree with the explanations or conclusions set out below.

### *Taxation relating to Term Loan Facilities*

#### *Interest and Other Payments*

Subject to the following paragraphs, under Section 12(6) of the Income Tax Act, Chapter 134 of Singapore (the “**Income Tax Act**”) the following payments are deemed to be derived from Singapore:

- (a) any interest, commission, fee or any other payment in connection with any loan or indebtedness or with any arrangement, management, guarantee, or service relating to any loan or indebtedness which is (i) borne, directly or indirectly, by a person resident in Singapore or a permanent establishment in Singapore (except in respect of any business carried on outside Singapore through a permanent establishment outside Singapore or any immovable property situated outside Singapore) or (ii) deductible against any income accruing in or derived from Singapore; or
- (b) any income derived from loans where the funds provided by such loans are brought into or used in Singapore.

Such payments, where made to a person not known to be a resident of Singapore for tax purposes, are generally subject to withholding tax in Singapore. The rate at which tax is to be withheld for such payments (other than those subject to the 15.0% final withholding tax described below) to non-resident persons (other than non-resident individuals) is the prevailing corporate tax rate, currently 17.0%. The applicable rate for non-resident individuals is

22.0%. However, if the payment is derived by a person not resident in Singapore from sources other than its trade, business, profession or vocation carried on or exercised in Singapore and is not effectively connected with any permanent establishment in Singapore of that person, the payment is subject to a final withholding tax of 15.0%. The rate of 15.0% may be reduced by applicable tax treaties.

Where Singapore withholding tax is required to be deducted, the amount of payment due from the Borrower shall be increased to an amount which (after making any tax deduction) leaves an amount equal to the payment which would have been due if no tax deduction had been required, provided that the increased payment due from the Borrower shall not exceed 1.08696 multiplied by the amount due if no tax deduction had been required and such increase will only be made in respect of amounts payable to a lender who has provided reasonable evidence to the Borrower to demonstrate that during the relevant tax year in which such payment was made, it was not a tax resident of Singapore. For the avoidance of doubt, if a tax deduction is required by law to be made by the Borrower, the amount of payment due from the Borrower will be increased in accordance with the foregoing but the Borrower will not be required to gross up the amount of that payment if that lender has not, by the date falling 10 business days prior to such payment being due and payable, provided any evidence to the Borrower as to where it is a tax resident for the year in which that payment is to be made. In all other circumstances, any Singapore tax payable on the interest is on the account of the lenders under the Term Loan Facilities.

#### *Adoption of FRS 39 or FRS 109 - Treatment for Singapore Income Tax Purposes*

The IRAS has published an e-Tax Guide entitled: “Income Tax Implications arising from the adoption of Financial Reporting Standard 39 – Financial Instruments: Recognition and Measurement” (the “**FRS 39 e-Tax Guide**”) which generally aligns the tax treatment of financial assets and financial liabilities to the accounting treatment. Legislative amendments to give effect to the tax treatment set out in the FRS 39 e-Tax Guide have been enacted in Section 34A of the Income Tax Act.

The FRS 39 e-Tax Guide and Section 34A of the Income Tax Act generally apply, subject to certain “opt-out” provisions, to taxpayers who are required to comply with FRS 39 for financial reporting purposes.

The Accounting Standards Council has issued a new financial reporting standard for financial instruments, FRS 109 – Financial Instruments, which replaces FRS 39 and is effective for annual periods beginning on or after 1 January 2018. Section 34AA of the Income Tax Act provides for the tax treatment of gains or losses in respect of financial instruments recognised under FRS 109. The IRAS has also issued an e-Tax Guide entitled “Income Tax: Income Tax Treatment Arising from Adoption of FRS 109 – Financial Instruments”. For taxpayers who adopt FRS 109 for accounting purpose, the tax treatment of their financial assets and financial liabilities will generally follow the accounting treatment, except for certain circumstances. Unlike in the case of FRS 39, there is no “opt-out” provision for taxpayers i.e. taxpayers who adopt FRS 109 for accounting purposes cannot opt out of the tax treatment under Section 34AA of the Income Tax Act.

Lenders who may be subject to the tax treatment under Section 34A and/or Section 34AA of the Income Tax Act should consult their own accounting and tax advisers regarding the Singapore income tax treatment and consequences of their participation in the Term Loan Facilities.

#### ***Taxation relating to MEBs***

##### *Interest and Other Payments*

As the MEBs are issued at zero coupon rate, there would not be any interest and other payments made by the MEB Issuer to MEB holders.

### *Gains on sale or exchange of MEBs*

The exchange of the MEBs for MEB Shares may be viewed as a disposal of the MEBs in the hands of each MEB Holder. Where the value of the MEBs recognised by the MEB Holders is less than that of the MEB Shares at the point of exchange of MEBs for MEB Shares by the MEB Holders, MEB Holders may recognise a gain from the exchange of the MEBs.

Singapore tax does not apply to gains of a capital nature. Whether any gains are capital or income in nature is a question to be determined in the light of the facts of the case. As a matter of practice, the IRAS applies what is known as the "badges of trade" to distinguish between "gains or profits from any trade, business" under Section 10(1)(a) of the ITA and gains of a capital nature.

The characterisation of gains arising from the sale or exchange of the MEBs will depend on the facts and circumstances of each MEB Holder. Any gains considered to be in the nature of capital arising from the sale or exchange of the MEBs will not be taxable in Singapore. However, any gains derived by any person from the sale, disposal or exchange of the MEBs which are gains from any trade, business, profession or vocation carried on by that person, if (i) accruing in or derived from Singapore; or (ii) received in Singapore, may be taxable in Singapore as such gains could be considered income in nature. In addition, it is not entirely clear whether the value of the MEB Shares at the point of exchange would be regarded as the proceeds of such disposal to be used to compute the gain or loss on the MEBs in the hands of MEB Holders. MEB Holders should consult their own tax advisers to understand the implications and consequences that may be applicable to them.

MEB Holders who have adopted or are adopting FRS 39 or FRS 109 may, for Singapore income tax purposes, be required to recognise gains or losses (not being gains or losses in the nature of capital) on the MEBs, irrespective of their disposal, in accordance with FRS 39 or FRS 109. Please see the section above on "Adoption of FRS 39 or FRS 109 - Treatment for Singapore Income Tax Purposes". MEB Holders who may be subject to the tax treatment under Section 34A and/or Section 34AA of the Income Tax Act should consult their own accounting and tax advisers regarding the Singapore income tax treatment and consequences of their acquisition, holding or disposal of the MEBs.

### **Indonesian Taxation**

#### *Term Loan Facilities*

There are no other material Indonesian taxes or duties (e.g., inheritance taxes, gift duties, stamp duty or similar taxes) that would be required to be paid by a lender under the Term Loan Facilities in relation to any of the payments made by the Borrower or the Guarantors, provided that the lender under the Term Loan Facilities is not an Indonesian tax resident.

#### *MEBs*

There are no other material Indonesian taxes or duties (e.g., inheritance taxes, gift duties, stamp duty or similar taxes) that would be required to be paid by a MEB Holder in relation to the holding, disposal and exchange of the MEBs or the issue, delivery and holding of the MEB Shares, provided that the holder is not an Indonesian tax resident and the MEBs are not transacted through an Indonesian broker.

## **OFFERING RESTRICTIONS**

This Information Memorandum does not constitute an offer or an invitation to participate in the Restructuring in any jurisdiction in or from which, or to any person to whom, it is unlawful to make such offer or invitation under applicable laws. The distribution of this Information Memorandum in certain jurisdictions may be restricted by law. Persons into whose possession this Information Memorandum comes are required by each of the Borrower, our Company and the Information Agent to inform themselves about, and to observe, any such restrictions.

Only holders of the Existing Notes as of the Record Time (including those who hold an economic or beneficial interest as principal in the Existing Notes at the Record Time) are authorised to receive or review this Information Memorandum or to participate in the Restructuring.

## **INDEPENDENT AUDITORS**

The consolidated financial statements of our Company for the year ended December 31, 2018, 2019 and for the ten months ended October 31, 2020 were audited by Purwantono, Sungkoro dan Surja., independent auditors as approved under Indonesian law, as stated in the report appearing herein.

## **SUMMARY OF CERTAIN DIFFERENCES BETWEEN INDONESIAN FINANCIAL ACCOUNTING STANDARDS AND UNITED STATES GENERALLY ACCEPTED ACCOUNTING PRINCIPLES**

Our consolidated financial statements included elsewhere in this Information Memorandum have been prepared and presented in accordance with Indonesian Financial Accounting Standards (“**IFAS**”). Significant differences exist between IFAS and United States Generally Accepted Accounting Principles (“**U.S. GAAP**”), which might be material to the financial statements herein. The matters described below should not be expected to reveal all differences between IFAS and U.S. GAAP that are relevant to us.

Neither the Borrower nor the Company has made any attempt to quantify the impact of those differences, nor has any attempt been made to identify all disclosure, presentation, or classification differences that would affect the manner in which transactions or events are presented in the consolidated financial statements. Had any such quantification or identification been undertaken by management, other potential significant accounting and disclosure differences may have come to its attention which are not summarized below. Accordingly, it should not be construed that the following summary of certain significant differences between IFAS and U.S. GAAP is complete.

Regulatory bodies that promulgate IFAS and U.S. GAAP have significant ongoing projects that could affect future comparisons such as this one. Further, no attempt has been made to identify future differences between IFAS and U.S. GAAP as a result of prescribed changes in accounting standards and regulations. Finally, no attempt has been made to identify all future differences between IFAS and U.S. GAAP that may affect the financial statements as a result of transactions or events that may occur in the future.

The Company believes that the application of U.S. GAAP to the consolidated financial statements could have a material and significant impact upon the consolidated financial statements reported under IFAS. In making a decision whether or not to participate in the Restructuring and/or the Term Loan Facilities, Noteholders must rely upon their own examination of the Group, terms of the Restructuring, and the consolidated financial statements. Noteholders should consult their own professional advisors for an understanding of the differences between IFAS and U.S. GAAP, and how those differences might affect the consolidated financial statements herein.

### **Financial Instruments**

Under IFAS, prior to 1 January 2020, accounting for financial instruments are prescribed in various standards such as:

SFAS 50 — Financial Instruments: Presentation

SFAS 55 — Financial Instruments: Recognition and Measurement

SFAS 60 — Financial Instruments: Disclosures

Interpretation of Financial Accounting Standards 26 — Reassessment of Embedded Derivatives

IFAS 28 — Extinguishing Financial Liabilities — with Equity Instruments

SFAS 71 — Financial Instruments has replaced SFAS 55 for the financial year beginning on or after 1 January 2020. However, for some entities, SFAS 55 remains relevant (for example insurers that apply the SFAS 62 — Insurance contracts). On transition to SFAS 71, entities may also continue to apply SFAS 55 hedge accounting. The objective of the new standards is to establish requirements for all aspects of accounting for financial instruments, including distinguishing debt from equity, netting, recognition, derecognition, measurement, hedge accounting and disclosure.

Following is a comparison between IFAS and US GAAP, prior to 1 January 2020.

Under IFAS, compound (hybrid) financial instruments are required to be split into a debt component and an equity component and, if applicable, a derivative component. The derivative component is accounted for using fair value accounting. Under U.S. GAAP, compound (hybrid) financial instruments are not split into debt and equity components unless certain specific requirements are met, but they may be bifurcated into debt and derivative components, with the derivative component accounted for using fair value accounting.

Under IFAS, only objective evidence of one or more credit loss events can generally result in an impairment being recognized in the statement of comprehensive income for an available-for-sale (“AFS”) debt instrument. The impairment loss is measured as the difference between the debt instrument’s amortized cost basis and its fair value. Impairment losses for AFS debt instruments may be reversed through the statement of other comprehensive income if the fair value of the instrument increases in a subsequent period and the increase can be objectively related to an event occurring after the impairment loss was recognized. Under U.S. GAAP, declines in fair value below cost may result in an impairment loss being recognized in the income statement on an AFS debt instrument due solely to a change in interest rates (risk free or otherwise) if the entity has the intent to sell the debt instrument or it is more likely than not that it will be required to sell the debt instrument before its anticipated recovery. In this circumstance, the impairment loss is measured as the difference between the debt instrument’s amortized cost basis and its fair value. When a credit loss exists, but: (i) the entity does not intend to sell the debt instrument, or (ii) it is not more likely than not that the entity will be required to sell the debt instrument before the recovery of the remaining cost basis, the impairment is separated into the amount representing the credit loss and the amount related to all other factors. The amount of the total impairment related to the credit loss is recognized in the income statement and the amount related to all other factors is recognized in other comprehensive income, net of applicable taxes. When an impairment loss is recognized in the income statement, a new cost basis in the instrument is established equal to the previous cost basis less the impairment recognized in earnings, and therefore, impairment losses recognized in the income statement cannot be reversed for any future recoveries.

Under IFAS, impairment of an AFS equity instrument is recognized in the statement of comprehensive income when there is objective evidence that the AFS equity instrument is impaired and the cost of the investment in the equity instrument may not be recovered. A significant or prolonged decline in the fair value of an equity instrument below its cost is considered objective evidence of an impairment. Under U.S. GAAP, impairment of an AFS equity instrument is recognized in the income statement if the equity instrument’s fair value is not expected to recover sufficiently in the near term to allow a full recovery of the entity’s cost basis. An entity must have the intent and ability to hold an impaired equity instrument until such near-term recovery; otherwise, an impairment loss must be recognized in the income statement.

Under IFAS, the impairment loss of a held-to-maturity (“HTM”) instrument is measured as the difference between the carrying amount of the instrument and the present value of estimated future cash flows discounted at the instrument’s initial effective interest rate. The carrying amount of the instrument is reduced either directly or through the use of an allowance account. The amount of impairment loss is recognized in the statement of comprehensive income. Under U.S. GAAP, the impairment loss of a HTM instrument is measured as the difference between its fair value and amortized cost basis. The amount of the total impairment related to the credit loss is recognized in the income statement, and the amount related to all other factors is recognized in other comprehensive income. The carrying amount of an HTM investment after recognition of an impairment is the fair value of the debt instrument at the date of the impairment. The new cost basis of the debt instrument is equal to the previous cost basis less the impairment recognized in the income statement. The impairment recognized in other comprehensive income is accredited to the carrying amount of the HTM instrument through other comprehensive income over its remaining life.

Under IFAS, the definition of a derivative does not include a requirement that a notional amount be indicated, nor is net settlement a requirement. Certain of the scope exceptions under IFAS differ from those under U.S. GAAP. Under U.S. GAAP, to meet the definition of a derivative, an instrument must: (i) have one or more underlyings, one

or more notional amounts or payment provisions, or both, (ii) require no initial net investment (as defined), and (iii) be able to be settled net (as defined). Certain scope exceptions exit for instruments that would otherwise meet these criteria.

IFAS allows risks associated with only a portion of the instrument's cash flows or fair value (such as one or more selected contractual cash flows or portions of them or a percentage of the fair value) when hedging a risk component of a financial instrument, provided that effectiveness can be measured, that is, the portion is separately identifiable and reliably measurable. Under U.S. GAAP, the risk components that may be hedged are specifically defined by the literature, with no additional flexibility. Under U.S. GAAP, the shortcut method for interest rate swaps hedging recognized debt instruments is permitted. The long-haul method of assessing and measuring hedge effectiveness for a fair value hedge of the benchmark interest rate component of a fixed rate debt instrument requires that all contractual cash flows be considered in calculating the change in the hedged item's fair value even though only a component of the contractual coupon payment is the designated hedged item.

Under IFAS, the use of the shortcut method for interest rate swaps hedging recognized debt is not permitted. Assessment and measurement of hedge effectiveness considers only the change in fair value of the designated hedged portion of the instrument's cash flows, as long as the portion is separately identifiable and reliably measurable.

Under IFAS, the inclusion of an option's time value in assessing and measuring the hedge effectiveness is not permitted. Under U.S. GAAP, the inclusion of an option's time value in assessing and measuring the hedge effectiveness is permitted.

Under IFAS, derecognition of financial assets is based on a mixed model that considers transfer of risks and rewards and control. Transfer of control is considered only when the transfer of risks and rewards assessment is not conclusive. If the transferor has neither retained nor transferred substantially all of the risks and rewards, there is then an evaluation of the transfer of control. Control is considered to be surrendered if the transferee has the practical ability to unilaterally sell the transferred asset to a third party without restrictions. There is no legal isolation test required. The derecognition criteria may be applied to a portion of a financial asset if the cash flows are specifically identified or represent a pro rata share of the financial asset or a pro rata share of specifically identified cash flows. Under U.S. GAAP, derecognition of financial assets (i.e. sales treatment) occurs when effective control over the financial asset has been surrendered whereby: (i) the transferred financial assets are legally isolated from the transferor, (ii) each transferee (or, if the transferee is a securitization entity or an entity whose sole purpose is to facilitate an asset-backed financing, each holder of its beneficial interests) has the right to pledge or exchange the transferred financial assets (or beneficial interests), and (iii) the transferor does not maintain effective control over the transferred financial assets or beneficial interests (e.g. through a call option or repurchase agreement). The derecognition criteria may be applied to a portion of a financial asset only if it mirrors the characteristics of the initial entire financial asset.

IFAS requires the initial effective interest rate to be used throughout the life of the instrument for all financial assets and liabilities, except for certain reclassified financial assets, in which case the effect of increases in cash flows are recognized as prospective adjustments to the effective interest rate. U.S. GAAP requires the use of catch-up approach, retrospective method, or prospective method of calculating the interest for amortized cost-based assets, depending on the type of instrument.

Under IFAS, loans and receivables are carried at amortized cost unless classified into the "fair value through profit or loss" category or the "available for sale" category, both of which are carried at fair value on the statement of financial position. Under U.S. GAAP, unless the fair value option is elected, loans and receivables are classified as either: (i) held for investment, which are measured at amortized cost, or (ii) held for sale, which are measured at the lower of cost or fair value.

Under IFAS, the day one gains and losses on financial instruments are recognized only when their fair value is evidenced by a quoted price in an active market for an identical asset or liability (i.e. level or level 2 input) or based

on a valuation technique that uses only data from observable markets. Under U.S. GAAP, entities are not precluded from recognizing day one gains and losses on financial instruments reported at fair value even when all inputs to the measurement model are not observable. Unlike IFAS, U.S. GAAP contains no specific requirements regarding the observability of inputs, thereby potentially allowing for the recognition of gains or losses at initial recognition of an asset or liability even when the fair value measurement is based on a valuation model with significant unobservable inputs (i.e. level 3 measurements).

Under IFAS, there is no practical expedient to assume that net asset value per share (“NAV”) represents the fair value of certain alternative investments. Under U.S. GAAP, entities are provided a practical expedient to estimate the fair value of certain alternative investments (i.e. a limited partner interest in a Private Equity fund) using NAV or its equivalent.

Following is a comparison between IFAS and US GAAP, effective from 1 January 2020.

Under IFAS, classification of certain instruments with characteristics of both debt and equity is largely based on the contractual obligation to deliver cash, assets or an entity’s own shares. Contracts that are indexed to, and potentially settled in, an entity’s own stock are classified as equity if settled only by delivering a fixed number of shares for a fixed amount of cash. U.S. GAAP specifically identifies certain instruments with characteristics of both debt and equity that must be classified as liabilities. Certain other contracts that are indexed to, and potentially settled in, an entity’s own stock may be classified as equity if they either (1) require physical settlement or net-share settlement or (2) give the issuer a choice of net-cash settlement or settlement in its own shares. Classification of certain instruments with characteristics of both debt and equity is largely based on the contractual obligation to deliver cash, assets or an entity’s own shares. Contracts that are indexed to, and potentially settled in, an entity’s own stock are classified as equity if settled only by delivering a fixed number of shares for a fixed amount of cash.

Under IFAS, compound (hybrid) financial instruments are required to be split into a debt and equity component or, if applicable, a derivative component. The derivative component is accounted for using fair value accounting. Under U.S. GAAP, compound (hybrid) financial instruments (e.g., convertible bonds) are not split into debt and equity components unless certain specific requirements are met, but they may be bifurcated into debt and derivative components, with the derivative component accounted for using fair value accounting.

Under IFAS, regardless of an instrument’s legal form, its classification and measurement depend on its contractual cash flow (CCF) characteristics and the business model under which it is managed. The assessment of the CCF determines whether the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Financial assets that pass the cash flow characteristics test are subsequently measured at amortized cost, FV-OCI or fair value, with changes in fair value recognized in profit or loss (FV-PL), based on the entity’s business model for managing them, unless the fair value option is elected. Financial assets that fail the cash flow characteristics test are subsequently measured at FV-PL. Under U.S. GAAP, classification and measurement depend largely on the legal form of the instrument (i.e., whether the financial asset represents a security or a loan) and management’s intent for the instrument. At acquisition, debt instruments that meet the definition of a security are classified in one of three categories and subsequently measured as follows: (i) held to maturity (HTM) - amortized cost; (ii) trading - fair value, with changes in fair value recognized in net income (FV-NI); (iii) available for sale (AFS) - fair value, with changes in fair value recognized in other comprehensive income (FV-OCI). Unless the fair value option is elected, loans and receivables are classified as either: (1) held for investment, and then measured at amortized cost, or (2) held for sale, and then measured at the lower of cost or fair value.

Under IFAS, equity investments are measured at FV-PL. An irrevocable FV-OCI election is available for non-derivative equity investments that are not held for trading. If the FV-OCI election is made, gains or losses recognized in OCI are not recycled (i.e., reclassified to profit or loss) upon derecognition of those investments. Under U.S. GAAP, equity investments are measured at FV-NI. A measurement alternative is available for equity investments that do not have readily determinable fair values and do not qualify for the net asset value (NAV) practical expedient under ASC

820. Under this alternative, investments may be measured at cost, less any impairment. If an entity identifies observable price changes in orderly transactions for the identical or a similar investment of the same issuer, it must measure its equity investment at fair value in accordance with ASC 820 as of the date that the observable transaction occurred.

Under IFAS, the calculation of the effective interest rate is generally based on the estimated cash flows (without considering credit losses) over the expected life of the financial asset. IFAS generally requires the original effective interest rate to be used throughout the life of the financial instrument. When estimated cash flows change, an entity follows an approach that is analogous to the catch-up method under U.S. GAAP. Under U.S. GAAP, the effective interest method is generally applied on the basis of contractual cash flows for financial assets. However, in some instances, estimated cash flows are used. U.S. GAAP discusses three different approaches - catch-up, retrospective or prospective - to account for a change in estimated cash flows, depending on the type of instrument and the reason for the change.

Under IFAS, there is a single impairment model for all debt instruments not measured at FV-PL (i.e., measured at amortized cost or FV-OCI), including loans and debt securities. The guiding principle is to reflect the general pattern of deterioration or improvement in the credit quality of financial instruments. The amount of expected credit loss (ECL) recognized as a loss allowance depends on the extent of credit deterioration since initial recognition. Generally, there are two measurement bases: (i) in Stage 1, 12-month ECL, which applies to all items (on initial recognition and thereafter) as long as there is no significant deterioration in credit risk; and (ii) in Stages 2 and 3, lifetime ECL, which applies whenever there has been a significant increase in credit risk. In Stage 2, interest income is calculated on the asset's gross carrying amount. In Stage 3, a credit event has occurred, and interest income is calculated on the asset's amortized cost (i.e., net of the allowance). For financial assets that are debt instruments measured at FV-OCI, impairment gains and losses are recognized in profit or loss. However, the ECLs do not reduce the carrying amount of the financial assets in the statement of financial position, which remains at fair value. Instead, impairment gains and losses are accounted for as an adjustment to the revaluation reserve accumulated in OCI (the "accumulated impairment amount"), with a corresponding charge to profit or loss. When a debt instrument measured at FV-OCI is derecognized, IFAS requires the cumulative gains and losses previously recognized in OCI to be reclassified to profit or loss. If the amount of ECLs decreases, the accumulated impairment amount in OCI is reduced, with a corresponding adjustment to profit or loss.

Under U.S. GAAP, prior to the adoption of ASC 326, declines in fair value below cost may result in an impairment loss being recognized in the income statement on a debt instrument measured at FVOCI solely due to a change in interest rates if the entity has the intent to sell the debt instrument or it is more likely than not that it will be required to sell the debt instrument before its anticipated recovery. In this circumstance, the impairment loss is measured as the difference between the debt instrument's amortized cost basis and its fair value. When a credit loss exists, but (1) the entity does not intend to sell the debt instrument, or (2) it is not more likely than not that the entity will be required to sell the debt instrument before the recovery of the remaining cost basis, the impairment is separated into the amount representing the credit loss and the amount related to all other factors. The amount of the total impairment related to the credit loss is recognized in the income statement and the amount related to all other factors is recognized in OCI, net of applicable taxes. When an impairment loss is recognized in the income statement, a new cost basis in the instrument is established, which is the previous cost basis less the impairment recognized in earnings. As a result, impairment losses recognized in the income statement cannot be reversed for any future recoveries. After the adoption of ASC 326, for debt securities that are measured at FV-OCI, if the amortized cost of a debt security exceeds its fair value, the security is impaired. When an entity intends to sell an impaired debt security (or it is more likely than not that the entity will be required to sell the security before recovery of its amortized cost basis), the entire impairment (i.e., the difference between amortized cost and fair value) is recognized as a direct reduction in the security's amortized cost basis with the impairment loss reported in earnings. When an entity does not intend to sell an impaired debt security (and it is not more likely than not that the entity will be required to sell the security before recovery of its amortized cost basis), the entity must determine whether any impairment is attributable to credit-related factors. When evaluating an impairment, entities may not use the length of time a security has been in an unrealized loss position as a factor, either by itself or in combination with other factors, to conclude that a credit loss does not exist.

This determination should be performed at the individual security level. Credit-related impairment is measured as the difference between the debt security's amortized cost basis and the present value of expected cash flows and is recognized as an allowance on the balance sheet with a corresponding adjustment to earnings. The allowance should not exceed the amount by which the amortized cost basis exceeds fair value. Both the allowance and the adjustment to net income can be adjusted if conditions change. Impairment that isn't credit-related is recognized in OCI.

Under IFAS, equity instruments are measured at FV-PL or FVOCI. That is, no measurement alternative is available. For equity instruments measured at FVOCI, gains and losses recognized in OCI are never reclassified to profit or loss. Therefore, there is no impairment recognized for these instruments. Under U.S. GAAP, equity investments are generally measured at FV-NI and therefore not reviewed for impairment. However, an equity investment without a readily determinable fair value for which the measurement alternative has been elected is qualitatively assessed for impairment at each reporting date. If a qualitative assessment indicates that the investment is impaired, the entity will have to estimate the investment's fair value in accordance with ASC 820 and, if the fair value is less than the investment's carrying value, recognize an impairment loss in net income equal to the difference between carrying value and fair value.

Under IFAS, as discussed above, there is a single impairment model for debt instruments not measured at FV-PL (i.e., measured at amortized cost or FV-OCI), including loans and debt securities. Refer to "Impairment recognition - debt instruments measured at FV-OCI" above for a discussion of this model. Write-downs (charge-offs) of loans and other receivables are recorded when the entity has no reasonable expectation of recovering all or a portion of the CCFs of the asset. IFAS does not provide guidance on accounting for subsequent recoveries. Under U.S. GAAP, prior to the adoption of ASC 326, the impairment model for loans and other receivables measured at amortized cost is an incurred loss model. Losses from uncollectible receivables are recognized when (1) it is probable that a loss has been incurred (i.e., when, based on current information and events, it is probable that a creditor will be unable to collect all amounts due according to the contractual terms of the receivable) and (2) the amount of the loss is reasonably estimable. The total allowance for credit losses should include amounts for financial assets that have been measured for impairment, whether individually under ASC 310-10 or collectively (in groups of receivables) under ASC 450-20. Changes in the allowance are recognized in earnings. Write-downs (charge-offs) of loans and other receivables are recorded when the asset is deemed uncollectible. Recoveries of loans and receivables previously written down are recorded when received. For HTM debt securities, the impairment analysis is the same as it is for debt securities measured at FV-OCI, except that an entity should not consider whether it intends to sell, or will more likely than not be required to sell, the debt security before the recovery of its amortized cost basis. This is because the entity has already asserted its intent and ability to hold an HTM debt security to maturity. When an investor does not expect to recover the entire amortized cost of the HTM debt security, the HTM debt security is written down to its fair value. The amount of the total impairment related to the credit loss is recognized in the income statement, and the amount related to all other factors is recognized in OCI. The carrying amount of an HTM debt security after the recognition of an impairment is the fair value of the debt instrument at the date of the impairment. The new cost basis of the debt instrument is equal to the previous cost basis less the impairment recognized in the income statement. The impairment recognized in OCI for an HTM debt security is accreted to the carrying amount of the HTM instrument over its remaining life. This accretion does not affect earnings. After the adoption of ASC 326, financial assets measured at amortized cost, including loans, receivables and HTM securities (including beneficial interests accounted for under ASC 325-40), follow the current expected credit loss (CECL) model. Under the CECL model, a lifetime expected credit loss is recorded upon initial recognition of assets in scope. The objective of the model is to recognize an allowance for credit losses that results in the financial statements reflecting the net amount expected to be collected. To determine the expected credit losses, entities must consider, among other things, available relevant information about the collectability of cash flows (including information about past events, current conditions and reasonable and supportable forecasts). An expected credit loss estimate requires entities to reflect the risk of loss, even when that risk is remote. This is accomplished by pooling assets with similar risk characteristics. As a result of using pool-based assumptions, an estimate of zero credit loss may be appropriate only in limited circumstances. Write-downs (charge-offs) of loans and other receivables are recorded when the entity deems all or a portion of a financial asset to be uncollectible. Additionally, when measuring the allowance for credit losses, entities should incorporate an estimate of expected recoveries.

Under IFAS, definition of a derivative does not include a requirement that a notional amount be indicated, nor is net settlement a requirement. Certain of the scope exceptions under IFAS differ from those under U.S. GAAP. Under U.S. GAAP, to meet the definition of a derivative, an instrument must (1) have one or more underlyings, and, one or more notional amounts or payment provisions or both, (2) require no initial net investment, as defined, and (3) be able to be settled net, as defined. Certain scope exceptions exist for instruments that would otherwise meet these criteria. Under IFAS, hedging of risk components of both financial and nonfinancial items is allowed, provided that the risk component is separately identifiable and reliably measurable. Under U.S. GAAP, hedging of risk components of both financial and nonfinancial items is allowed if certain criteria are met. Under U.S. GAAP, entities can separately hedge the foreign exchange risk, credit risk or interest rate risk associated with a financial instrument. However, interest rate components that may be hedged are specifically defined by the literature as benchmark interest rates for fixed-rate financial instruments, and contractually specified interest rates for variable-rate financial instruments. If the hedged transaction is the forecasted purchase or sale of a nonfinancial asset, entities may separately hedge foreign exchange risk or any risk component that is contractually specified.

Under IFAS, to qualify for hedge accounting, there must be an economic relationship between the hedged item and the hedging instrument, the value changes resulting from that economic relationship cannot be dominated by credit risk, and the hedge ratio should generally be the same as the ratio management actually uses to hedge the quantity of the hedged item. Ongoing prospective assessments of effectiveness are required to be performed, at a minimum, at the time an entity prepares its annual or interim financial statements or upon a significant change in the circumstances affecting hedge effectiveness requirements, whichever occurs first. Ineffectiveness is measured and recognized through profit or loss each reporting period. For cash flow hedges and net investment hedges, the ineffectiveness recorded is limited to overhedges. The shortcut method for interest rate swaps hedging recognized debt instruments is not permitted. Under U.S. GAAP, to qualify for hedge accounting the relationship must be “highly effective.” Ongoing prospective and retrospective assessments of hedge effectiveness are required on a periodic basis (at least quarterly). There is no requirement to separately measure and recognize hedge ineffectiveness. For highly effective cash flow and net investment hedges, the entire change in the fair value of the hedging instrument included in the assessment of hedge effectiveness is recorded in OCI (for cash flow hedges) or the CTA section of OCI (for net investment hedges) and reclassified to earnings when the hedged item affects earnings (or when it becomes probable that the forecasted transaction being hedged in a cash flow hedge will not occur in the required time period). The shortcut method for interest rate swaps hedging recognized debt instruments is permitted.

Under IFAS, there is no guidance specifying where the change in fair value of the hedging instrument included in the assessment of hedge effectiveness should be presented in the income statement. Under U.S. GAAP, the entire change in fair value of the hedging instruments included in the assessment of hedge effectiveness is presented in the same income statement line item as the earnings effect of the hedged item.

Under IFAS, a hedging instrument’s time value and foreign currency basis spread can be excluded from the effectiveness assessment. The change in fair value of any excluded components is deferred in AOCI and reclassified based on the nature of the hedged item (i.e., transaction related or time-period related). Under U.S. GAAP, a hedging instrument’s time value and the foreign currency basis spread can be excluded from the effectiveness assessment. The initial value of the excluded component is recognized in earnings using a systematic and rational method over the life of the hedging instrument. Any difference between the change in fair value of the excluded components and the amounts recognized in earnings under the systematic and rational approach is deferred in OCI. Alternatively, an entity may make a policy election to record the changes in the fair value of components excluded from the assessment of hedge effectiveness immediately in earnings.

Under IFAS, derecognition of financial assets is based on a mixed model that considers both transfer of risks and rewards and control. Transfer of control is considered only when the transfer of risks and rewards assessment is not conclusive. If the transferor has neither retained nor transferred substantially all of the risks and rewards, there is then an evaluation of the transfer of control. Control is considered to be surrendered if the transferee has the practical ability to unilaterally sell the transferred asset to a third party without restrictions. There is no legal isolation test. The

derecognition criteria may be applied to a portion of a financial asset if the cash flows are specifically identified or represent a pro rata share of the financial asset or a pro rata share of specifically identified cash flows.

Under, U.S. GAAP, derecognition of financial assets (i.e., sales treatment) occurs when effective control over the financial asset has been surrendered. That is, when all of the following conditions are met:

- The transferred financial assets are legally isolated from the transferor.
- Each transferee (or, if the transferee is a securitization entity or an entity whose sole purpose is to facilitate an asset-backed financing, each holder of its beneficial interests), has the right to pledge or exchange the transferred financial assets (or beneficial interests).
- The transferor does not maintain effective control over the transferred financial assets or beneficial interests (e.g., through a call option or repurchase agreement).

The derecognition criteria may be applied to a portion of a financial asset only if it meets the definition of a participating interest.

### **Long-Lived Assets**

Under IFAS, revaluation of long-lived assets is a permitted accounting policy election for an entire class of assets, requiring revaluation to fair value on a regular basis. Under U.S. GAAP, revaluation of long-lived assets is not permitted.

Under IFAS, component depreciation of long-lived assets is required if components of an asset have differing patterns of benefit. Under U.S. GAAP, component depreciation of long-lived assets is permitted, but it is not common.

Under IFAS, eligible borrowing costs that are capitalized as part of a qualifying long-lived asset include exchange rate differences from foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs. For borrowings associated with a specific qualifying asset, actual borrowing costs are capitalized offset by investment income earned on those borrowings. Under U.S. GAAP, eligible borrowing costs do not include exchange rate differences. Interest earned on the investment of borrowed funds generally cannot offset interest costs incurred during the period. For borrowings associated with a specific qualifying asset, borrowing costs equal to the weighted-average accumulated expenditures times the borrowing rate are capitalized.

Under IFAS, costs that represent a replacement of a previously identified component of an asset are capitalized if future economic benefits are probable and the costs can be reliably measured; otherwise, these costs are expensed as incurred. Under U.S. GAAP, multiple accounting models have evolved in practice for entities in the airline industry, including expense costs as incurred, capitalize costs and amortize through the date of the next overhaul, or follow the built-in overhaul approach (i.e., an approach with certain similarities to composite depreciation).

Under IFAS, investment property is separately defined as property held to earn rent or for capital appreciation (or both) and may include property held by lessees under a finance or operating lease. Investment property may be accounted for on a historical cost basis or on a fair value basis as an accounting policy election. Capitalized operating leases classified as investment property must be accounted for using the fair value model. Under U.S. GAAP, investment property is not separately defined and, therefore, is accounted for as held and used or held for sale.

### **Intangible Assets**

Under IFAS, development costs are capitalized when technical and economic feasibility of a project can be demonstrated in accordance with specific criteria, including demonstrating technical feasibility, intent to complete the asset, and ability to sell the asset in the future. Although application of these principles may be largely consistent with

those under U.S. GAAP, there is no separate guidance addressing computer software development costs. Under U.S. GAAP, development costs are expensed as incurred unless addressed by guidance in another accounting standard. Development costs related to computer software developed for external use are capitalized once technological feasibility is established in accordance with specific criteria. In the case of software developed for internal use, only those costs incurred during the application development stage may be capitalized.

Under IFAS, advertising and promotional costs are expensed as incurred. A prepayment may be recognized as an asset only when payment for the goods or services is made in advance of the entity having access to the goods or receiving the services. Under U.S. GAAP, advertising and promotional costs are either expensed as incurred or expensed when the advertising takes place for the first time (policy choice).

Under IFAS, revaluation to fair value of intangible assets other than goodwill is a permitted accounting policy election for a class of intangible assets. Because revaluation requires reference to an active market for the specific type of intangible, this is relatively uncommon in practice. Under U.S. GAAP, revaluation of intangible assets is not permitted.

### **Impairment of Long-Lived Assets and Intangible Assets**

Under IFAS, the one-step approach requires that an impairment loss calculation of long-lived assets or intangible assets be performed if impairment indicators exist. Under U.S. GAAP, the two-step approach requires that a recoverability test be performed first (the carrying amount of the asset is compared with the sum of future undiscounted cash flows using entity-specific assumptions generated through use and eventual disposition). If it is determined that the asset is not recoverable, an impairment loss calculation is required.

Under IFAS, an impairment loss is the amount by which the carrying amount of the asset exceeds its recoverable amount, which is the higher of: (i) fair value less costs to sell, and (ii) value in use (the present value of future cash flows in use, including disposal value). Under U.S. GAAP, an impairment loss is the amount by which the carrying amount of the asset exceeds its fair value using market participant assumptions.

Under IFAS, in assessing the impairment of indefinite-lived intangibles, qualitative assessment is not permitted. The one-step approach requires that an impairment test be done at the CGU level by comparing the CGU's carrying amount (including goodwill) with its recoverable amount. If the indefinite-lived intangible asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, then the indefinite-lived intangible asset should be tested for impairment as part of the CGU to which it belongs unless certain conditions are met. Under U.S. GAAP, in determining the impairment of indefinite-lived intangibles, an entity has the option to qualitatively assess whether it is more-likely-than-not that an indefinite-lived intangible asset is impaired. If a quantitative test is performed, the quantitative impairment test for an indefinite-lived intangible asset requires a comparison of the fair value of the asset with its carrying amount. If the carrying amount of an intangible asset exceeds its fair value, the entity should recognize an impairment loss in an amount equal to that excess. Indefinite-lived intangible assets separately recognized should be assessed for impairment individually unless they operate in concert with other indefinite-lived intangible assets as a single asset (i.e. the indefinite-lived intangible assets are essentially inseparable). Indefinite-lived intangible assets may not be combined with other assets (e.g. finite-lived intangible assets or goodwill) for purposes of an impairment test.

Under IFAS, reversal of impairment loss previously recognized is prohibited for goodwill. Other assets must be reviewed at the end of each reporting period for reversal indicators. If appropriate, loss should be reversed up to the newly estimated recoverable amount, not to exceed the initial carrying amount adjusted for depreciation. Under U.S. GAAP, reversal of impairment loss previously recognized is prohibited for all assets to be held and used.

## **Provisions and Contingencies**

Under IFAS, a loss must be “probable” (in which “probable” is interpreted as “more-likely-than-not”) to be recognized. “More-likely-than-not” refers to a probability of greater than 50%. Under U.S. GAAP, a loss must be “probable” (in which “probable” is interpreted as “likely”) to be recognized. While U.S. GAAP does not ascribe a percentage to “probable”, it is intended to denote a high likelihood (e.g. 70% or more).

Under IFAS, provisions should be recorded at the estimated amount to settle or transfer the obligation taking into consideration the time value of money. The discount rate to be used should be “a pre-tax rate (or rates) that reflects (or reflect) current market assessments of the time value of money and the risks specific to the liability.” Under U.S. GAAP, provisions may be discounted only when the amount of the liability and the timing of the payments are fixed or reliably determinable, or when the obligation is a fair value obligation (e.g. an asset retirement obligation). The discount rate to be used is dependent upon the nature of the provision, and may vary from that used under IFAS. However, when a provision is measured at fair value, the time value of money and the risks specific to the liability should be considered.

Under IFAS, the best estimate of obligation should be accrued. For a large population of items being measured (such a warranty costs), the best estimate is typically expected value, although the midpoint in the range may also be used when any point in a continuous range is as likely as another. The best estimate for a single obligation may be the most likely outcome, although other possible outcomes should still be considered. Under U.S. GAAP, the most likely outcome within the range should be accrued. When no one outcome is more likely than the others, the minimum amount in the range of outcomes should be accrued.

Under IFAS, once management has “demonstrably committed” (i.e. a legal or constructive obligation has been incurred) to a detailed exit plan, the general provisions under Indonesian Statement of Financial Accounting Standards 57, “Provisions, Contingent Liabilities, and Contingent Assets” apply. Costs typically are recognized earlier than under U.S. GAAP because IFAS focuses on the exit plan as a whole rather than the individual cost components of the exit plan. Under U.S. GAAP, once management has committed to a detailed exit plan, each type of cost is examined to determine when recognized. Involuntary employee termination costs under a one-time benefit arrangement are recognized over future service period, or immediately if there is no future service required. Other exit costs are expensed when incurred.

## **Employee Benefits Other Than Share-Based Payments**

Under IFAS, the projected unit credit method is required in all cases in computing employee benefits liability for defined benefit plans. Under U.S. GAAP, different methods are required in computing employee benefits liability for defined benefit plans, depending on the characteristics of the plan’s benefit formula.

Under IFAS, the concept of an expected return on plan assets does not exist in calculating the expected return on plan assets. Instead, a “net interest” expense/(income) on the net defined benefit liability/(asset) is recognized as a component of defined benefit cost based on the discount rate used to determine the obligation. Under U.S. GAAP, the concept of an expected return on plan assets exists in calculating the expected return on plan assets, which is calculated using the expected long-term rate of return on invested assets and the market related value of the assets (based on either the fair value of plan assets at the measurement date or a “calculated value” that smooths changes in fair value over a period not to exceed five years, at the employer’s election).

Under IFAS, actuarial gains and losses must be recognized immediately in other comprehensive income. Gains and losses are not subsequently recognized in net income. Under U.S. GAAP, actuarial gains and losses may be recognized in net income as they occur or deferred in other comprehensive income and subsequently amortized to net income through a corridor approach.

Under IFAS, prior service costs or credits from plan amendments are recognized immediately in net income. Under U.S. GAAP, prior service costs or credits from plan amendments are initially deferred in other comprehensive income and subsequently recognized in net income over the average remaining service period of active employees or, when all or almost all participants are inactive, over the average remaining life expectancy of those participants.

Under IFAS, settlement gain or loss is recognized in net income when it occurs. Fewer events qualify as settlements under IFAS. Change in the defined benefit obligation from a curtailment is recognized in net income at the earlier of when it occurs or when related restructuring costs or termination benefits are recognized. Under U.S. GAAP, settlement gain or loss is recognized in net income when the obligation is settled. Curtailment loss is recognized in net income when the curtailment is probable of occurring and the loss is estimable, while curtailment gain is recognized in net income when the curtailment occurs.

Under IFAS, a multi-employer post-retirement plan is accounted for as either a defined contribution plan or defined benefit plan based on the terms (contractual and constructive) of the plan. If it is accounted for as a defined benefit plan, an entity must account for the proportionate share of the plan like any other defined benefit plan unless sufficient information is not available. Under U.S. GAAP, a multi-employer post-retirement plan is accounted for like a defined contribution plan.

### **Segment Reporting**

Under IFAS, all entities determine segments based on the management approach, regardless of form of organization. Under U.S. GAAP, entities with a “matrix” form of organization must determine segments based on products and services.

### **Leases**

Prior to 1 January 2020, under SFAS 30 — Leases, a lease is classified as a finance lease if it transfers substantially all risks and rewards incidental to ownership otherwise it will be classified as operating lease (off balance sheet) by a lessee. Effective on 1 January 2020, the new lease standard, SFAS 73 — Leases requires the lessee to recognize almost all lease contracts on the balance sheet; the only optional exemptions are for certain short-term leases and leases of low-value assets. For lessees that have entered into contracts classified as operating leases under existing accounting standard, this could have a huge impact on the financial statements.

Following is a comparison between IFAS and US GAAP, prior to 1 January 2020.

Under IFAS, the land and building elements of the lease are considered separately when evaluating all indicators unless the amount that would initially be recognized for the land element is immaterial, in which case they would be treated as a single unit for purposes of lease classification. There is no 25% test to determine whether to consider the land and building separately when evaluating certain indicators. Under U.S. GAAP, a lease of land and buildings that transfers ownership to the lessee or contains a bargain purchase option would be classified as a capital lease by the lessee, regardless of the relative value of the land. If the fair value of the land at inception represents less than 25% of the total fair value of the lease, the lessee accounts for the land and building elements as a single unit for purposes of evaluating the 75% and 90% tests noted above; otherwise, the lessee must consider the land and building elements separately for purposes of evaluating other lease classification criteria (i.e. only the building is subject to the 75% and 90% tests in this case).

Under IFAS, when the leaseback is an operating leaseback (non-real estate) in a sale-and-leaseback type of lease, gain or loss is recognized immediately, subject to adjustment if the sales price differs from fair value. Under U.S. GAAP, when the leaseback is an operating leaseback (non-real estate) in a sale-and-leaseback type of lease, if the seller-lessee retains only a minor portion of the remaining use of the leased asset through the sale-leaseback, the sale and leaseback are accounted for as separate transactions based on their respective terms (unless rentals are unreasonable in relation to market conditions). If a seller-lessee retains more than a minor part of the remaining use

of the leased asset but less than substantially all of it, and the profit on the sale exceeds the present value of the minimum lease payments due under the operating leaseback, that excess is recognized as profit at the date of sale. All other profit is deferred and generally amortized over the lease term.

Under IFAS, when the leaseback is a capital leaseback in a sale-and-leaseback type of lease, gain or loss is deferred and amortized over the lease term. Under U.S. GAAP, when the leaseback is a capital leaseback in a sale-and-leaseback type of lease, the seller-lessee is presumed to have retained substantially all the remaining use of the leased asset when the leaseback is classified as a capital lease. In such cases, the profit on sale is deferred.

Under IFAS, there is no specific accounting standard that governs the sale-and-leaseback of real estate. Under U.S. GAAP, if real estate is involved, while the above-mentioned model generally applies, the specialized rules also must be applied. Those rules are very restrictive with respect to the seller's continuing involvement, and they may not allow for recognition of the sale.

Following is a comparison between IFAS and US GAAP, effective from 1 January 2020.

Under IFAS, lessees may elect, on a lease-by-lease basis, not to recognize leases when the value of the underlying asset is low (e.g., US\$5,000 or less when new). Under US GAAP, there is no recognition exemption for leases based on the value of the underlying asset.

Under IFAS, changes in variable lease payments index or rate result in a remeasurement lease liability whenever there is a cash flows (i.e., when the adjustment lease payments takes effect). Under US GAAP, changes in variable lease payments based on an index or rate result in a remeasurement of the lease liability when the lease liability is remeasured for another reason (e.g., a change in the lease term).

Under IFAS, lessees determine the discount rate at lease commencement, but lessors determine the rate implicit in the lease at the lease inception date. Under US GAAP, lessees and lessors determine the discount rate at the lease commencement date.

Under IFAS, when determining lessee's incremental borrowing rate, SFAS 73 does not address whether a lessee may consider the effect of lease term options (e.g., purchase and renewal options) that are not included in the lease term. Under US GAAP, A lessee may consider the effect of lease term options (e.g., purchase and renewal options) that are not included in the lease term.

Under IFAS, Initial Direct Costs (IDCs) are incremental costs of obtaining a lease that would not have been incurred if the lease had not been obtained. IDCs incurred by a manufacturer or dealer lessor in connection with a finance lease are expensed. Under US GAAP, IDCs are incremental costs that would not have been incurred if the lease had not been obtained. Lessors expense IDCs for sales-type leases if the fair value of the underlying asset is different from the carrying amount of the underlying asset at lease commencement.

Under IFAS, all recognized leases are accounted for similarly to finance leases under ASC 842. Under US GAAP, recognized leases are classified as either finance or operating. Lessees classify leases at the lease commencement date.

Under IFAS, a lease does not qualify as a short-term lease if it includes a purchase option, regardless of whether the lessee is reasonably certain to exercise the option. A change in the terms of a short-term lease creates a new lease. If that new lease has a lease term greater than 12 months, it cannot qualify as a short-term lease. Under US GAAP, a lease does not qualify as a short-term lease if it includes a purchase option that is reasonably certain to be exercised. A lease no longer qualifies as a short-term lease when there is a change in a lessee's assessment of either of the following: (i) the lease term so that, after the change, the remaining lease term extends more than 12 months from the end of the previously determined lease term, or (ii) whether the lessee is reasonably certain to exercise an option to purchase the underlying asset.

Under IFAS, lessees may allocate variable consideration not dependent on an index or rate entirely to a non-lease component of a contract. Under US GAAP, lessees allocate variable consideration not dependent on an index or rate (e.g., performance- or usage-based payments) to the lease and non-lease components of a contract.

Under IFAS, a lessee applies the depreciation requirements in SFAS 16 in depreciating right-of-use assets, which requires that each item of PP&E with a cost that is significant in relation to the total cost of the item be separately depreciated (i.e., a component approach). Under US GAAP, component depreciation is permitted, but not common. Under IFAS, to determine whether the transfer of an asset is accounted for as a sale and purchase, a seller-lessee and a buyer-lessor apply the requirements for determining when a performance obligation is satisfied in SFAS 71. The seller-lessee recognizes only the amount of any gain or loss, adjusted for off-market terms, that relates to the rights transferred to the buyer-lessor. Under US GAAP, to determine whether an asset transfer is a sale and purchase, a seller-lessee and a buyer-lessor consider the following: (i) whether the transfer meets sale criteria under ASC 606 (however, certain fair value repurchase options would not result in a failed sale) and (ii) whether the leaseback would be classified as a sales-type lease by the buyer-lessor or a finance lease by the seller-lessee (i.e., a sale and purchase does not occur when the leaseback is classified as a sales-type lease by the buyer-lessor or as a finance lease by the seller-lessee). The seller-lessee recognizes any gain or loss, adjusted for off-market terms, immediately.

Under IFAS, transition guidance primarily addresses lessees' leases previously classified as operating leases under SFAS 73, Leases. Under US GAAP, specific transition guidance is provided for all leases depending on the lease classification before and after application of ASC 842.

### **Earnings per Share**

Under IFAS, contracts that may be settled in shares or cash at the issuer's option are always assumed to be settled in shares. Under U.S. GAAP, contracts that may be settled in shares or cash at the issuer's option are presumed to be settled in shares unless evidence is provided to the contrary (i.e. the issuer's past practice or stated policy is to settle in cash).

Under IFAS, in computing the year-to-date and annual diluted earnings per share ("EPS") for options and warrants (using the treasury stock method) and for contingently issuable shares, regardless of whether the period is profitable, the number of incremental shares is computed as if the entire year-to-date period were "the period" (i.e. not to average the current quarter with each of the prior quarters). Under U.S. GAAP, in computing the year-to-date and annual diluted EPS for options and warrants (using the treasury stock method) and for contingently issuable shares, for year-to-date and annual computations when each period is profitable, the number of incremental shares added to the denominator is the weighted average of the incremental shares that were added to the denominator in each of the quarterly computations.

Under IFAS, for options, warrants, and their equivalents, IFAS does not explicitly require assumed proceeds under the treasury stock method to include the income tax effects on additional paid-in capital. Under U.S. GAAP, assumed proceeds under the treasury stock method exclude the income tax effects of share-based payment awards because they are no longer recognized in additional paid-in capital.

Under IFAS, potentially issuable shares in a contingently convertible debt situation are considered "contingently issuable" and are included in diluted EPS using the "if-converted" method only if the contingencies are satisfied at the end of the reporting period. Under U.S. GAAP, potentially issuable shares in a contingently convertible debt situation are included in diluted EPS using the "if-converted" method if one or more contingencies relate to a market price trigger (e.g. the entity's share price), even if the market price trigger is not satisfied at the end of the reporting period.

## Subsequent Events

Under IFAS, subsequent events are evaluated through the date that the financial statements are “authorized for issue”. Depending on an entity’s corporate governance structure and statutory requirements, authorization may come from management or a board of directors. Under U.S. GAAP, subsequent events are evaluated through the date the financial statements are issued (for United States Securities and Exchange Commission (“SEC”) registrants and conduit bond obligors) or available to be issued (for all entities other than SEC registrants and conduit bond obligors). Financial statements are considered issued when they are widely distributed to shareholders or other users in a form that complies with U.S. GAAP. Financial statements are considered available to be issued when they are in a form that complies with U.S. GAAP and all necessary approvals have been obtained.

IFAS does not specifically address the reissuance of financial statements and recognizes only one date through which subsequent events are evaluated, that is, the date that the financial statements are authorized for issuance, even if they are being reissued. As a result, only one date will be disclosed with respect to the evaluation of subsequent events, and an entity could have adjusting subsequent events in reissued financial statements. If financial statements are reissued because of adjusting subsequent events or an error correction, the date the reissued statements are authorized for reissuance is disclosed. IFAS does not address the presentation of re-issued financial statements in an offering document when the originally issued financial statements have not been withdrawn, but the reissued financial statements are provided either as supplementary information or as a re-presentation of the originally issued financial statements in an offering document in accordance with regulatory requirements. Under U.S. GAAP, if the financial statements are reissued, events or transactions may have occurred that require disclosure in the reissued financial statements to keep them from being misleading. However, an entity should not recognize events occurring between the time the financial statements were issued or available to be issued and the time the financial statements were reissued unless the adjustment is required by U.S. GAAP or regulatory requirements (e.g. stock splits, discontinued operations, or the effect of adopting a new accounting standard retrospectively would give rise to an adjustment). Entities must disclose both the date that the financial statements were originally issued and the date that they were reissued if the financial statements were revised due to an error correction (i.e. a “type I” subsequent event or retrospective application of U.S. GAAP).

Under IFAS, short-term loans refinanced after the date of the statement of financial position may not be reclassified to long-term liabilities unless the entity expected and had the discretion to refinance the obligation for at least 12 months at the date of the statement of financial position. Under U.S. GAAP, short-term loans are classified as long-term if the entity intends to refinance the loans on a long-term basis and, prior to issuing the financial statements, the entity can demonstrate an ability to refinance the loans by meeting specific criteria.

Laporan No. 00404/2.1032/AU.1/04/0704-2/1/III/2019 (lanjutan)

#### Tanggung jawab auditor (lanjutan)

Suatu audit melibatkan pelaksanaan prosedur untuk memperoleh bukti audit tentang angka-angka dan pengungkapan dalam laporan keuangan. Prosedur yang dipilih bergantung pada pertimbangan auditor, termasuk penilaian atas risiko kesalahan penyajian material dalam laporan keuangan, baik yang disebabkan oleh kecurangan maupun kesalahan. Dalam melakukan penilaian risiko tersebut, auditor mempertimbangkan pengendalian internal yang relevan dengan penyusunan dan penyajian wajar laporan keuangan entitas untuk merancang prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektifitasan pengendalian internal entitas. Suatu audit juga mencakup pengevaluasian atas ketepatan kebijakan akuntansi yang digunakan dan kewajaran estimasi akuntansi yang dibuat oleh manajemen, serta pengevaluasian atas penyajian laporan keuangan secara keseluruhan.

Kami yakin bahwa bukti audit yang telah kami peroleh adalah cukup dan tepat untuk menyediakan suatu basis bagi opini audit kami.

#### Opini

Menurut opini kami, laporan keuangan konsolidasian terlampir menyajikan secara wajar, dalam semua hal yang material, posisi keuangan konsolidasian PT Central Proteina Prima Tbk. dan entitas anaknya tanggal 31 Desember 2018, serta kinerja keuangan dan arus kas konsolidasiannya untuk tahun yang berakhir pada tanggal tersebut, sesuai dengan Standar Akuntansi Keuangan di Indonesia.

#### Independent Auditors' Report (continued)

Report No. 00404/2.1032/AU.1/04/0704-2/1/III/2019 (continued)

#### Auditors' responsibility (continued)

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Opinion

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of PT Central Proteina Prima Tbk. and its subsidiaries as of December 31, 2018, and their consolidated financial performance and cash flows for the year then ended, in accordance with Indonesian Financial Accounting Standards.

Laporan No. 00404/2.1032/AU.1/04/0704-2/1/III/2019 (lanjutan)

**Penekanan suatu hal**

Kami membawa perhatian Saudara pada Catatan 41 atas laporan keuangan konsolidasian terlampir, yang mengindikasikan bahwa Kelompok Usaha melaporkan saldo akumulasi kerugian konsolidasian sebesar Rp6.376.730 juta pada tanggal 31 Desember 2018, dan total liabilitas jangka pendek konsolidasiannya melebihi total aset lancar konsolidasiannya sebesar Rp1.233.073 juta pada tanggal tersebut. Kondisi tersebut, bersama dengan hal-hal lain sebagaimana dijelaskan dalam Catatan 41, mengindikasikan adanya suatu ketidakpastian material yang dapat menyebabkan keraguan signifikan atas kemampuan Kelompok Usaha untuk mempertahankan kelangsungan usahanya. Opini kami tidak dimodifikasi sehubungan dengan hal tersebut.

**Independent Auditors' Report (continued)**

Report No. 00404/2.1032/AU.1/04/0704-2/1/III/2019 (continued)

**Emphasis of matter**

We draw your attention to Note 41 to the accompanying consolidated financial statements, which indicates that the Group reported a consolidated accumulated deficit of Rp6,376,730 million as of December 31, 2018, and that its consolidated total current liabilities exceeded its consolidated total current assets by Rp1,233,073 million as of that date. These conditions, along with other matters as set forth in Note 41, indicate the existence of a material uncertainty that may cast significant doubt on the Group's ability to continue as a going concern. Our opinion is not modified in respect of such matter.

PSAK ini mengatur bahwa aset biologis atau produk agrikultur (hewan hidup dan produk agrikultur yang tumbuh pada tanaman produktif) diakui saat memenuhi beberapa kriteria yang sama dengan kriteria pengakuan aset. Aset tersebut diukur pada saat pengakuan awal dan pada setiap akhir periode pelaporan keuangan pada nilai wajar dikurangi biaya untuk menjual. Selisih yang timbul dari perubahan nilai wajar aset diakui dalam laba rugi periode terjadinya. Pengecualian diberikan apabila nilai wajar secara jelas tidak dapat diukur secara andal.

Changes of Accounting Policies (continued)

- Amendments to PSAK 69 - Biological Assets

This PSAK provides that a biological asset or agricultural products (living animal and agricultural produce growing on bearer plants) are recognized when fulfilling some of the same criteria as the criteria for asset recognition. These assets are measured at initial recognition, and at the end of each financial reporting period at fair value less costs to sell. Differences arising from changes in fair value of assets recognized in profit or loss as incurred. Exceptions are granted if the fair value clearly can't be measured reliably.

As part of the implementation of PSAK 69, the Group changed the measurement policy for its biological assets. The impact to the Group's financial statements line items from the retrospective first time adoption of the biological assets amendments are disclosed in the following table:

The adoption of the new and revised standard and interpretation did not result in substantial changes to Group's accounting policies and had no material effect on the amounts reported for the current or prior financial years:

- Amendments to PSAK 13 – Investment Property : Transfer of Investment Property

These amendments reflect the principle that asset usage changes include an assessment of whether the property meets, or ceases to meet, the definition of investment property.

**b. Prinsip-prinsip Konsolidasian**

Laporan keuangan konsolidasian meliputi laporan keuangan Perusahaan dan Entitas Anak seperti disebutkan pada Catatan 1d.

Pengendalian diperoleh ketika Kelompok Usaha terekspos, atau memiliki hak atas imbal hasil variabel dari keterlibatannya dengan *investee* dan memiliki kemampuan untuk mempengaruhi imbal hasil tersebut melalui kekuasaannya atas *investee*.

Secara khusus, Kelompok Usaha mengendalikan *investee* jika, dan hanya jika, Kelompok Usaha memiliki seluruh hal berikut ini:

- a. kekuasaan atas *investee* (misalnya adanya hak yang memberikan Kelompok Usaha kemampuan saat ini untuk mengarahkan aktivitas *investee* yang relevan);
- b. eksposur atau hak atas imbal hasil variabel dari keterlibatan Kelompok Usaha dengan *investee*; dan
- c. kemampuan untuk menggunakan kekuasaannya atas *investee* untuk mempengaruhi imbal hasil Kelompok Usaha.

Umumnya, kepemilikan hak suara mayoritas menghasilkan pengendalian. Untuk mendukung hal ini, dan jika Kelompok Usaha memiliki hak suara kurang dari hak suara mayoritas, atau hak sejenis atas suatu *investee*, Kelompok Usaha mempertimbangkan seluruh fakta dan keadaan ketika menilai apakah Kelompok Usaha memiliki kekuasaan atas *investee*, termasuk:

- a. pengaturan kontraktual dengan pemegang hak suara lainnya pada *investee*;
- b. hak-hak yang timbul dari pengaturan kontraktual lain; dan
- c. hak suara yang dimiliki Kelompok Usaha dan hak suara potensial.

Kelompok Usaha menilai kembali apakah mengendalikan *investee* jika fakta dan keadaan mengindikasikan bahwa terdapat perubahan dalam satu atau lebih dari tiga elemen pengendalian. Konsolidasi atas entitas anak dimulai sejak tanggal Kelompok Usaha memperoleh pengendalian atas entitas anak dan berakhir ketika Kelompok Usaha kehilangan pengendalian atas entitas anak.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (continued)**

**b. Principles of Consolidation**

The consolidated financial statements comprise the financial statements of the Company and its Subsidiaries as described in Note 1d.

Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Specifically, the Group controls an investee if, and only if, the Group has all of the following:

- a. power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee);
- b. exposure, or rights, to variable return from its involvement with the investee; and
- c. the ability to use its power over the investee to affect the Group's returns.

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the Group has less than a majority of the voting, or similar, rights of an investee, it considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- a. the contractual arrangement(s) with the other vote holders of the investee;
- b. rights arising from other contractual arrangements; and
- c. the Group's voting rights and potential voting rights.

The Group reassesses whether it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary.

**b. Prinsip-prinsip Konsolidasian (lanjutan)**

Laba rugi dan setiap komponen dari penghasilan komprehensif lain (OCI) diatribusikan kepada pemilik entitas induk dari Kelompok Usaha dan kepentingan nonpengendali (KNP), meskipun hal tersebut mengakibatkan KNP memiliki saldo defisit.

Laporan keuangan konsolidasian disusun dengan menggunakan kebijakan akuntansi yang sama untuk transaksi dan peristiwa lain dalam keadaan yang serupa. Jika anggota Kelompok Usaha menggunakan kebijakan akuntansi yang berbeda untuk transaksi dan peristiwa dalam keadaan yang serupa, maka penyesuaian dilakukan atas laporan keuangannya dalam penyusunan laporan keuangan konsolidasian.

Seluruh saldo dan transaksi antar perusahaan yang material, termasuk laba atau rugi yang belum direalisasi, jika ada, dieliminasi untuk mencerminkan posisi keuangan dan hasil operasi Kelompok Usaha sebagai satu kesatuan usaha.

Entitas-entitas anak dikonsolidasi secara penuh sejak tanggal akuisisi, yaitu tanggal Perusahaan memperoleh pengendalian, sampai dengan tanggal entitas induk kehilangan pengendalian. Pengendalian dianggap ada ketika Perusahaan memiliki secara langsung atau tidak langsung melalui entitas anak, lebih dari setengah kekuasaan suara entitas.

Kerugian entitas anak yang tidak dimiliki secara penuh diatribusikan pada KNP bahkan jika hal ini mengakibatkan KNP mempunyai saldo defisit.

Perubahan dalam bagian kepemilikan Kelompok Usaha pada suatu entitas anak yang tidak mengakibatkan hilangnya pengendalian dicatat sebagai transaksi ekuitas. Nilai tercatat kepentingan Kelompok Usaha dan non-pengendali disesuaikan untuk mencerminkan perubahan bagian kepemilikannya atas entitas anak. Setiap perbedaan antara jumlah kepentingan non-pengendali disesuaikan dan nilai wajar imbalan yang diterima dari penjualan tersebut diakui secara langsung dalam ekuitas dan diatribusikan pada pemilik entitas induk.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (continued)**

**b. Principles of Consolidation (continued)**

*Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interest (NCI), even if this results in the NCI having a deficit balance.*

*The consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the Group uses different accounting policies for like transactions and events in similar circumstances, appropriate adjustments are made to its financial statements in preparing the consolidated financial statements.*

*All significant intercompany account balances and transactions, including any unrealized profit or loss, have been eliminated to reflect the financial position and results of operations of the Group as a single business entity.*

*Subsidiaries are fully consolidated from the date of acquisition, being the date on which the Company obtained control until the date of such control ceases. Control is presumed to exist if the Company owns directly or indirectly through subsidiaries more than half of the voting power of an entity.*

*Losses of a non-wholly owned subsidiaries are attributed to NCI even if that results in a deficit balance.*

*Changes in the Group's ownership interest in a subsidiary that do not result in loss of control are accounted for as equity transactions. The carrying amounts of the Group and non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of consideration paid or received is recognised directly in equity and attributed to the owners of the parent entity.*

**b. Prinsip-prinsip Konsolidasian (lanjutan)**

Jika kehilangan pengendalian atas suatu entitas anak, maka Kelompok Usaha:

- menghentikan pengakuan aset (termasuk setiap *goodwill*) dan liabilitas entitas anak Perusahaan;
- menghentikan pengakuan jumlah tercatat setiap KNP;
- menghentikan pengakuan akumulasi selisih penjabaran yang dicatat di ekuitas, bila ada;
- mengakui nilai wajar pembayaran yang diterima;
- mengakui setiap sisa investasi pada nilai wajarnya;
- mengakui setiap perbedaan yang dihasilkan sebagai keuntungan atau kerugian dalam laba rugi; dan
- mereklasifikasi bagian induk atas komponen yang sebelumnya diakui sebagai pendapatan komprehensif lainnya ke laba rugi, atau mengalihkan secara langsung ke saldo laba, sebagaimana mestinya.

KNP mencerminkan bagian atas laba atau rugi dan aset neto dari entitas anak yang tidak dapat diatribusikan secara langsung maupun tidak langsung oleh Perusahaan, yang masing-masing disajikan dalam laporan laba rugi komprehensif konsolidasian dan dalam ekuitas pada laporan posisi keuangan konsolidasian, terpisah dari bagian yang dapat diatribusikan kepada pemilik entitas induk.

Untuk tujuan konsolidasi, laporan keuangan entitas anak yang mata uang fungsionalnya adalah selain Rupiah dijabarkan ke dalam Rupiah dengan menggunakan:

**c. Kombinasi Bisnis**

Kombinasi bisnis dicatat dengan menggunakan metode akuisisi. Biaya perolehan dari sebuah akuisisi disajikan pada nilai agregat imbalan yang dialihkan, disajikan pada nilai wajar pada tanggal akuisisi, dan jumlah setiap KNP pada pihak yang diakuisisi. Untuk setiap kombinasi bisnis, pihak pengakuisisi mengukur KNP pada entitas yang diakuisisi baik pada nilai wajar ataupun pada proporsi kepemilikan KNP atas aset neto yang teridentifikasi dari entitas yang diakuisisi. Biaya-biaya akuisisi yang timbul dibebankan langsung dan disertakan dalam beban administrasi.

Ketika melakukan akuisisi atas sebuah bisnis, Kelompok Usaha mengklasifikasikan dan menentukan aset keuangan yang diperoleh dan liabilitas keuangan yang diambil alih berdasarkan pada persyaratan kontraktual, kondisi ekonomi dan kondisi terkait lain yang ada pada tanggal akuisisi. Hal ini termasuk pengelompokan derivatif melekat dalam kontrak utama oleh pihak yang diakuisisi.

Jika proses akuntansi awal untuk kombinasi bisnis belum selesai pada akhir periode pelaporan saat kombinasi terjadi, maka Kelompok Usaha melaporkan jumlah sementara untuk pos-pos yang proses akuntansinya belum selesai dalam laporan keuangan konsolidasiannya. Selama periode pengukuran, Kelompok Usaha menyesuaikan secara retrospektif jumlah sementara yang diakui pada tanggal akuisisi untuk mencerminkan informasi baru yang diperoleh tentang fakta dan keadaan yang ada pada tanggal akuisisi dan, jika diketahui, telah berdampak pada pengukuran jumlah yang diakui pada tanggal tersebut.

Periode pengukuran berakhir segera setelah Kelompok Usaha menerima informasi yang dicari tentang fakta dan keadaan yang ada pada tanggal akuisisi atau mempelajari bahwa informasi lebih tidak dapat diperoleh. Namun demikian, periode pengukuran tidak boleh melebihi satu tahun dari tanggal akuisisi.

Dalam suatu kombinasi bisnis yang dilakukan secara bertahap, pihak pengakuisisi mengukur kembali kepentingan ekuitas yang dimiliki sebelumnya pada pihak yang diakuisisi pada nilai wajar tanggal akuisisi dan mengakui keuntungan atau kerugian yang dihasilkan dalam laba rugi.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (continued)**

**c. Business Combination**

*Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition-date fair value, and the amount of any NCI in the acquiree. For each business combination, the acquirer measures the NCI in the acquiree either at fair value or at the proportionate share of the acquiree's identifiable net assets. Transaction costs incurred are directly expensed and included in administrative expenses.*

*When the Group acquires a business, it assesses the financial assets acquired and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.*

*When the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports in its consolidated financial statements provisional amounts for the items for which the accounting is incomplete. During the measurement period, the Group shall retrospectively adjust the provisional amounts recognised at the acquisition date to reflect new information obtained about facts and circumstances that existed as of the acquisition date and, if known, would have affected the measurement of the amounts recognised as of that date.*

*The measurement period ends as soon as the Group receives the information it was seeking about facts and circumstances that existed as of the acquisition date or learns that more information is not obtainable. However, the measurement period shall not exceed one year from the acquisition date.*

*If the business combination is carried out in stages, the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through profit or loss.*

Imbalan kontinjensi yang dialihkan oleh pihak pengakuisisi diakui pada nilai wajar tanggal akuisisi. Perubahan nilai wajar atas imbalan kontinjensi setelah tanggal akuisisi yang diklasifikasikan sebagai aset atau liabilitas, akan diakui dalam laba rugi atau pendapatan komprehensif lain sesuai dengan PSAK 55 (Revisi 2014), "Instrumen Keuangan: Pengakuan dan Pengukuran". Jika diklasifikasikan sebagai ekuitas, imbalan kontinjensi tidak disajikan kembali dan penyelesaian selanjutnya diperhitungkan dalam ekuitas.

Pada tanggal akuisisi, *goodwill* awalnya disajikan pada harga perolehan yang merupakan selisih lebih nilai agregat dari imbalan yang dialihkan dan jumlah setiap KNP atas jumlah neto dari aset teridentifikasi yang diperoleh dan liabilitas yang diambil alih. Jika imbalan tersebut kurang dari nilai wajar aset neto entitas anak yang diakuisisi, selisih tersebut diakui dalam laba rugi.

Setelah pengakuan awal, *goodwill* diukur pada jumlah tercatat dikurangi akumulasi kerugian penurunan nilai. Untuk tujuan pengujian penurunan nilai, *goodwill* yang diperoleh dari suatu kombinasi bisnis, sejak tanggal akuisisi dialokasikan kepada setiap Unit Penghasil Kas (UPK) dari Kelompok Usaha yang diharapkan akan bermanfaat dari sinergi kombinasi tersebut, terlepas dari apakah aset atau liabilitas lain dari pihak yang diakuisisi ditetapkan atas UPK tersebut.

Jika *goodwill* telah dialokasikan pada suatu UPK dan operasi tertentu atas UPK tersebut dihentikan, maka *goodwill* yang diasosiasikan dengan operasi yang dihentikan tersebut termasuk dalam jumlah tercatat operasi tersebut ketika menentukan keuntungan atau kerugian dari pelepasan. *Goodwill* yang dilepaskan tersebut diukur berdasarkan nilai relatif operasi yang dihentikan dan porsi UPK yang ditahan.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (continued)**

**c. Business Combination (continued)**

*Any contingent consideration to be transferred by the acquirer will be recognized at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration which is deemed to be an asset or liability, will be recognized in accordance with PSAK 55 (Revised 2014), "Financial Instruments: Recognition and Measurement". If classified as equity, the contingent consideration are not restated and finally settled within equity.*

*At acquisition date, goodwill is initially measured at cost being the excess of the aggregate of the consideration transferred and the amount recognized for NCI over the net identifiable assets acquired and liabilities assumed. If this consideration is lower than the fair value of the net assets of the subsidiary acquired, the difference is recognized in profit and loss.*

*After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's Cash-Generating Units (CGU) that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those CGUs.*

*If goodwill forms part of a CGU and part of the operation within that CGU is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured on the basis of the relative values of the operation disposed of and the portion of the CGU retained.*

Perusahaan dan entitas anaknya mempunyai transaksi dengan pihak berelasi sesuai dengan definisi yang diuraikan pada PSAK 7.

Transaksi dengan pihak-pihak berelasi dilakukan berdasarkan persyaratan yang disetujui oleh kedua belah pihak, dimana persyaratan tersebut mungkin tidak sama dengan transaksi lain yang dilakukan dengan pihak-pihak yang tidak berelasi.

Seluruh transaksi dan saldo yang signifikan dengan pihak-pihak berelasi diungkapkan dalam catatan atas laporan keuangan konsolidasian yang relevan.

Seluruh sifat dan transaksi signifikan dengan pihak-pihak berelasi diungkapkan dalam Catatan 35.

**g. Transaksi Restrukturisasi Entitas  
Sepengendali**

Pengalihan bisnis antara entitas sepengendali tidak mengakibatkan perubahan substansi ekonomi kepemilikan atas bisnis yang dialihkan dan tidak dapat menimbulkan laba atau rugi bagi kelompok usaha secara keseluruhan ataupun bagi entitas individual dalam kelompok usaha tersebut. Karena pengalihan bisnis antara entitas sepengendali tidak mengakibatkan perubahan substansi ekonomi, bisnis yang dipertukarkan dicatat pada nilai buku sebagai kombinasi bisnis dengan menggunakan metode penyatuan kepemilikan.

Dalam menerapkan metode penyatuan kepemilikan, komponen laporan keuangan dimana terjadi kombinasi bisnis dan untuk periode lain yang disajikan untuk tujuan perbandingan, disajikan sedemikian rupa seolah-olah kombinasi bisnis telah terjadi sejak awal periode terjadi sepengendalian. Selisih antara nilai tercatat transaksi kombinasi bisnis dan jumlah imbalan yang dialihkan diakui dalam akun "Tambahkan Modal Disetor". Saldo selisih nilai transaksi restrukturisasi entitas sepengendali berdasarkan PSAK 38 (Revisi 2004) "Akuntansi Restrukturisasi Entitas Sepengendali" pada tanggal awal penerapan PSAK 38 (Revisi 2012) direklasifikasi ke pos tambahan modal disetor di bagian ekuitas.

The difference between the carrying amounts of the business combination transaction and the consideration transferred is recognized under the account "Additional Paid-in Capital". The difference in value of restructuring transactions of entities under common control based on PSAK 38 (Revised 2004) "Accounting for Restructuring of Entities Under Common Control" on the beginning of the adoption date of PSAK 38 (Revised 2012) was reclassified to "Additional Paid-in Capital" in equity.*

**I. Aset Tetap**

Seluruh aset tetap awalnya diakui sebesar biaya perolehan, yang terdiri atas harga perolehan dan biaya-biaya tambahan yang dapat diatribusikan langsung untuk membawa aset ke lokasi dan kondisi yang diinginkan supaya aset tersebut siap digunakan sesuai dengan maksud manajemen.

Setelah pengakuan awal, aset tetap, kecuali tanah, dinyatakan pada biaya perolehan dikurangi akumulasi penyusutan dan akumulasi rugi penurunan nilai.

Penyusutan aset tetap dimulai pada saat aset tersebut siap untuk digunakan sesuai maksud penggunaannya dan dihitung dengan menggunakan metode garis lurus berdasarkan estimasi umur manfaat ekonomis sebagai berikut:

	<b>Tahun/Year</b>
Prasarana tanah dan bangunan	5 - 20
Bangunan	10 - 20
Mesin dan peralatan	5 - 20
Peralatan transportasi	2 - 20
Peralatan dan perabotan kantor	5
Instalasi listrik dan air	5 - 10
Peralatan laboratorium	5

Penilaian aset tetap dilakukan atas penurunan dan kemungkinan penurunan nilai wajar aset jika terjadi peristiwa atau perubahan keadaan yang mengindikasikan bahwa nilai tercatat mungkin tidak dapat seluruhnya terealisasi.

Jumlah tercatat komponen dari suatu aset tetap dihentikan pengakuannya pada saat dilepaskan atau saat sudah tidak ada lagi manfaat ekonomis masa depan yang diekspektasikan dari penggunaan maupun pelepasannya. Laba atau rugi yang timbul dari penghentian pengakuan aset tersebut dimasukkan ke dalam laba rugi untuk tahun penghentian pengakuan tersebut dilakukan.

Nilai residu, umur manfaat dan metode penyusutan aset dievaluasi setiap akhir tahun dan disesuaikan secara prospektif jika diperlukan.

Kelompok Usaha memilih untuk menggunakan model revaluasi atas tanah karena Kelompok Usaha meyakini bahwa model revaluasi lebih mencerminkan nilai dari tanah tersebut.

*Fixed assets are initially recognized at cost, which comprises acquisition costs and any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.*

*Subsequent to initial recognition, fixed assets, except for land, are carried at cost less any accumulated depreciation and impairment losses.*

Transportation equipment
Furniture, fixtures and office equipment
Electrical and water installation
Laboratory equipment

*The carrying amounts of fixed asset are reviewed for impairment when events or changes in circumstances indicate that the carrying values may not be fully recoverable.*

*The carrying amount of an item of fixed assets is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising from the derecognition of the asset is directly included in the profit or loss for the year in which the item is derecognized.*

*The asset residual values, useful lives and depreciation methods are reviewed at each year end and adjusted prospectively if necessary.*

**1. Aset Tetap (lanjutan)**

Setelah pengakuan awal, Kelompok Usaha menggunakan model revaluasi dimana tanah diukur pada nilai wajar pada tanggal revaluasi dikurangi akumulasi rugi penurunan nilai berikutnya. Sesuai ketentuan PSAK 16 (Revisi 2015), perubahan kebijakan akuntansi tersebut berlaku secara prospektif.

Surplus revaluasi terakumulasi dalam ekuitas pada bagian penghasilan komprehensif lain. Namun, kenaikan tersebut diakui dalam laba rugi hingga sebesar jumlah penurunan nilai aset yang sama akibat revaluasi yang pernah diakui sebelumnya dalam laba rugi. Defisit revaluasi diakui dalam laba rugi. Namun penurunan nilai tersebut diakui dalam surplus revaluasi aset tetap sepanjang tidak melebihi saldo surplus revaluasi untuk aset tersebut.

Biaya pengurusan legal hak atas tanah dalam bentuk Hak Guna Bangunan (HGB) yang dikeluarkan ketika tanah diperoleh pertama kali diakui sebagai bagian dari biaya perolehan tanah pada akun "Aset Tetap" dan tidak diamortisasi. Biaya pengurusan perpanjangan atau pembaruan legal hak atas tanah diakui sebagai aset tak berwujud dan diamortisasi sepanjang umur hukum hak atau umur ekonomis tanah, mana yang lebih pendek.

Aset tetap dalam penyelesaian dicatat sebesar biaya perolehan, yang mencakup kapitalisasi beban pinjaman dan biaya-biaya lainnya yang terjadi sehubungan dengan pendanaan aset tetap dalam penyelesaian tersebut. Akumulasi biaya perolehan akan direklasifikasi ke akun "Aset Tetap" yang bersangkutan pada saat aset tetap tersebut telah selesai dikerjakan dan siap untuk digunakan. Aset tetap dalam penyelesaian tidak disusutkan karena belum tersedia untuk digunakan.

Beban pemeliharaan dan perbaikan dibebankan pada operasi pada saat terjadinya. Beban pemugaran dan penambahan dalam jumlah besar dikapitalisasi kepada jumlah tercatat aset tetap terkait bila besar kemungkinan bagi Kelompok Usaha manfaat ekonomi masa depan menjadi lebih besar dari standar kinerja awal yang ditetapkan sebelumnya dan disusutkan sepanjang sisa masa manfaat aset tetap terkait.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (continued)**

**1. Fixed Assets (continued)**

*After initial recognition, the Group uses the revaluation model, whereby land is measured at fair value at the date of the revaluation less any subsequent accumulated impairment losses. In accordance with the requirement of PSAK 16 (Revised 2015), such change of accounting policy is applied prospectively.*

*A revaluation surplus is accumulated in equity under other comprehensive income. However, the increase is recognized in profit and loss to the extent that it reverses a revaluation deficit of the same asset previously recognized in profit or loss. However, the decrease shall be recognized in the revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.*

*Legal cost of land rights in the form of Building Usage Rights (HGB) incurred when the land was acquired initially are recognized as part of the cost of the land under "Fixed Assets" account and not amortized. The legal cost incurred to extend or renew the land rights are recorded as intangible assets and amortized over the shorter of the rights' of legal life or land's economic life.*

*Constructions in progress are stated at cost, including capitalized borrowing costs and other charges incurred in connection with the financing of said assets. The accumulated costs will be reclassified to the appropriate "Fixed Assets" account when the construction is completed and ready for use. Assets under construction are not depreciated as they are not yet available for use.*

*Repair and maintenance expense is charged to operation when incurred. The cost of major renovation and restoration is capitalized to the carrying amount of the related fixed assets when it is probable that future economic benefits in excess of the originally assessed standard of performance of the existing asset will flow to the Group, and is depreciated over the remaining useful life of the related asset.*

**2. IKHTISAR KEBIJAKAN AKUNTANSI  
PENTING (lanjutan)**

**m. Sewa**

Kelompok Usaha mengklasifikasikan sewa berdasarkan sejauh mana risiko dan manfaat yang terkait dengan kepemilikan aset sewaan berada pada *lessor* atau *lessee*, dan pada substansi transaksi daripada bentuk kontraknya.

Suatu sewa diklasifikasikan sebagai sewa pembiayaan jika sewa tersebut mengalihkan secara substansi seluruh risiko dan manfaat yang terkait dengan kepemilikan aset sewa pembiayaan. Sewa tersebut dikapitalisasi sebesar nilai wajar aset sewa pembiayaan atau sebesar nilai kini dari pembayaran sewa minimum, jika nilai kini lebih rendah dari nilai wajar. Pembayaran sewa minimum harus dipisahkan antara bagian yang merupakan biaya keuangan dan bagian yang merupakan pelunasan liabilitas, sedemikian rupa sehingga menghasilkan suatu tingkat suku bunga periodik yang konstan atas saldo liabilitas. Biaya keuangan dibebankan langsung ke laba rugi.

Jika terdapat kepastian yang memadai bahwa *lessee* akan mendapatkan hak kepemilikan pada akhir masa sewa, aset sewa pembiayaan disusutkan selama estimasi masa manfaat aset tersebut. Jika tidak terdapat kepastian tersebut, maka aset sewa pembiayaan disusutkan selama periode yang lebih pendek antara umur manfaat aset sewa pembiayaan atau masa sewa.

Sewa di mana Kelompok Usaha tidak mengalihkan secara substansi seluruh risiko dan manfaat yang terkait dengan kepemilikan aset diklasifikasikan sebagai sewa operasi.

**n. Penurunan Nilai Aset Non-keuangan**

Pada setiap akhir periode pelaporan, Kelompok Usaha menilai apakah terdapat indikasi suatu aset mengalami penurunan nilai. Jika terdapat indikasi tersebut atau pada saat pengujian tahunan penurunan nilai aset (yaitu aset takberwujud dengan umur manfaat tidak terbatas, aset takberwujud yang belum dapat digunakan, atau *goodwill* yang diperoleh dalam suatu kombinasi bisnis) diperlukan, maka Kelompok Usaha membuat estimasi formal jumlah terpulihkan aset tersebut.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (continued)**

**m. Leases**

*The Group classifies leases based on the extent to which risks and rewards incidental to the ownership of a leased asset are vested in the lessor or the lessee, and based on the substance of the transaction rather than the form of the contract.*

*A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of the leased assets. Such leases are capitalized at the fair value of the leased property or at the present value of minimum lease payments if the present value is lower than the fair value. Minimum lease payments are apportioned between the finance costs and reduction of the lease liability so as to achieve a constant rate of periodic interest on the remaining balance of liability. Finance costs are charged directly to profit or loss.*

*If there is a reasonable certainty that the lessee will obtain ownership by the end of the lease term, leased assets are depreciated over the estimated useful lives of the asset. In the absence of such certainty, those assets are depreciated over the shorter of the estimated useful life of the asset or the lease term.*

*Leases where the Group does not transfer substantially all the risks and rewards of ownership of the asset are classified as operating leases.*

**n. Impairment of Non-financial Assets**

*The Group will assess each annual reporting period whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset (i.e., an intangible asset with an indefinite useful life, an intangible asset not yet available for use, or goodwill acquired in a business combination) is required, the Group make a formal estimate of the asset's recoverable amount.*

**n. Penurunan Nilai Aset Non-keuangan  
(lanjutan)**

Jumlah terpulihkan yang ditentukan untuk aset individual adalah jumlah yang lebih tinggi antara nilai wajar aset atau UPK dikurangi biaya untuk menjual dengan nilai pakainya, kecuali aset tersebut tidak menghasilkan arus kas masuk yang sebagian besar independen dari aset atau kelompok aset lain.

Dalam menentukan nilai wajar dikurangi biaya untuk menjual, digunakan harga penawaran pasar terakhir, jika tersedia. Jika tidak terdapat transaksi tersebut, Kelompok Usaha menggunakan model penilaian yang sesuai untuk menentukan nilai wajar aset. Perhitungan-perhitungan ini dikuatkan oleh pengali penilaian atau indikator nilai wajar yang tersedia.

Kerugian penurunan nilai dari operasi yang berkelanjutan, jika ada, diakui pada laba rugi sesuai dengan kategori biaya yang konsisten dengan fungsi aset yang diturunkan nilainya.

Penilaian dilakukan pada akhir setiap periode pelaporan tahunan untuk menentukan apakah terdapat indikasi bahwa rugi penurunan nilai yang telah diakui dalam periode sebelumnya untuk aset selain *goodwill* mungkin tidak ada lagi atau mungkin telah menurun. Jika indikasi dimaksud ditemukan, maka entitas mengestimasi jumlah terpulihkan aset tersebut. Kerugian penurunan nilai yang telah diakui dalam periode sebelumnya untuk aset selain *goodwill* dibalik hanya jika terdapat perubahan asumsi-asumsi yang digunakan untuk menentukan jumlah terpulihkan aset tersebut sejak rugi penurunan nilai terakhir diakui.

Dalam hal ini, jumlah tercatat aset dinaikkan ke jumlah terpulihkannya. Pembalikan tersebut dibatasi sehingga jumlah tercatat aset tidak melebihi jumlah terpulihkannya maupun jumlah tercatat, neto setelah penyusutan, seandainya tidak ada rugi penurunan nilai yang telah diakui untuk aset tersebut pada tahun sebelumnya.

Pembalikan rugi penurunan nilai diakui dalam laba rugi. Setelah pembalikan tersebut, penyusutan aset tersebut disesuaikan di periode mendatang untuk mengalokasikan jumlah tercatat aset yang direvisi, dikurangi nilai sisanya, dengan dasar yang sistematis selama sisa umur manfaatnya.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (continued)**

**n. Impairment of Non-financial Assets  
(continued)**

*An asset's recoverable amount is the higher of the asset's or CGU's fair value less costs to sell and its value in use, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets.*

*In determining fair value less costs to sell, recent market transactions are taken into account, if information on such is available. If no such transactions can be identified, the Group uses an appropriate valuation model to determine the fair value of the assets. These calculations are corroborated by valuation multiples or other available fair value indicators.*

*Impairment losses of continuing operations, if any, are recognized in profit or loss under expense categories that are consistent with the functions of the impaired assets.*

*An assessment is made at each annual reporting period as to whether there is any indication that previously recognized impairment losses recognized for an asset other than goodwill may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss for an asset other than goodwill is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount.*

*The reversal is limited, so that the carrying amount of the assets does not exceed its recoverable amount or the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years.*

*Reversal of an impairment loss is recognized in profit or loss. After such a reversal, the depreciation charge on said asset is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.*

**n. Penurunan Nilai Aset Non-  
keuangan (lanjutan)**

*Goodwill* diuji untuk penurunan nilai setiap tahun (pada tanggal 31 Desember) dan ketika terdapat suatu indikasi bahwa nilai tercatatnya mengalami penurunan nilai. Penurunan nilai bagi *goodwill* ditetapkan dengan menentukan jumlah terpulihkan tiap UPK (atau kelompok UPK) dimana *goodwill* terkait. Jika jumlah terpulihkan UPK kurang dari jumlah tercatatnya, rugi penurunan nilai diakui. Rugi penurunan nilai terkait *goodwill* tidak dapat dibalik pada periode berikutnya.

**o. Pengakuan Penghasilan dan Beban**

Penghasilan diakui bila besar kemungkinan manfaat ekonomi akan diperoleh oleh Kelompok Usaha dan jumlahnya dapat diukur secara andal tanpa memperhitungkan kapan pembayaran dilakukan. Penghasilan diukur pada nilai wajar pembayaran yang diterima, tidak termasuk diskon, rabat, dan Pajak Pertambahan Nilai (PPN). Kriteria spesifik berikut juga harus dipenuhi sebelum penghasilan diakui:

Penjualan Barang

Penghasilan dari penjualan ke luar negeri (ekspor) diakui pada saat pengapalan barang kepada pelanggan (*f.o.b. shipping point*), sedangkan penghasilan dari penjualan dalam negeri (domestik) diakui pada saat penyerahan barang kepada pelanggan. Penghasilan dari penjualan karung bekas dan bahan baku dicatat sebesar hasil penjualan neto dikurangi dengan biaya-biaya yang dikeluarkan, dan disajikan sebagai "Penghasilan Operasi Lain" dalam laporan laba rugi komprehensif konsolidasian.

Penghasilan dan Beban Bunga

Untuk semua instrumen keuangan yang diukur pada biaya perolehan diamortisasi, penghasilan atau biaya bunga dicatat dengan menggunakan metode Suku Bunga Efektif (SBE), yaitu suku bunga yang secara tepat mendiskontokan estimasi pembayaran atau penerimaan kas di masa datang selama perkiraan umur dari instrumen keuangan, atau jika lebih tepat, digunakan periode yang lebih singkat, untuk nilai tercatat neto dari aset keuangan atau liabilitas keuangan.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (continued)**

**n. Impairment of Non-financial Assets  
(continued)**

*Goodwill* is tested for impairment annually (as of December 31) and when circumstances indicate that the carrying value may be impaired. Impairment is determined for *goodwill* by assessing the recoverable amount of each CGU (or group of CGUs) to which the *goodwill* relates. Where the recoverable amount of the CGU is less than the carrying amount, an impairment loss is recognized. Impairment losses relating to *goodwill* cannot be reversed in future periods.

**o. Revenue and Expense Recognition**

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured, regardless of when the payment is made. Revenue is measured at the fair value of the consideration received, excluding discounts, rebates and Value Added Tax (VAT). The following specific recognition criteria must also be met before revenue is recognized:

Sale of Goods

Revenue from export sales is recognized upon shipment of the goods to the customers (*f.o.b. shipping point*), and revenue from domestic sales is recognized upon delivery of the goods to the customers. Income from sales of used sacks and raw materials are recognized net of the related expenses incurred, and is presented as "Other Operating Income" in the consolidated statements of comprehensive income.

Interest Income and Expense

For all financial instruments measured at amortized cost, interest income or expense is recorded using the Effective Interest Rate (EIR), which is the rate that precisely discounts the estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or liability.

Initial Recognition and Measurement

Financial assets are classified as financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, or available-for-sale financial assets, as appropriate. The Group determines the classification of its financial assets at initial recognition and, where allowed and appropriate, evaluates this designation at each financial year end.

When financial assets are initially recognized, they are measured at fair value. Financial assets that are not measured at fair value through profit or loss, are measured at fair value with the addition of directly attributable transaction costs.

The Group's financial assets including cash and cash equivalents, current trade receivables, other receivables - third parties, non-current trade receivables - third parties and due from related parties are classified as loans and receivables.

Available-For-Sale (AFS) financial assets

AFS financial assets are non-derivative financial assets that are designated as available-for-sale or are not classified in any of the two preceding categories. After initial measurement, AFS financial assets are measured at fair value with unrealized gains or losses recognized in the equity until the investment is derecognized. At that time, the cumulative gain or loss previously recognized in the equity is reclassified to profit or loss as a reclassification adjustment.

The Group has investments in shares that do not have readily determinable fair value in which the ownership interest is less than 20%. These investments are carried at cost.

Pengukuran Setelah Pengakuan Awal

Pinjaman yang diberikan dan piutang adalah aset keuangan non-derivatif dengan pembayaran tetap atau telah ditentukan dan tidak memiliki kuotasi di pasar aktif. Setelah pengakuan awal, aset tersebut dicatat pada biaya perolehan diamortisasi dengan menggunakan metode SBE, dan keuntungan atau kerugian terkait diakui pada laba rugi ketika pinjaman yang diberikan dan piutang dihentikan pengakuannya atau mengalami penurunan nilai, atau melalui proses amortisasi.

Penyisihan atas jumlah yang tak tertagih dicatat bila ada bukti yang objektif bahwa Kelompok Usaha tidak akan menagih piutang tersebut. Piutang tidak tertagih dihapuskan pada saat diidentifikasi. Rincian lebih lanjut tentang kebijakan akuntansi untuk penurunan nilai aset keuangan diungkapkan dalam catatan di bawah ini.

Penghentian Pengakuan

Penghentian pengakuan atas suatu aset keuangan, atau, bila dapat diterapkan untuk bagian dari aset keuangan atau bagian dari kelompok aset keuangan serupa, terjadi bila:

- hak kontraktual atas arus kas yang berasal dari aset keuangan tersebut berakhir; atau
- Kelompok Usaha mentransfer hak kontraktual untuk menerima arus kas yang berasal dari aset keuangan tersebut atau menanggung kewajiban untuk membayar arus kas yang diterima tersebut tanpa penundaan yang signifikan kepada pihak ketiga melalui suatu kesepakatan penyerahan dan apabila (a) secara substansial mentransfer seluruh risiko dan manfaat atas kepemilikan aset keuangan tersebut, atau (b) secara substansial tidak mentransfer dan tidak mempertahankan seluruh risiko dan manfaat atas kepemilikan aset keuangan tersebut, namun telah mentransfer pengendalian atas aset keuangan tersebut.

Subsequent Measurement

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial recognition, such assets are carried at amortized cost using the effective EIR method, and the related gains or losses are recognized in profit or loss when the loans and receivables are derecognized or impaired, as well as through the amortization process.

An allowance is made for uncollectible amounts when there is objective evidence that the Group will not be able to collect the receivables. Bad debts are written off when identified. Further details on the accounting policy for impairment of financial assets are disclosed below in this note.

Derecognition

A financial asset, or, where applicable a part of a financial asset or part of a group of similar financial assets, is derecognized when:

- the contractual rights to receive cash flows from the financial asset have expired; or
- The Group has transferred its contractual rights to receive cash flows from the financial asset or has assumed an obligation to pay them in full without material delay to a third party under a "pass-through" arrangement and either (a) has transferred substantially all the risks and rewards of the financial asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the financial asset, but has transferred control of the financial asset.

Penghentian Pengakuan (lanjutan)

Apabila Kelompok Usaha mentransfer hak untuk menerima arus kas yang berasal dari aset keuangan atau mengadakan kesepakatan penyerahan, atau tidak mentransfer maupun tidak mempertahankan secara substansi seluruh risiko dan manfaat atas aset keuangan tersebut namun telah mentransfer pengendalian atas aset keuangan tersebut, maka suatu aset keuangan baru diakui oleh Kelompok Usaha sebesar keterlibatannya yang berkelanjutan dengan aset keuangan tersebut.

Keterlibatan berkelanjutan yang berbentuk pemberian jaminan atas aset yang ditransfer diukur sebesar jumlah terendah antara nilai tercatat aset yang ditransfer dan nilai maksimal pembayaran yang diterima yang mungkin harus dibayar kembali oleh Kelompok Usaha.

Dalam hal ini, Kelompok Usaha juga mengakui liabilitas terkait. Aset yang ditransfer diukur atas dasar yang merefleksikan hak dan kewajiban Kelompok Usaha yang ditahan.

Pada saat penghentian pengakuan atas aset keuangan secara keseluruhan, maka selisih antara nilai tercatat dan jumlah dari (i) pembayaran yang diterima, termasuk aset baru yang diperoleh dikurangi dengan liabilitas baru yang ditanggung; dan (ii) keuntungan atau kerugian kumulatif yang telah diakui secara langsung dalam ekuitas, harus diakui pada laba rugi.

Derecognition (continued)

Where the Group has transferred its rights to receive cash flows from a financial asset or has entered into a pass-through arrangement, or has neither transferred nor retained substantially all the risks and rewards of the financial asset but has transferred control of the financial asset, a new financial asset is recognized to the extent of the Group's continuing involvement in the asset.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration received that the Group could be required to repay.

In that case, the Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of (i) the consideration received, including any new asset obtained less any new liability assumed; and (ii) any cumulative gain or loss that has been recognized directly in equity, is recognized in the profit or loss.
